#### A Tale of Extraordinary Suffer-ing, Want and Death.

The Fredericksburg (Va.) News narrates the following extraordinary incidents in the life of a man named Watson, who, some fifteen years ago, left Alexandria, settled in King George county as a merchant, marin Amg George county as a merchant, mar-ried a highly respectable young lady, by whom he had four children, and subse-quently became a widower and a bankrupt: "With his little children, two of whom

were daughters, he lived on a small farm were daughters, he lived on a small farm which he rented, three miles below the line separating Staffard and King George. During the coldest of the weather in the latter part of December last, his children were seized with whooping cough, and ev-ery one of them prostrated.

"While thus confined their father was taken with erysipelas, and in the same room lay the father and children, perfectly helpless. While thus confined, some fiends broke in his meat and fowl houses and stole every fowl and piece of meat on the farm.

In doing so they passed through the garden, leveling the fence and thereby permitting the cattle and hogs to destroy all the vegetables intended for winter use. The only thing left for the support of the family was a small quantity of corn meal and some unrosted coffee. In that condi-tion they lay a large portion of the time without water, without fire and without

"A poor widow in the neighborhood sen them a small piece of meat, and the eldest boy, not quite so ill as the rest, did, as long boy, not quite so it as the rest, did, as long as his strength would enable him, crawl to the fire-place, stir up the dying embers, half cook some bread, fry a piece of meat, and with coffee without milk or sugar, attempt to relieve the hunger of his dying father and sisters. On one occasion, weak and feeble as he was, he staggered through the snow to a neighbor's house to procur-At one time the father and children would be crying for water, and not a drop in the house and no one to bring it. Thus they lay for several days, until God, in his mercy, took two of the children.

'Two days did they lie corpses by the side of their sick parent, and no one to pre-pare them for sepulture and convey them to the tomb. A man accidently passing by, called in, found the family as we have described them, the father blind and insendescribed them, the father blind and insensible, with his two dead children—one frozen to death—lying by his side, and left them in that condition. Two days after this the father died. The night preceding death he had hemorrhage and bled most profusely. By his side were his son and daughter, barely able to raise their heads, but nerved to the occasion they sat by him the whole night alone, using every means their infant minds could suggest in staunching the blood. A poor widow, the day of Watson's death, heard of it, came to his house, had him and his two children buried, took the sick ones home with her nursed them, and has since restored then to health."

LIBERIA-Capt. Andrew H. Foot, U manded the U.S. brig Perry, on the coast of Africa, under Co Perry, on the coast of Africa, under Commodore Gregory, states, as the result of a statistical comparison, that the number of deaths in Liberia, in proportion to the population, is three per cent. less than in Baltimore; and less than in New York a.d Philadelphia. "At Monrovia iron ore exists in large masses, associated with the igneous rock of which Cape Mesurado is sposed. President Roberts informed me that 20 miles in the interior, ore is found which can be beaten out into malleable iron without the process of smelting. The soil is extremely fertile, adapted to the culture of almost every tropical production. The garden vegetables and fruits of the country are rich and abundant.

Mr. W. O. Hickok, of Harrisburg, has invented a partable cider press, not weighing more than 150 pounds, which is said to be a great improvement upon those now in use. It can be worked by hand so now in use. It can be worked by hand so as to grind forty bushels of apples in an hour, and the grinding is said to be far su-perior to that done by the old fashioned nut mills. It may be set up in any part of the farm, or in a barn or outhouse, and will cost about \$30.

15 On the back of a one dollar bill, is endorsed, "The last spot of \$2,000 which I made in California in six months. Riches have wings."

5 Dr. HOOFLAND'S GERMAN BITTERS.—That this medicine will cure liver complaint and dyspepsia, no one can doubt after using it as directed. It acts specifically upon the stomach and liver; it is preferable to calomel in all billious diseases; it nests as specifically upon the liver as calomel; calomel prostrates the system—the bitters strengthen and never prostrates the petiant, and will give renewed life and health to the delicate invalid, and restore the liver to its functions, and give digestion and appetite in those severe cases wherein the ordinary medicines fail in producing any effect.

SHOCK OF AN EARTHQUAKE.-Yesterday, at about one o'clock, a termulous vi-bratory motion, similar to the shock of an earthquake, was distinctly felt by many of the clerks in the Treasury and Home De partment buildings, and by some other persons in this city. This shock was of such a decided character that some persons in-voluntarily left the buildings above mentioned for the street. The degree of in-tensity of the shock was proportionate to the elevation from the ground; those in the upper stories feeling it much more sensibly than those below. Some nine years ago, (we believe that is about the time) a shock of the same kind was noticed by the occupants of the Treasury building, and which, though supposed by a worthy citizen to be accounted for on a very simple and on-place hypothesis, proved to be a common-place hypothesis, provide a second veritable earthquake, having been simul-taneously observed for great distances south of us, we think even in South America. Nat Intelligencer.

