News of the Week.

....Capt Johnson, of the brig Ellen, though whose instrunontality so many were saved from the wreck of the Central America, relates the following surious incident .-He says: "Just before six o'clock on the afternoon of September 12th, I was standing on the quarter deck with two others of the crew on deck at the same time, besides the man at the helm Suddenly a bird flew over and around me, just grazing my right shoulder. Afterwards it flow my bead. It soon flew at my face, when I caught hold of it, and made it a prisoffer The bird is unlike any I ever saw before, and I do not know its name. The color of its feathers is a dark iron gray; its body was a foot and a half in length, with wings three and a half feet from tip to tip. It had a beak full eight inches long, and sort of a disposition to bite at everybody, I had its head afterwards cut off and the body thrown overboard. When the bird flew to the ship, the barque was going a little north of northeast. I regarded the appearance of the bird as course. I accordingly besided to the eastward direct. I should not have deviated from my course had not the bird visited the ship; and had it not been for this change of course I should not have failed in with the passengers of the Central America."

one great message is but the incentive and the stimulant to attempt something else-something greater, better, more difficult. The first steps being successfully taken to carry the great overland mail from the Mississippi to Onlifornia, we see instantly projected the bold enterprise of from the Pather of Waters to the shores of the Pacific .--At the first glance it looks like a stupendous undertaking yet, when we consider the character, talent, and energy of the gentlemen engaged in it, we cannot doubt for a momen but that they will succeed. They did succeed in similar enterprises when telegraphing was in its infancy. and when works of that kind were more difficult of execution in the then condition of things than this will now be with all the present advantages of experience and science to aid it. The public wills it; Congress aids it; the projectors prosecute it, and the thing is done!

What an unlucky thing it is for our Black Republican brothen that, by the numination of David Wilmon, they steamer, with a view of recovering the \$1,600,000 which have completely tied their tongues in the present financial crisis. There is no doubt that manufacturers are suffering from wild and reckless railroad speculations—that the business world is on its kness because the cash of the country has been in vested with a reckless hand in western lands-but it is also evident that our Banks are crippled and public confideans lost, because rich and poor, high and low, have been fiving beyond their means. This is a fast age, doubtless; but it is not fast enough to keep up with that swift fuoted harlot that ruins so many-Madam Pashlou. The cause of the present difficulties need not be lanked for in politidi measures, then: it is in our ewn homes, around the domestic hearth, and in the reasons enumerated below:

Northurs in Politics, like quacteries in medicine, for spitent of mischief. When we desert principles for exhundred negroes, it is stated, were in the plot, who were to murder the wealthy inhabitants, and then attempt to redistits, and attempt to tinker where we should boldly renegateand reform, we only postpone the evil day, and renew the inevitable crash more destructive. Another discretizable thing is the attempt to tern to party account the sufferings of trade, manufacturers, and labor, which grow the inevitable causes. For instance, the altegation that the present stringency in the money market is the that the Persons stringency in the money marine result of the Tariff of 1846 is eminently unfair and discreditable. One of the city papers boldly asserts, that the failure of a well known iron manufactory, and the consequent discharge of some two thousand workmen, was prodenoed, in part, by that Tariff. Now, we have no doubt that this firm itself would disdain adopting such a pretext as this. Under the Tariff of 1846, the manufacture of railand to its atmost capacity. Their responsion was caused started, based upon the idea that it is a private speculation by the simple fact that they have been manufacturing iron for ratiroad companies, receiving in payment the bonds of those companies, having some thirty years to run. there has been a serious financial crisis in several piour largest northern and western cities admits of no dispute; but we suspect that the losses complained of are, to a very considerable extent, more nominal than real. The enermous decline which has taken placagin the value, particus hely of railroad property, is the natural sequence of exceslve speculation-of cimulating upsate and unknown stocks to the point of gambling prices. As far as we have stocks to the point of gambling prices. As far as we have observed, the "crisis" has not forced any ratiroad stock to any serious extent below its real intrinsic value, or provented any company from declaring an honestly made dividend. The decline, we fancy, have been from the rulings the words wought the cure. I told him, faith or no fath, the Actitions figures of the speculators to the trying standard of roal capital and real investments. In other words, no inconsiderable share of the enormous losses of Wall and Third streets must be counted as the anticipated profits of the "bears" and the unsettled differences of the "bulls."-There is no occasion for alarm, or distrust, but abundan and abiding cause for joy and gratitude. As long as we can draw upon the cotton fields of the South and the faclories of the East, upon the teeming granuries of the mid die and western States, upon the gold deposites of Califor. nia, and the iron and coal deposites of Pennsylvania and Virginia, and as long as our industrial interests are blessed

PRIME COST, \$1,50 PER DRACHM—PRICE \$2, PER DRACHM. Four months ago, this mesterious medicine was submitted to the tribunal of an intelligent public. In that short perilod, nearly fire fundated editors and publishers (in the U.S., Camadaa, British Provinces and England) have personally jested or witnessed its efficacy in Informatory Interases, and have pronounced it the most valuable medical discovery of this or any preceding age. This englished jury of five hundred reliable men, by their unbiased verdict, have given the Antiphlogistic Salt an established character, as will be seen by the following brief extracts.

From the Bission Traveller.

"We think the following testimonials from publishers, who received the Salt in payment for advertising, entitled to higher consideration and more confidence, than the certificates ordinarily attached to advertised medicine."

While many nontrum-makers victimize the good-unstured and pill-ridden public, by ordering "from six to a dozen boxes or bottles, to cure any malady," the discoverer is happy in being able to state, that the severest forms of recent inflammatory insease, are overcome by one Acute package, and the most obstinate and long standing cases, by one Chronic package. It does just what it cianne to do—no more, no less—equalizes the finide, by removing from the system all arterial and sensons obstructions.
