The Steamer City of Glasgow.

The most serious fears are entertained for the safety of this ship, which sailed from Glasgow for Philadelphia, on the 1st of March, and is now out sixty-four days, and has never been spoken to, or seen since. She had on board about three hundred passengers, and a cargo valued at a million of dollars. There are strong reasons to fear that she has met a fate similar reasons to fear that she has met a fate simils to that of the President, from which no tidings were received. The Philadelphia papers, how-ever, still cling to the hope that she is safe, and refer to the ease of the Atlantic, which was unheard of for a longer period of time, and even-tually succeeded in making her way back to Liverpool. A subscription is on foot to char-ter a steamer to go in search of the Glasgow.

PHILADELPHIA.—All parties have made their principal nominations for municipal offices.— The Whigs have nominated Hon. Robert T. Conrad for Mayor, and Isaac Hazelhurst, Esq., The Locofocos have for City Solicitor. The Locolocos have nominated Richard Vaux for Mayor, Wm. L. Hirst, Esq., for City Solicitor, and Wm. Badger, for Controller. The Natives have nominated Hon. Robert T. Conrad, for Mayor, and Wm. D. Baker, for Solicitor. Judge Conrad, it will be seen, is the eandidate of both the Whigs and the Natives, and no haman agency can prevent his election. There are few men in Philadelphia his election. The Prohibitory Liquor Law.

The Committee of Conference of the two Houses, on the difference between them on the subject of a prohibitory liquor law, met on Thursday evening, and agreed up the report.—
It consists of a premible and three sections.—
The preamble sets forth the causes which have led to the prohibitory movement, and the sections prescribe the mode in which it is proposed to settle it. They provide for a vote of the people, on the second Tuesday of October next, for and against the enactment of a law to prohibit the manufacture and sale of intoxicating liquors, except for mechanical, artistical, medicinal and sacramental purposes. The law, in case one be enacted, to be enforced by adequate constitutional processes and penalties; and the vote of the people to considered their prayer to the next Legislature. One of the sections prescribes the manner in which the ballots are to be prepared, and authorizes the Sheriffs of the several counties of the Commonwealth to give the usual legal notice of the election on this subject. The probabilities are, that this report will be adopted by both Houses. Should either reject it, no other opportunity will be presented this season for any legislation upon the question. CELEBRATED ARABIAN LINIMENT.

CELEBRATED ARABIAN LINIMENT.

IT IS AN ERRONEOUS IDEA that discase cannot be cured except by taking large quantities of medicines into the stomach, in a great many cases of which much injury is done, although the discase in point be actually cured. The coats of the stomach by continued use of nauseating mixtures, frequently become so much disordered that the digestive function is seriously injured—the result of which is dyspepsia, nervousness, cholics, alternate diarrheer and costiveness, flatulence, nightmare, etc., etc. Would it not, therefore, be very desirable to possess a remedy, which being applied externally would excite the absorbents to increased action, and thus carry off through this medium, the delectrous principle which is the direct cause of the disease? Surely every thinking man will admit that this would not only be the most pleasant, but by far the safest means to effect the desired end. The almost superhuman cures performed by the Arabian physicians in the days of old were mainly effected by this course of treatment, and the ingredients of which H. G. FARRELL'S CELEBRATED ARABIAN LINIMENT is composed, are extracted from rare plants peculiar to Arabia.—This great Liniment (which is now to be had of most respectable druggists and merchants in every town in the United States) is daily effecting cures which seemed beyond the power of medicine to control—consumption, broach:
