## V. B. PALMER

Is our authorized agent in Philadelphia, New York and Baltimore, to receive advertisements and any persons in those cities wishing to adver-tise in our columns, will please call on him.

FOR THE PRESIDENCY IN 1852, WINFIELD SCOTT, OF NEW JERSEY. FOR VICE PRESIDENT IN 1852, JAMES C. JONES. OF TENNESSEE.

We call attention to the advartis ment of the Vegetable Cattle Powder, which, we are informed, is very useful to feed to cattle.

Also to advertisement of Charles P. Freeman & Co., New York.

We also call attention to the card of our friend Dr. R. A. Miller, Surgeon Dentist. We examined some of his dental workmanship a short time since, which was got up in an elegant style.

CF Graham's Magazine for April has ar rived. The embellishments are Coquetish Seventeen, Destruction of Sodom, Sweet Sunny Isle, The Cariboo, The Forest Fountain, with several others interspersed through the number. The contributions are entertaining and instructive. We read the article on the Cariboo, an animal inhabiting the northern part of North America and commonly supposed to be identical with the rein-deer of Lapland and Siberia. This appears to be a mistake, the Cariboo being larger, and very shy and untameable nother prominent marks of differ-He is armed with antlers and parence. takes of the general nature of the deer.

AF Godey's Lady's Book for April is also at hand. The embellishments are, Watt's first conception of the Steam Engine, The Old Farm Gate, Cottage Villa, Taking Tea in Arbor, with many others through the number. The contributions are from a list of fine writers. The leading article gives an instructive history of the Steam Engine from its simple begin-ning to its perfection, by James Watt. It is also well stored with the graces of poetry and literature.

EDINBURG REVIEW .--- We have received the January number of the republica-tion of this periodical by Leonard Scott & Co., 79 Fulton Street, N. Y. The following are the subjects treated-Genius and Writings of Descates, Bishop Philpotts, Recent Progress of Legislation, Church Music, a few words on International Copyright, Palgrarve's Normandy and England The Ordinance Survey of Scotland, and the Expected Reform Bill, all ably treat-ed-\$3,00 per year.

CONCERT .- Last Saturday evening were present at a musical entertainment given by a society of young ladies and gentlemen, in the Court House in this place, under the direction of Mr. Croft.-We were highly pleased with the perfor mance, which consisted of both sacred mance, which consistent of both sacred and scoular pieces. It opened with several sarced pieces by the young ladies and gen-tlemen-then a class of little girls sang, who gave evidence of considerable profiin the art divine, after which the entertainment closed with several sec nla pieces, by the former, which were truly de-lightful and inspiring.

Noah Martin, democrat, is elected The Loco Governor of New Hampshire. focos have carried the Legislature which ensures a United States Senator of that party to succeed John P. Hale, Freesoil-

Hon. JOHN S. RHEY, Speaker of the House of Representatives:

Hon. JOHN S. RHEY, Speaker of the House of Representatives: SIR:—The undersigned, citizens of the Commonwealth of Pennsylvania, respect-fully submit the following proposition to lease the finished lines of the Canals and Railroads of the State, for the term of ten years from the first day of August next, and keep the same in as good repair as when received; and pay for the first year eight hundred thousand dollars, for the t second year eight hundred and fifty thous-and dollars for the third year nine hund-red thousand dollars. and for each succeed-ing year one million of dollars. The pay-ments to be made monthly to the State bonds. They further propose to expend, in addition to the above payments, three hundred thousand dollars towards the im-provement of the Columbia and Philadel-phia railroad during the term of their lease. And also to double the capacity of the locks on the Delaware division of the Pennsylvania canal; and on the completion of the road to avoid the inclined planes on the Alegheny Portage railroad, to pay eight per cent. per annum on the money the Alegheny Portage railroad, to pay eight per cent. per annum on the money hereafter appropriated and expended to-wards the construction thereof. They also propose to pay seven per cent. per an num on the sum of thirteen hundred thou sand dollars, on the completion of the North Branch canal, and its connection North Branch canal, and its connection with the Chemung canal, in the State of New York; and they pray the Legislature to enact a law authorizing a contract to be made with the undersigned, or their asso-ciates, in accordance with the terms of

