NEW GRANADA.—New Granada, like the rest of the unfortunate countries of South and Central America, is in a state of social and political fermentation. Reposed to internal convulsions and hostile invasions from without, she casts her eyes for protection towards the United States.

When a high public functionary openly and frankly proposes annexation to the United States, it may be fairly presumed that the conditions of the landars such as to warrant the motion, and that the mind of the intelligent portion of the community is fully prepared for the change. The Atterney General of New Granada, is submitting the new Federal Constitution to the national Legislature, boldly and unreservedly, expresses his doubts as to the efficacy of that instrument. In his opinion, it is paragraph:

In the same tone is a rank corresponding to that of Buffalo, Cleweland, Chetroit and other lake, cities, which, with fewer natural advantages, have hither to be much highly favored by art and enterprise. New towns will spring up in Clinton. Rik, Forest, Warren and McKean counties, and that hitherto neglected territory will begin to teem with a basy, thriving population. It is impossible to overestimate the advantages that will result from the road, and we conclude with congratulating the people of the city and the whole State, spon the good work done by the Legislature on Friday and Sangrday."

In the same tone is an article in the Press from which we extract this paragraph:

"To the city of Philadelphia the present disposition of the convenience of the NEW GRANADA .- New Granada, like the rest of the un-country labors, he declares, is annexation to the American Union. The people would then be protected against foreign esemies; they could direct their attention to the de-velopment of their materal resources; the public lands and private property would become valuable, and they might live in the enjoyment of prosperity and peace, while now, the fear of vandalic invasions and civil commotions weighed upon them like an incubus. New Granada would lose anticipate now, and to which the Attorney General has given expression is so able and convincing a manner, will given expression is so able and convincing a manner, will not become a reality until the force of circumstances impresses to deep thut upon the masses. But a reality it will become, in all human probability. There are only two things possible. The Governor hesitated about signing the Sunbury and Eric bill, on account of the outlet lock at Northumberland being attached to the North Branch, in the provision providing for the sale of that division to residents thereon. This objection was removed by a supplement which was put through both Houses this afternoon in a half an hour after they met. This objection being removed, no doubt the Gevernor will sign the bill at once, as it was understood from the beginingithat he favored the measure. If the effect of this bill will be to secure the completion of the Sunbury and Eric Railroad, the importance of the object may perhaps more than compensate for any immediate pecuniary loss sustained by the State from inadequacy of price.

Buch was the scene at the opening of the debate, and both parties were full of hope and anxicty. The opponents of the bill numbered some able men, and were led by Charles R Buckalew, whom great experience, skill and eloquence make him a formidable antagonist in any contest. The friends of the bill, however, had the weight of talent and character, and what was of more importance, of numbers on their side. Speeches were made and replied to by various

members, which, (bating some few who indulg-

ed in unworthy personalities) could not fail to impress the stranger with a high opinion of the ability and eloquence of the Pennsylvania Senate. But I am proud to add that the crowning bonors of the evening were universally conceded to our venerable Seastor, Judge Wilkins. He had given the bill his most careful consideration. and understood it in all its bearings. The animated spectacle around him seemed to bring back all the vigor of youth, and this spirit, combined with his mature wisdom and his statesmanlike view of the whole question, called forth hearty encomiums from his most determined adversaries. Mindful that he was an Allegheny Senator, Judge Wilkins showed—and showed to a demonstration—that even in a narrow, selfish, local point of view the best interests of Pittsburg required the passage of the bil, especially with an amendment which he offered and which was promptly accepted, requiring a subscription of half a million of dollars, to aid the Allegheny Valley Railroad in its completion from the mouth of the Mahoning to Winslow. This will insure the early completion of the latter road, which phis and New York, shorter in time if not in

miles, than any other. He showed further, to a mathematical demonstration, that the Allegheny

Valley Road was destined to be the great trunk,

and not merely a feeder of the main stem.

But passing from local considerations, the ven-erable Senator discussing the question on broad and general principles, he reviewed our improve ment system from its earliest turnpike to its present railroad-drawing from memory and observation the materials which his associates and all of me of this generation must gather from books—showing how every section of the Com-monwealth had in turn shared the foetering care of the Commonwealth except the region it was ingly spoken of this region as a desert, a forest, and a wilderness. Judge Wilkins blandly reand "forest" were somewhat incompatible, ad mitted that it was a forest or wilderness, and then with admirable test and irresistible force turned this view of the case into an argument for the passage of the bill. How came it, he asked. that gentlemen, whose own districts had been opened up and enriched by the beneficent hand of the government, can still point with succes and taunts to this region as a wilderness? -as rich in varied resources as in any other portion of the State, and needing only the development that this road will give it to make it populous and prosperous. This step-mother policy toward one branch of her family whilst nourishing all the rest bountifully, had been carried too far already; it was time to correct it.

Judge Wilkins produced statistics showing the

magic effect of the internal improvements of this and other States, in adding to the value of the taxable property and in increasing the general wealth, and argued that it was the duty of states. men to look forward-to open up these resources-and to lay the foundations of public prosperity broad and deep, instead of skimming the aurface for a transient pittance of revenue then proceeded to show in emphatic and convincing language the benefits that would naturally flow from a connection with the Sunbury and Brie Railroad-at a distance from Pittsburg much pearer than is apprehended-by a junction with the Allegheay Valley Railroad. That it will take place he had the authority for saying of every engineer of both companies as expressed in their annual reports. And, furthermore, that the latter company have recently made material change southwardly in the location of their road for the express purpose of inclining towards Pittaburg, and with a view to render their connection with that city more convenient shorter, and less expensive. When the Senator resumed his seat the audience felt that the question was settled, and so it was. Mr George W. Miller, a young man representing Washington and Greene, had the wretch edly bad taste to attempt to read a lesture to Judge Wilkins upon the impropriety of his conduet on the question at issue. He was universally condemned, and his conduct was in striking contrast to Mr. Bunkalew, who generously de-clared that the Senator from Allegheny had made the great argument in favor of the sale of the public works, and was most deferential in his respect, as were all others. Mr. Francis, of Lawrence, in an aloquent and sarcastic speech, gave the Senator from Greene some wholesome lessons in courtesy that he will do well to profit by, and I am inclined to think he will tarry at Jericho until his beard has grown before running another such tilt against one who exceeds him not more in years than in all the other character-

Those who saw and heard Judge Wilkins on Friday night must have felt, that notwithstand: ing his four score years, time has dealt so kindly with his faculties, both physical and mental, that in all probability he will be able for years to come to serve his constituents and country.
