To Machinists and all Using Steam Engines

Hawkins, Goodwin & Cummings'

IMPROVED

Valve Air Cock!

PATENTED DECEMBER 15th. 1857.

The above cut represents an improved instrument to attach to Cocks for Force Pumps connected with Steam Engines, to which the attention of the public is respectfully solicited.

It will be found useful in all cases where steam engines are employed, but especially so where it is necessary to use a high pressure of steam or where the water is supplied from a well. When the pump is working, and on the first pulse, (owing to the use of this improvement) will enable the pump to act by creating an escape for the air which finds its way into the pump barrel. This is of great consideration in respect to locomotive engines, on the field pipe is often fractured while the engine is under way or between stations.

☞ Persons desirous to purchase the Valve Air-Cock, can by S by addressing JAMES GOODWIN, of Erie, Pa., or Messrs. Hawkins & Goodwin, Edinboro, Erie Co., Pa. It should be stated whether the pump to which the Cock is to be applied, is horizontal or perpendicular. Terms will be made known on application.

TESTIMONIALS.

ERIE CITY IRON WORKS, Erie, Pa., Jan 27, 1858.

MESSRS. HAWKINS, GOODWIN & CUMMINGS, Gentlemen:—We are gratified to hear that you have obtained a patent for your "Air Cock" for force pumps, as we can say from certain knowledge that it is a good invention and well adapted for the purpose. Should one long time left, as nothing about the steam engine has caused more trouble than the pump, which trouble your Air-Cock overcomes.

LIDDELL, HERSEY & Co.

MILWAUKEE, January 14, 1858.

DEAR SIR:—We received and are now using the patent Air Cock, by Hawkins et. al. We regard it as just the thing wanted to relieve the air from the Force Pump. It works like a charm and we would recommend it in preference to all others now in use.

MENZEL, CUMMINGS & GOODRICH,
Badger Iron Works, Milwaukee.

ERIE, January 11, 1858.

Messrs. Hawkins, Goodwin & Cummings, Gents:—We are happy to announce to you that we have tried through your Air Cocks for force pumps, works admirably and to our perfect satisfaction; and we cheerfully recommend it to the confidence of the public, especially to all those using steam as a motive power.

Respectfully yours,
BURLINGHAM, TWICHELL & CLARK.

IMPROVED SEWING MACHINES!

THE Agency for the above Machines, for Erie County, has been appointed Agent for the sale of these celebrated Machines in Erie, invites the public to call and examine one in operation at her rooms before investing money in one.

These Machines commence on an entirely new principle—using no Shuttle, but one Needle and two Threads. They have been before the public for respective years, and have never materially changed, to be the only Machines adapted to all kinds of FAMILY SEWING, including tucking, and on Cotton, Linen, Silk, and Woollen Goods, from the finest Muslin, Cambric, Tarlatan, and Embroidering with a beauty and elasticity which defy any other Machine.

Among the acknowledged advantages that they possess over all others are, 1st. Beauty and elasticity of stitch, alike on both sides. 2d. Great range, from the finest cambric and need of muslin. 3d. Unequalled ease and rapidity of operation. 4th. Makes a stronger, more beauty and strength of fabric; it is not a Chain stitch. 5th. It is CALCULATED TO BE UNRAVELLED, every stitch being locked by the peculiar manner of the Machine; and complete of their work is unrivalled.

THE NEW YORK

STEAM SAW-MILL AND MACHINE COMPANY.

CAPITAL $250,000.

This company has been organized with the above capital for the purpose of supplying the country with the

CELEBRATED

PORTABLE STEAM SAW-MILL,

AND OTHER IMPROVED MACHINERY.

THEY have purchased the entire machinery business heretofore carried on J. M. Emerson & Co., also the Montgomery Jackson Yonkers, on the Hudson, near this city, and with the experienced facilities combined in its organization are prepared to furnish machinery of all kinds of more liberal rates than has ever been offered at any other establishment.

THE COMBINATION SAW-MILL was patented October, 1856, and is now generally acknowledged to be the cheapest, most powerful, and efficient lumber manufacturing machine in the world.—A large number of them are in successful operation in different sections of this country, Canada, Cuba, and South America, and wherever these mills have been tested they are being adopted by lumber manufacturers in preference to all other mills.

Messrs. Emerson & Co.—Gentlemen: I have tried the saw-mill purchased of you, and will say that it performs well, and more than meets my expectations. I am well pleased with its performance. I set it up on a small stream that afforded constant water about as cheap as any little finger, which was much more than sufficient to supply the boiler. We are able to cut 3,000 feet of beautiful lumber in 12 hours, with something less than one cord of wood. It is the very thing we have so much needed in our county for a long time. With a little trouble and expense, we are able to move it from five to ten miles per day, and set it up in the heart of the timber, which saves the great burden of hauling the logs a long distance to the mill.

Yours, respectfully,
JESSE KERR, JR.,
Louisville, Tennessee.

The Company have purchased LUNDY'S PATENT FEED ARRANGEMENT, which is illustrated and described in the Scientific American for October 24. This adds greatly to the efficiency of the mill.

THE COMBINATION MILL, with all the recent improvements, and steam power of 25 horses, is capable of sawing from 3,000 to 4,000 feet in twelve hours, and is sold for $1,450.

THE NEW YORK CIRCULAR SAW MILL

is manufactured only by this Company. It is of superior construction, and sold for 25 per cent less than other mills of no greater capacity. A mill with 36 to 54-inch saw can be sold for from $600 to $800, and with a 20 horse engine and boiler is sold for $1,400.

STEAM ENGINES and BOILERS.—ENGINES of from one to 100 horse power; LOCOMOTIVE, TUBULAR, FLUE and CYLINDER BOILERS manufactured at greatly reduced prices from former quotations.

Drawings, with plans and specifications for buildings and machinery, furnished gratis to our customers.

Engineers and mechanics sent out to put up and set in operation our machinery, when required.

We also manufacture SHINGLE MACHINES, PLANING MACHINES, SUGAR-MILLS, and MACHINERY IN GENERAL.

Special attention paid to getting up SHAFTING and PULLIES for steam, and all kinds of MILL-WRIGHT WORK

This Company are selling in great numbers a PATENT CONICAL BURR-STONE MILL, for flour, corn meal, and all kinds of feed, which is pronounced by experienced millers, both in this country and Europe, THE BEST MILL EVER CONSTRUCTED—it will grind more grain in the same time, and with half the power, of any mill of the same price in the market.

We also furnish other styles of GRIST-MILLS, when required

The undersigned are also publishers of

THE

UNITED STATES JOURNAL,

A large and magnificent illustrated monthly newspaper, devoted to MECHANICS, AGRICULTURE, LITERATURE and AMUSEMENT.

In addition to the usual attractions, which have already given it a circulation of nearly HUNDRED COPIES per month, it will hereafter contain a quarto sheet of all new and valuable MECHANICAL AND SCIENTIFIC DISCOVERIES, embodying a large amount of practical information from experienced writers in these departments than any other publication in the world.