their proposition. All of which is most respectfully submitte

mitted. E. G. Dutihl, Thomas S. Clarke, Henry Graff, Jeremiah Butler, John Bingham, J. K. Moorhead, Jacob Dock, Israel Pain-ter, George W. Harris, J. B. Moorhead, Wm. F. Leech, Wm. B. Foster, Jr.

The above is an important proposition and should receive a careful examination. We will throw it into figures and see what it looks like :

In 10 years the Company would pay in \$9,550,000 rent to the State

Company would expend on Co-lumbia R. Road

It would expend also on the Delaware Division to make dou-

ble lockage, say It would pay in interest on \$1,300,000 for the N. Branch Canal on completion, for 8 years at 7 per cent., which, is supposing it would require 2 years to complete the work It would pay in interest on a mount yet required to avoid inclined planes say on \$600,-000 for 8 years at 8 per cent. which is supposing it will re-quire 2 years yet to complete

Total amount State would receive in money and repairs above ordinary repairs during the 10 year's loase, \$ which sum divided by 10 would \$11,112,000

make an average yearly rent of \$1,111,200 The report of the Canal Commissioners for the last year shows, that all the State

works after paying repairs, old debts an expense, cleared \$738,730 83 which would make the company's offer \$372,469 17, per year more than the clear yield of last wear. If the middle of the state of the year. If the yield of last year was any thing like what the works should make, then the company's proposition should be accepted at once. The same report shows that the total expenses of last year were more than a million of dollars; within trifle of one third of which was spent on thirty six miles of railroad viz: that louse assylum, the Portage Road; within a triffe

of another third was spent on 82 miles of railroad from Philadelphia to Columbia and the balance was spent on 530 miles of canal. The enormous amount of expenses shown by the report is swelled to some ex-

tent by old debts contracted in former years and there is doubtless still a pretty large floating debt which the government knows nothing about, which may be paid next year and reported under the head of

At the expiration of two years the North

Branch Canal, should it go on, will be completed which will open up a stupendous trade in that quarter, and bring in tolls in proportion. The company can start with-out having a floating debt to jostle along, still they only offer \$800,000 for the first year, which is only about sixty thousand personal property to not over five hundred dollars more than the works cleared under dollars. We do not know who has intro-We are satisfied that the company will have say whether it has been done by a demano difficulty, the first year, to pay their rent and clear \$300,000. Suppose the expenses for the next year to be a million, only therefore speak of the general princi-which is only about fifty-four thousand ple involved in it. dollars less than last year, and the public works should bring in two millions, which the Canal Commissioners have estimated sold into slavery, or that he and his family they will do, it shows a clear profit of should be without a habitation to shelter \$200,000. In five years the receipts for tolls will amount to \$2,500,000 and at the end of ten years we will not be surprised to a hired one and it is a great deal better end of ten years we will not be surprised to find them \$3,000,000. It is an outrage upon honesty to allege that the repairs should cost a million, under any thing like of an exceention. An act of this kind is in judicious management. If this proposition should be accepted the company will see the day when it will clear over all rent and year and probably more. If the lease was only to run for four or five years, there might be some show of reason for accept-ing the proposition bills shall have been passed in all the States, the vast landed property of ing the proposition, but we believe that ing the proposition, but we believe that the United States will be open to gratui-more than the rent offered will in future be more than the rent offered will in future be made out of them even under their present management, and considerably more should there be a change in the mode of their ad-ministration. If the arrangement is to be estate. The more equally landed proper-made we would like to be one of the part-ty is distributed, in accordance with the ners, for it will be a most stupendous specners for the matter will still have to find and prosperous and fifticulty in the matter the money to complete the improvements on the Portage road and finish the North should be, the amount exempted; and this Branch Canal, which will absorb more than and prosperous and the should be the amount exempted and the should be es are running on to pay the interest on comfortable home but not enough to ren-capital which is used to enrich our tenants, der the person independent of social oblithe company. If it offered any relief to gations. This might vary in different the tax-ridden people we would not oppose places, but a thousand dollars would init, but there is nothing of that kind propo-

