

Wednesday Morning, May 17, 1854.

WILLIAM BREWSTER, Editor.

CIRCULATION 1000.

WHIG STATE TICKET:

FOR GOVERNOR, James Pollock, of Northumberland co. FOR CANAL COMMISSIONER, George Darsie, of Allegheny co. JUDGE OF THE SUPREME COURT, Daniel M. Smyser, of Montgomery co.

Medical Students.

Medical Students or Physicians, wishing a well selected assortment of Medicines, with Botany, Jaz, and all the necessary fixtures belonging to a Physician's Shop, also a well selected Medical Library, may be had on very low terms. For further information inquire at this office.

New Advertisements.

Notice to Mill-Wrights and Builders, by William Dorris, Jr. Land Warrants Wanted—inquire at the Treasurer's Office. Hams, Shoulders, &c., &c., by Geo. Gwin. Administrator's Notice, Estate of Jno. Speer, dec'd., by David Clarkson. Public Notice, by C. A. Black.

To Correspondents.

We receive a great many communications for the Journal, signed only with some fancy initials. If we publish such a communication we alone are responsible, for we cannot tell who the writer is. The public should know that we cannot publish any communication without the true name accompanying it. The true name shall not be made known unless we are lawfully called upon for it.

Breathes there a man with soul so dead, Who never to himself has said, I will for my own and family's sake? If such there be, let him repent; And have the Paper to him sent; And if he'll pass a happy winter, He, in advance, would pay the printer.

THE NEW YORK MEDICAL REVIEW.—This journal is conducted with marked ability and commendable energy. The number for May 11th, which is just received, is a double one, and consists of thirty-two pages. The matter is unusually abundant, varied and excellent, and is, we venture to say, fully worth the subscription price of the Review (one dollar) for a year. The reading matter is also copious, spicy and instructive. It seems to us that every choir, singing school and family, where music is taught, would be greatly benefited by subscribing for, and reading the New York Medical Review. Published by Mason Brothers, 23 Park Row, New York.

A GREAT AND NOVEL ENTERPRISE.—We publish in our advertising columns a magnificent Gift Enterprise, (the third of a series), started in New York by Mr. Perham, who has been long and favorably known throughout the North and East. An examination of it will present features that commend it to the attention of every man, woman and child in the community. We have only to say that the former enterprises of this indefatigable manager have been characterized by the greatest fairness, and given to our readers the most perfect satisfaction to all concerned. Send in your orders for tickets as early as possible, as they will undoubtedly be taken up in a short time.

The Prohibitory Liquor Question.

This has been finally settled in the Legislature, after occupying nearly the whole session. The Committee of Conference, agreed upon a bill to submit the Question to the people at the next general election, to the effect that if they vote in favor of a prohibitory law, it will be regarded as the prayer of the people of the State to the ensuing Legislature to enact such a law. If they should cast a contrary vote, it will be an end to "prohibition" at least for the present. In the Senate, the report of the Committee was adopted, by a vote of 24 to 7; and it was subsequently adopted in the House, by a vote of 60 to 33.

Mail Robbery.

The U. S. Mail was robbed, near Mr. John Baker's, on the road leading from the Three Springs to Wademan's Mill Post Office, in the southern part of this county. When the villain met the post-boy, he drew a pistol, and told the boy if he did not deliver up the mail-bag he would shoot him. The boy, at last, surrendered. The robber soon disappeared in the woods with the mail-bag. Search was immediately made, but neither the thief nor the mail-bag has been found.

If the thief is as unsuccessful in all his enterprises of the kind, he will be apt to remain poor all his days. When the mail left the Three Springs, (which was the last office before the robbery,) it contained one letter and one newspaper, so he makes a great speculation. The robber is described as being a tall man, wore a high crown black hat, and black coat. This is about the only description the boy could give.

Important to School Directors.

The school law which recently passed the Legislature, and received the sanction of the Executive, makes it the duty of the School Directors, of the several counties of the Commonwealth, to meet in convention at the seat of justice of the proper county, on the first Monday of June next, and on the first Monday of May in each third year thereafter, and select nine out of a majority of the whole number of Directors present, one person, of literary acquirements and of skill and experience in the art of teaching, as County Superintendent for the three succeeding school years, and the School Directors, or a majority of them in such convention, shall determine the amount of compensation for the County Superintendent, which said compensation shall be paid by the Superintendent of Common Schools by his warrant drawn upon the State Treasurer in half yearly instalments if desired, and shall be deducted from the amount of the State appropriation to be paid the several school districts for said county.

FIRE MEETING.

In pursuance of a call issued by the Burgesses and Town Council of the Borough of Huntingdon, a meeting of the citizens of said Borough convened at the Court House, on Monday evening, the 10th inst., to consider and adopt measures to detect the persons concerned in the recent fires in this place, and to prevent incendiarisms in future.