#### DIED.

## VEGETABLE CATTLE POWDER.

PREPARED BY
BREINIG, FRONEFIELD & CO.

The discovery of Breinic, Fronefield & CO.

The discovery of Breinic, Fronefield &
Co's Celebrated Cattle Powder has set the
whole community alive to a new fact in regard to
feeding Cattle, both for the purpose of maintaining health and increasing the production of Fat,
Batter and Milk. The effect of their Powder,
has astonished every one, that has used it, and
the demand has been so large, that the proprietors
could scarcely supply it sufficiently fast for their
sales.

the demand has been so large, that the proprietors could scarcely supply it sufficiently fast for their sales.

The immense popularity it has obtained from Farmers, Dairy Men and Horsemen, and the confidence and success with which they used it have set the heads of other Druggists at work to make an article, professing to be of equal merits, thinking to take advantage of our Powper's popularity, and by these means introduce other articles, into the market, which has no affinity to our preparation whatever. Every person knows, who has read anything of Agricultural Chemistry, that no powder possessing such qualities as that which we prepare, was ever known in any part of Germany, Europe or America. We advise all persons to read Prof. Leibigs works and see for themselves whether they or any one else, ever knew of a Cattle Powder in Germany, Europe or America, that ever professed to have the same virtues, which we claim for ours.

The Discovery is of American Birth, the offspring of the Propringrons, and there is no Cattle Powder in Germany.

The Discovery is of American Birth, the offspring of the Propringrons, and there is no Cattle Powder in Germany.

The Discovery is of American Birth, the offspring of the Propringrons, and there is no Cattle Powder in Germany the same Combination of Chemical elements, as that of B R E I N I G, FRONEFIELD & CO.

Do not therefore suffer yourselves to be deceived, or think that our Powder is a humbug because you have tried those Mongrel Substitutes and found no good follow, but rather injurious results. Never give an opinion unless you have tried the world, as compounded and prepared by Birning, ROSEFIELD & CO.

No not therefore of the proposed upon and allow your Animals to die or linger with disease because you have tried the world, as compounded and prepared by Birning, ROSEFIELD & CO., No. 187 North Third Street, Philadelphia.

N. B. Do not be imposed upon and allow your Animals to die or linger with disease because you have fed the wrong Cattle Powder. The Signature of BEELI

#### \$1,000,000 Saved Yearly by Purchasing SILVER'S MINERAL PAINTS

\$1,000,000 Saved Yearly by Purchasing SLVER'S MINERAL PAINTS

The wonder of the age, nature's own productions. These Paints differ from all others in the market; they are not clays; they require little Oil, flow easily, and cover with a heavier body than white lead. They neither crack nor peel, and dry readily. making an Examet on Stroke.

Colors—We have seven different colors, viz: three Browns, two Chocolates, Black and Yellow, and by combination make every variety and shade of color.

Body.—These Paints are superior in body (or covering property) to any yet discovered, and pound for pound will cover double the surface of white lead, zinc, or other metallic Paints.

Inox.—To Iron they furnish a perfect protection against rust, for they contain no metal, which like white lead acts destractively on the iron; in fact this Paint makes iron doubly valuable for building purposes.

Butck Work.—They give to house walls a much heavier coating than other paints, and if sanding is required, nothing holds so firmly of fluidency because the containing that it ever was.

Butck Work.—They Give as a roof, never so old and leaky, Silver's Mineral Paints will make it cheaply new and more enduring than it ever was.

Surrs using this extraordinary Mineral as we prepare it for them, will be proof against the action of hot suns worms and salt water.

Captralists and Buildens are invited to make strict scrutiny into the merits of these Paints are purely mineral; all clays and other impurities are washed out in preparing them for the market. They cost but half the price of white lead, and the same quantity will cover twice the surface, and last six times as long, which in fact reduces the price to one-twellth. Climate has no effect on this Paint, and is equally valuable in the coid Canada or our suny Florida.

Dinsections—Use Linseed Oil, mix as thick as you can, and use as other paints. These Paints need but little dryer, and for priming and second coating in all housework they will be found far the apper and more durable than lead

Shirleysburg Female Seminary.

Birmingham Female Seminary.

Birmingham Female Seminary.

The liberal parronage which this Sehool has received in the past, encourages the proprietor and friends of female education, to expect by proper exertion to make it both a premanent and important Institution; and no pains will by sparied to sustain its growing reputation.

Among other considerations which inspire hope as to its future success, the location is not unimportant. Three years actual experiment has developed a more philosophical, if not a truer reason for the existance of Birmingham than many which have been assigned—that it is the situation for a Female Seminary, surrounded as it is by most romantic scenery—retired—healthful—easy of access and in itself a place where one might almost grow wise in the study of Nature alone unmocked by the works of Art.

The school year is divided into two Sessions of twenty-two weeks each; the summer term commencing the last Tuesday in April, the winter term the last Tuesday in October.

Charges to date from time of entering, and no deductions made for absence except in case o sickness.

Tuition \$4.00 and \$5.00 per guarter—boarding
