To Machinists and all Using Street Engines Hawking Goodwin & Cummings' IMPROVED Valve Air Cock!

PATENTERS DECEMBER 15th. 1832.

The abuve cut represents an important improvement in Air Cocks for Force Pumps connected with "these fingines, to which the attention of the public is respectfully solidated.

It will be found useful in all cases where steam engines are employed, but especially so where it is becomen to use a high presence of steam or where the water is supplied from a well-whose the packing becomes impaired, or the first pipe fractured, the use of this improvement will sensite the passing to act by providing an escape for the air which finds its way into the pump barrel. This is an important oriunderation in respect to locomotive agines, as the feed pipe is often fractured while the engine is under any or between stations.

MILWALEE, Jacoury 14, 1856.

Dann Rie:—We recrived and are now using the patent\_dir@cct, which you sent us. We regard it as just the thing wasted to remove the sir from the force Pamp. It works like a charm and we would recommend it in preference to all others now in use.

MENZEL, GUMMINUS & GOODRICH.

EDIXBORO, January 11, 1858.

Mesers. Hawkins, Goodwin & Campings—Gents:—We are happy to announce to you and through you to the public that your improvement in Air Cocks for inrec passes, works adminably and to our perfect antisaction; and we cheerfully recommend it to the essafdance of the public, seperially to all those using steam as a motive power.

Respectfully yours.

N the matter of the application of Arel Fuller to the Court of Common Piene of Eric County, Penn's, for the benefit of the its solvent laws, the Court made the following order: of which my creditors will please take netter.

"Now to wit, to wit February 1, 1854, this petition presented and read in open Court, and the Court is the first Monday in May 1866, for hearing, and direct notice to be given according to law Per Cur."

AREL FULLER Per Cur.' Brie, March 10, 1858.—5144

A sentirely new article in the Trans line, differing radically from any and all others in the world, and is really the only instrument of the kind, worthy of the mane. A short trial of this Truss by those that have were the old or ordinary kind, will fully prove the truth of this statement. They are very light and very amaly, and the Pad one be readily adapted to this any person, and the prevence easily adjusted to suit the convenience or necessary of the want. Those who are so unfortunate as to require the side of such an instrument will do themselves a favor by examining this attack, a few of which are left with the authorized Agents in Equ. (ARTER a fill).
