ANALYSIS OF ITH WHITE SULPIUR AND CHALVELTE SPINOS.

The odor of Sulphuretted Hydrogen, perceived at some distance from the Spring, imparate to this water the peculiar properties of Sulphur Springs, Besides this ingredient, I find that the water contains Carbonate of Sodia, and of Magnesia, Glauber's Sait, Epson Salt, and Common Salt, ingredients which give it an increased value. After removing the excess of Carbonic Acid which it contains, it gives an alkaline reaction. The Chalventer water readily yields a precipate, after chullition or continued exposure has expelled the excess of Carbonic Acid. Besides the Biertbonate of Iron, which is its chief characteristic, it also contains Epson Salt, Common Salt, and Carbonate of Magnesia.

Respectfully yours,

Having examined the elements that enter into the composition of the White Sulphur and Chapbeate Springs, of Doubling Gap, as exhibited in their analysis by Professor Booth, of the Mint, a practised and competent chemist, are authorized to say, that they possess all the sanative properties of similar medicinal waters, in the various diseases for which their use has been recommended by Physicians.

The Safe we purchased of you in July last, and manfactured by Evans & Watson, of Philadelphia, remained in the fire, at the burning of our store, until the entire stock was consumed.

The heat was intense, as you may suppose, as there was about seventy barrels of liquor in the store, on the next floor over the safe, besides some seventy thousand pounds of rags, rope, and other combustible matter. Electro-Magnet Lightning Rods.

A FTER many years' close investigation and numerous experiments, the Patentee takes pleasure in informing the public that he has arrived at the true principles of protecting families, dwellings and property from the destructive inducence of Lighttning. The calamities that every City, Town, Village and Country falls vieved at the true principles of protecting families, dwellings and property from the destructive influence of Lightning. The calamities that every City, Town, Village, and Country falls victim to annually, through the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain—this is found in Armitiages Patent Magnetic Lightning Rods, and in this slone. This Rod has been examined by the most scientific gentiemen in the world—Professors at Martica, Johnson, Waller and many others that have examined them, recommend and speak of them in the highest terms of approbation, and have pronounced them the only safe rods in use in this or any other country, for the protection of Lives and Property. One advantage is to divide and the many other country, for the protection of Lives and Property. One advantage is to divide and the best of the first of the control of the conductor. This rod has many other advantages over the old one. The only place of manuacturing is in Yine St., 3 doors above Twofflis, Philatalelphia, where all persons are respectfully invited to call and examine for themselves. Recommendations.

Recommendations.

PHILADA. Aug. 13, 1847.

I have this day carefully inspected a conductor or Lightning Rod, with vane and index, erceted by Mr. Thomas Armitage, on Belleva House, Gloucester, and have no hesitation in saying that it is not only the best that I have ever seen, but that it is the only one I have yet examined that is constructed on strictly scientific principles. It is with much pleasure that I recommend this conductor to the attention of owners of buildings. It is with much pleasure that I recommend that conductor to the attention of owners of buildings. I am well satisfied that the Magnetic Lightning Rod, manufactured by Mr. Thomas Armitage, of Philadelphia, is the best that has ere free makes of electricity and ungnetism, and have no hesitation in saying that these Rods are constructed upon the only principle of safety. The electric shock is received and dispressed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before be commenced the nannfacture of these rods I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rods, and the extensive sales in all parts of the country, is ample commendation of their utility and superiority.

TRACY E. WALLER, M. D. Rising Sun, Philad. c., April 10, 1852.

The following extract is taken from an editorial in the Germantoora Telegraph, edited by Major Frasax—

"The bogus rod placed upon our dwelling we have had taken down; and another erected by Mr. Armitage, to which we would call the attention of our farmers and readers generally. It is put up on true scientific principles, and is a rod that has been approved by the highest authority, and will bear the most thorough examination. Those who have been deceived, as

to the commanity, by thus inviting to it general attention."

PHILADELPHIA, Dec. 4, 1852.

Mr. T. ARMITAGE, Vine Street, west of Twelfth Street, Philadelphia.

My dear Suf. After a trial of many weeks, it affords me great pleasure to inform you that I am highly delighted with the lightning rod you placed upon my house at Bustleton. As far as my chemical knowledge enables me to perform an opinion, I am satisfied you have developed the correct principles in the adaptation of rods to protect properly from destraction by lightning; as soon as the advantages of your arrangements are understood, I am convinced that two persons will be found so reckless as to fail to avail themselves of the protection afforded by your rods. Wishing you all success in your enterprise, I am yours trally.

Opinions of the Press.

New York:

Prof. Hart's Great Gift Enterprise is taking the city by storm. Almost everybody we meet has either purchased a ticket or is about doing so.—The exhibition itself is one of the most interesting, instructive and ingenious ever exhibited in this country, and is worth fully one dollar to view it. The Protessor will give a grand Free Excursion to every purchaser of his one dollar tickets to his elegant country seat, which is one of the gifts in his Great Enterprise, and a vear's subscription to his valuable Journal, and also one of the 300,000 gifts.—Addis.

Pros. Haart's Winota Wonto.—This instructive and entertaining exhibition of the whole World is at Nes. 377 and 379 Broadway. For one dollar four tickets may be procured for the exhibition, and one valuable gift, which may be an independent fortune for the receiver, and also one year's subscription to the illustrated Journal calloid The Whole World.—Dispatch.

ENCY. HART'S Winota Wonto.—The success which this extraordinary, ingenious and comprehensive work of art is meeting, is commensurate with its merets; it is the first and only one of the kind ever conceived, and it stands forth as monument of the university price of months of the conceiver of men and a monument of the university price of men and the conceiver of men and a monument of the university of the conceiver of men and a monument of the university of the conceiver of men and a monument of the university of the conceiver of the conceiver of the conceiver of men and a monument of the university of the conceiver of the conceiver of the conceiver of men and the conceiver of th