> which would remain. A State should not ple beyond the power of an executio carry on business. Let Pennsylvania Very many are so now and still we 728.000 soll her property and pay as much of her debts as possible and the people will man-tices of the Peace, who would rather read age the balance. The only difference be- over a capias or an execution, than a chapage the balance. The only difference be-tween the proposition and the present sys-tem so far as results are concerned, is, a cry against it, which will all be resolv-that the Locofocos under the new system will not quite so likely consider the pub-that gradient the system able into a matter of costs. Taking every thing into view we incline to the opinion that the Locotocos under section pub-will not quite so likely consider the pub-thing into view we include to the section of the pub-that mankind and society at large will be that mankind and society at large will be 384.000 think the company's offer is considerably the gainers by the passage of too low, especially for the six last years of the lease.

BANK NOTE PESTILENCE .- The Cin-

PORTER'S REPEATING RIFLE.—The Washington correspondent of the New York Journal of Commerce, thus notices, the Repeating Rifle recently invented by Mr. Porter, of Tennessee: "It has been already patented in the United States, in England and in France. It is a repeating rifle with a vengeance. It loads and primes itself, solecism as it seems. To use the rifle as a revolver, you put of a cylinder with eight loads, and dis-charge them in succession. You may put on another cylinder. No caps are used— the gun being primed on Manyard's prin-ciple.

The gun being primed on Manyatu's prim-ciple. As a repeater, this rifle has another movement. Discarding the cylinders, you may drop over the lock what Mr. Porter calls "the magazine," which contains sixtly charges which you may fire as rapidly as a watch ticks."

A DESPERATE VILLAIN-Fatal Affray A DESPERATE VILLAIS—Fatal Affray. —A negro slave belonging to Col. John Broward of this county, named Belfast, having committed some thefts and other depredations, about Christmas, took to "the bush," to elude punishment. From that time up to last Saturday night a regular system of thieving and robbing was carried on by Belfast and another run-away, whom he had induced th join him.— On last Saturday evening, Col. Broward, having been informed by some faithful ne-groes that Belfast and his associate would make a visit to his plantation that same night, took immediate steps to secure their arrest.

He and his two sons, armed with shot guns, and two trusty negro slaves, John and Brutus, concealed themselves where it was known the runaways had to pass.— They soon appeared, and Col. B. called on them. They immediately turned and field, pursued by the whole party. Brutus first overtook Belfast. As soon ga he laid his hands upon him the villain quickly and unexpectedly drew a long sharp-pointed butcher knife, with which he inflicted, what is considered, a mortal wound on Brutus. The knife penetrated deep in the region of the liver and nearly the whole ot the bowels protruded from the wound. He and his two sons, armed with shot

whole of the bowels protruded from the I wound. The negro John next came up with the I desperado and had scarcely seized him by ( the collar when he received his death-wound! The weapon entered the chest between the collar bone and the first rib, and took a downward direction for five inches, towards the heart, dividing the main arteries, and producing almost in-stantaneous death. The two sons of Col. Broward were now in imminent danger, the murderer brandishing his bloody knife, ( while their gun, from some cause, would not go off. But fortuntely at this moment Col. B. himself arrived and ended the vil-lain's career by blowing his brains out. A coronor's jury sat next day over the bodies, and found a verdict in accordance with the above facts, and declared Col. Broward justifiable.—Jacksonville (Fla.) News, March 13.