The meeting was organized by the appointment of DANIEL AFRICA, Esq., President, and A. W. BENEDICT, Esq., Secretary. On motion, a Committee, consisting of John Scott, David Saure, Thos. P. Campbell, Knigs, James Saxton and John Westbrock, was appointed to draft resolutions expressive of the sense of the meeting.

Remarks were made by several gentlemen. On motion, the meeting adjourned to meet on Saturday evening, the 13th, in order to give the Committee time to report.

Saturday, May 13th.

Pursuant to adjournment, the meeting reconvened at the Court House.

The Committee appointed at former meeting made report as follows: The Committee appointed to consider the best means to be adopted for the detection, arrest, and conviction of the persons guilty of incendiarism in the borough: for the prevention of the commission of the same offence hereafter; and for the provision of a more efficient fire apparatus, respectfully reports:

That after full consultation, and the reception of such suggestions as some of our fellow citizens saw proper to make to us, we have communicated to the Burgesses and Town Council, through one of their number present during our deliberations, a method of detection which we have strong confidence will soon result in the development of sufficient evidence to justify the arrest and conviction of the persons who are authors of all the fires which we have recently been visited.

The details of this method we, of course, do not deem proper to communicate in public.—We believe them to be efficient. We have no doubt the members of the Council will give all their energies, and employ the services suggested to make them signally and speedily efficient. While the measures hereafter recommended will, we hope, prevent similar misfortunes in future, the measures to be secretly taken with reference to those especially suspected, as incendiarism in the past, can hardly fail to detect the guilty ones, and procure for them a conviction which will insure them a ten years residence in the Penitentiary.

For the purpose of preventing fires in future, and staying their progress if they occur, we submit for the consideration of the meeting the following resolutions:

1st. That David Saure, Esq., David Black, and Thomas Fisher be, and they are hereby appointed a Committee to call upon the citizens and obtain their signatures to an agreement to serve as a Night Police at such times as they may be called upon, or will furnish an approved substitute, or in default of doing either, to pay to the Burgesses and Town Council of the Borough of Huntingdon, (for the purpose of supplying a fund to fill their places) the sum of one dollar and twenty-five cents for each night they shall so fail to serve or supply a substitute; to report the names so obtained to the Town Council who are hereby requested to adopt a system for drawing the names of citizens to serve in such police with such details as will render it effective, and give to each citizen so drawn timely notice of the night upon which he will be required to be on duty.

2nd. That if any person shall refuse to sign such agreement, (although we do not look upon such a result as probable in any case,) their names be reported to the Town Council, with a request to have them entered on our minutes, and made public if deemed expedient. 3rd. That if this system be found inefficient, or impracticable, said Committee be empowered to call another town meeting to devise further means of protection.

4th. That the Burgesses and Town Council be, and they are hereby requested, in accordance with the sentiments of the citizens hereby declared, to procure a Station Engine and Hose sufficient to supply the Engine and fully with water, and to put the whole fire apparatus of the Borough in good working order.

5th. That the citizens of the Borough will sustain the Burgesses and Council in incurring all reasonable expenses in carrying out the declared intention of the said resolutions, measures to detect, arrest, and prosecute to conviction, any and all persons suspected of incendiarism within the Borough.

6th. That the Burgesses and Town Council be requested vigorously to enforce existing ordinances against vice, immorality, and disorderly conduct, to pass such stringent laws as may be necessary, and also to empower the night police to act as Special Constables, and make arrests under the ordinances.

Which report was adopted, and Committee discharged.

The proceedings were ordered to be published in the papers of the Borough.

Adjourned. DANIEL AFRICA, Pres. A. W. BENEDICT, Secy.

New Liquor Law.

We learn from the legislative proceedings of Monday that a new liquor law passed both Houses on that day, and only needs the signature of the Governor to become a law. It was introduced originally to apply to Schuylkill county, and afterwards amended to apply to the whole State.

It prohibits after its passage any persons from selling beer, ale, porter, or other malt liquors without a license from the Court of Quarter Sessions, to be procured in the same manner as licenses for taverns are now obtained.—It also prohibits any person from obtaining a license for the sale of spirituous liquors by quart or otherwise, unless the persons so applying shall be retailers of foreign and domestic goods, wares and merchandise, and entitled to be classed equal to the fourteenth class, and to have been thus regularly classed by the mercantile appraisers.

All persons violating this act are subjected to the same penalties as those prescribed against the keepers of unlicensed tipping houses; but the act is not to brewers of malt liquors or manufacturers or retailers of liquors for wholesale purposes. The act goes into effect immediately upon being signed by the Governor.

The Manufacture of Iron.

