A certificate from three members of the MEDICAL PROFESSION in Germany, in Europe. We the undersigned, practitioners of medicine in Germany' are well aware that, by our course, we may forfeit the friendship of some of the faculty, but not of its benevolent members, who are uninfluenced by selfish motives. Though we shall refrain from an expression of our opinion, either of the soundness or unsoundness of Dr. Goelicke's new doc-trine, we are happy to say that we deem his Sanativ too valuable not to be general-ly known—for what our eyes behold and our cars hear, we must believe. We hereby state, that when Dr. Louis i Offon Goelicke first came before the Ger-man public, as the pretended discoverer of a new doetrine and a new medicine, we held him in the highest contempt, believ-ing and openly pronsuncing him to be a base imposter and the prince of quacks, But, on hearing so much said about the Sanative, against it and for it, we were induced, from motives of curiosity mere-ly, to make trial of its reputed virtues, upon a number of our most hopeless pa-tients; and we now deem it our bounden duty (even at the expense of our self in-terest) publickly to acknowledge its effi-cacy in curing not only consumption, but other fearful maladies, which we have heretofore belived to be incurable. Our contempt for the discoverer of this medi-eline cips at once swallowed up in our ut-ter astonish; end at these unexpected re-sults; and, as amed is for our abuse of him, we do frankly confess to the world, that we believe him a philanthropist who does honor to the profession, and to our goun-try, which gave him birth. The recent adoption of this medicino in-to some of our European hospitals is a sufficient guaranty that it performs all its promises: It need not our testimoy, for wherever it is used it is its own best wit-ness. The Giraffe, or Camelopard. The Girafic, or Camclopard. This stupendous, majestic, and beautiful animal, which is expusibility depicted in the above masterly engraving by Mr. Adams of New York, is acknowledged to be, the great-est wonder of the animal kingdom. It is not, only the tablest of all known creaturers, but the rarest and most singular character. It has been the great desideratum of ratura-lists in all ages, and but few specimens have been seen for the last thousand years. It was known to the Persians about two thou-sand years ago, having been brought as a present to Dydapes, father of Darius I, several centuries before the Christian Era, by the Abyssians, whore alone it has ever here nound, where alone it has ever here nound, where alone it has ever
