Philadelphia, August 20th, 1845.

TO SENSIBLE CITIZENS.—We know from what we see and feet, that the animal body is, in its organs and functions, subject to derangement, inducing pain, and tending to its destruction. In this disordered state, we observe nature providing for the re-establishment of order, by exetting some salutary evacuation of the morbine matter, orby some other operation, which escapes our imperfect senses and researches. In some cases she brings on a clisis by the bowels, in others by sweating, &c. &c.

Now experience has taught us that there are certain substances, by which, applied to the living body internally or externally, we can at will produce the same evacuations, and thus do in a short time, what has then we have seen a discase cured by a certain natural evacuation, should that discase occur again, we may count upon curing it by the use of such substances, as we know bring about the same evacuation, which we had before observed to cure a similar disease. It is in consequence of the power which the Brandreth Pills exert upon the wholesystem, that makes them so universally beneficial. It is because they impart to the body, the power to expel disease without leaving any evil eff. ct.