It is stated that sixteen iron works are now in operation—9 in Pennsylvania, 3 in Virginia, 1 in New Jersey, 1 in Ohio, 1 in Massachusetts, and 1 in Maryland—are prepared to turn out 160,000 tons of railroad iron this season. For this product the following raw materials will be required: 213,333 tons pig iron; 840,000 tons coal; 500,000 tons iron ore, and 223,333 tons of limestone. The capital of these 16 companies is \$10,000,000; they support a population of 92,500 persons, and consume \$4,625,000 in breadstuffs, besides affording a profit to all the various branches of business in and around the mills.

The Pennsylvania School Journal for May is on our table. It contains an abstract of the School Law that has recently been passed by our Legislature. It also contains a great many communications on the subject of education.

Terms.—One dollar per annum in advance. Subscriptions to commence on the 1st of July or January, at the option of the subscriber.

Bare.—A Western poet speaks of a man who "did without the aid of a physician."

From the Commercial List.

Protection of the Iron Interests. If the farmers of this State, the lumbermen, the millers, the colliers, the carpenters, shoe makers, and manufacturers of every degree, are not satisfied beyond redemption, they will rise to a man to protect against the outrage which is about to be perpetrated against the domestic iron interests, in the repeal of the duty on railroad iron. If there is one proposition clearer than another in political economy, it is the policy of home production, of bestowing home industry upon the domestic materials, and of placing producer and consumer side by side. In spite of the repeal of the tariff of '42, which was rapidly breaking the ground all over our State, wherever iron might readily be found, and was building up furnaces and forges in the wilderness—in spite of the destruction of this beneficent iron industry within the last three years have, with the feeble aid of the State, restored this persecuted branch of Pennsylvania industry, and placed it on a footing requiring only time and non-interference to attain the growth and strength which will no longer ask the helping hand of Government.—These iron manufacturers, who are now building railroads through Europe and this country, with the extensive adaptation of iron to new purposes, so as to create a demand beyond existing means of supply, very materially enhancing the price abroad, and thus operating as a premium on our own manufacturers of the article. Under this condition, none is found compensated for the reduction of the duty in '46, which would otherwise have closed finally the furnaces and forges of Pennsylvania, as it had begun to do, before its operation was stayed by the impetus which the discovery of gold in California, and the consequent immigration, actually fostered, our iron manufacturers, as suddenly recuperated, and is now in a vigorous infancy, full of richer promise to our State than gold to California. It has gathered around it, at various points, prosperous communities, busy in all the useful arts of life. Lands have been cleared, houses built, and shops erected. Farmers and mechanics in places where neither could find a living market before, have now customers increasing daily in numbers and means, among the sturdy iron men.

The parties aiming the blow are, first, a few railroad companies out of the State, which find their means inadequate to their enterprises, and would make up the deficit by seizing virtually upon the profits of the Pennsylvania iron manufacture. But the chief and original conspirators are the British Iron Masters, who already feel the power of our competition, and who, in view of the extension, under even the limited protection of the tariff, of their ultimate strength and security. They know full well that if let alone, the iron regions of the State will be rapidly settled by farmers, mechanics and miscellaneous manufacturers, that the cost of producing iron will be thus very materially reduced, and that the growth of a market at the doors of the forges and mills will be active domestic competition. In this reduction they also foresee an end of the necessity of tariff protection, when American Iron will have the advantage of so great an amount of capital, ingenuity and labor engaged in its production, that like American cotton, it will not only be produced as cheaply as the English, but compete with them in the markets of the world. Such is the danger which English masters are now determined by all means, fair or foul, to avert. For this end their agents in Washington, with unlimited credits for bribery and corruption, are busy in making out a bill to amend the tariff, which will succeed now as they have succeeded in former instances, unless the voice of Pennsylvania arrests them promptly. It therefore behooves our citizens of all classes, the agricultural and mechanical most especially, to move in this matter. Iron manufacturers themselves however, look at our tariff, and see that the mere expression of popular opinion whatever mode may be deemed advisable.

The Democratic Party.

There is no disguising the fact that the Democratic party, powerful and triumphant as it is, is not a party of the future, but a party of the present. It is a party of the present, and its ultimate success is not only to be secured, but is already secured. It is a party of the present, and its ultimate success is not only to be secured, but is already secured. It is a party of the present, and its ultimate success is not only to be secured, but is already secured.

The Approaching Eclipse.

