To Machinists and all Using Steam Engines

Hawkins, Goodwin & Cummings'

IMPROVED

Valve Air Cock!

PATENTED DECEMBER 15th, 1857.

The above cut represents an important improvement in Air Cocks for Force Pumps connected with Steam Engines, to which the attention of the public is respectfully solicited.

It will be found useful in all cases where steam engines are employed, but especially so where it is necessary to use a high pressure of steam, or where the water is supplied from a well. When the packing becomes impaired, or the foot pipe fractured, the use of this improvement will enable the packing to be changed or repaired without stopping the engine, thereby saving much time and labor.

This is an important consideration in regard to the foot pipe, as the foot pipe is often rendered useless by the air which finds its way into the pump, causing it to pound, and frequently breaking the pump rod.

Parties desiring to purchase the Valve Air-Cock, can do so by addressing JAMES CUMMINGS, at Erie, Pa., or Messrs. Hawkins & Goodwin, Edenboro, Erie Co. Pa. Machinists to attach the cock to the pump to which the Cock is to be applied, in horizontal or perpendicular. They will be sent to lawyers on application.

TESTIMONIAL.

ERIE CITY IRON WORKS, Erie, Pa., June 27, 1857.

MESSRS. HAWKINS, GOODWIN & CUMMINGS,—Gents:—Wishing gratified to hear that you have obtained a patent for your "Air Cock" for force pumps, as we can say from certain knowledge that it fills the purpose intended, and even better. We have had the cock attached to our foot pump, which troubles your Air-Cock overcomes.

LIDDELL, HERSHEY & Co.

MILWAUKEE, January 14, 1858.

DEAR SIR:—We received and are now using the patent Air-Cock which you send us. We regard it as just the thing required—to remove the air from the force Pump. It works like a charm and we would recommend it to all who have to fill cisterns by force pumps.

HENKEL, CUMMINGS & GOODRICH,
Badger Iron Works, Milwaukee.

EDENBURG, January 21, 1858.

Messrs. Hawkins, Goodwin & Cummings—Gents:—We are happy to announce to you and through you to the public that your improvement in Air Cocks for force pumps, works admirably and to our perfect satisfaction; and we cheerfully recommend it to the attention of the public, especially all those using steam for motive power.

Respectfully yours,
BURLINGHAM, TWICHELL & CLARK.

He intends to contract the undersigned to pay more for Barley than it is worth. Not generally do not design paying more for an article than its value.

He has already urged and solicited by the Farmers last spring I sowed to them by contract, and on parties which having contracted, a large quantity of Seed, in amounts from 2 to 100 bushels. This Seed, thus loaned, to my Cash capital to Twenty and I now want it.