On the 26th inst. there will occur an eclipse of the sun, visible and generally large throughout the United States, and actually annular in part of the territories of California, Minnesota, of Vancouver's Island, Canada, West, and the States of Michigan, New York, Vermont, New Hampshire, Maine and Massachusetts. The path of the central eclipse first enters upon the earth in the North Pacific ocean near the Caroline Islands, in latitude about six and a half degrees north, and longitude one hundred and ninety-seven degrees west; thence taking a northeasterly direction, it touches our continent near Cape Flattery, in Washington territory; it then passes over Vancouver's Island, British Oregon, Minnesota, Isle Royale, Lake Superior, Canada, New York, Vermont, New Hampshire, and Maine to the Atlantic, where it leaves the earth in latitude about thirty-six degrees, longitude fifty-two degrees; having in three hours, forty-one minutes and twenty-one seconds, the time of its continuance, run over a course of one hundred and forty-five and a half degrees of longitude, and fifty-six degrees of latitude. The duration of the ring which central in Washington territory will be four and a half minutes, and in New York and New England somewhat less than four.—At Philadelphia the eclipse will be not annular or total, it will begin at 11.35, and end at 1.38, and the greatest obscuration will be at 5h. 25m. 38.8s, and the end will be at 6h. 54m. 6.5s, making a total duration of 2h. 23m. 35.1s. We extract these facts from an interesting paper on the subject read before the American Academy of Arts and Sciences by Mr. Paine, of which we have received a copy.—North American.

THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.—The American Scientific Association commenced its eighth annual meeting on Wednesday at the Smithsonian Institution in Washington. A large number of scientific men, representing all sections of the country, and embracing Professors in nearly all branches of learning, were present. The annual election of officers for this meeting took place last year, and the general meeting being called to order by the retiring President of the Society, Professor Pierce, prayer was offered by the Rev. Dr. Bacon of Washington. Prof. Dana then introduced his successor, Professor Pierce, of Yale College, who, upon taking the Chair, made some brief but pertinent remarks. The Association then adjourned to the following: President, Dr. Torrey; Permanent Secretary, Walcott Gibbs; Treasurer, Mr. Elwyn; Recording Secretary, Lawrence Smith. It was voted to meet in Providence on the 16th August, 1855.

TO BE CHALLENGED.—We understand from the Harrisburg Telegraph, that Judge Pollock visited the seat of Government last week, and was met by his friends in a manner pleasing and satisfactory. It is the intention of Judge Pollock to challenge Governor Bigler to a public discussion of the questions which will come into the contest during the campaign. We are afraid that Bigler will back water.

California.

The last news from our Pacific possessions is far more encouraging than any of recent date received from that quarter. For some time previous to the present, it had been generally supposed that the supply was failing, San Francisco journals contradicted this idea, of course, and explained the true causes of the temporary decline in the exportation of the precious metal, but people here waited for facts to demonstrate the reality. And these have at length come. The winter is over, and the yield of the mines is again very large. Three millions of dollars of their produce have been exported, and fresh discoveries of rich diggings are occurring constantly. Besides this, the branch mint at San Francisco has gone into operation, and the deposit there of one thousand dollars per day. This mint will be an important aid to all concerned in the California mines and their auriferous product.

But a circumstance not less auspicious than this for the prosperity of the Empire is the fact that the price of wheat has advanced, and been very little noticed. We refer to the remarkable progress of agriculture there, as evidenced by the fact, that the wheat crop of the State this season is estimated at twenty millions of bushels! The fear expressed by the San Joaquin Republicans, that California is producing more wheat than she can consume, and that she will be obliged to export her surplus to the continent. We are inclined to think, however, there must be some great exaggeration in this estimate. Twenty millions of bushels would be an immense yield, far surpassing the crop of the great wheat growing State of Pennsylvania, as ascertained by the census of 1850. It is difficult to conceive how such a quantity of land it would require could have been prepared and tilled in so brief a time.—The soil of California is prodigiously prolific, but it does not justify this wild estimate, which it will be the Republicans upon a calculation assuming that all the rest of California will do as well as San Joaquin county, where the farmers estimate their crop at 1,250,000 bushels! Still the mere fact of such a statement being put forth by a paper printed in the agricultural region of the State, and copied into the newspapers, is sufficient to show what astonishing progress has been made in the production of breadstuffs. California, it may safely be assumed, has become a self-sustaining State. But the citizens of that Commonwealth are now threatened by a new dilemma. Although the prospect promises to be so bright, the millers feel it not adequate to the task of converting the crop into flour, nor even a fraction of it, so that the prospect is that the millers will make enormous profits, while the farmers will lose. Perhaps this announcement will cause the exportation of milling machinery, thither from the Atlantic coast, and the embarkation of exporting capitalists in the business. This, however, depends upon the sufficiency of the time, of which those concerned must judge for themselves.

The overdoing of this branch of industry seems to be a characteristic trait of California. They are a sort of tumultuary people out there, acting upon impulse, and rushing to some point to large numbers. They are also extremely shrewd at perceiving any opening for making money, and eager in embracing it. Thus we find that every chance of gain is caught at by thousands as soon as it becomes known.—They are a sort of tumultuary people out there, acting upon impulse, and rushing to some point to large numbers.
