ARMITAGE'S Electro-Magnet Lightning Rods.

AFTER many years' close investigation and numerous experiments, the Patentee takes pleasure in informing the public that he has arrived at the true principles of protecting families, dwellings and property from the destructive influence of LIGHTNING. The calamities that visit every City, Town, Village and Country fall victim to annually, through the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain—this is found in Armitage's Patent Magneto-Electric Lightning Rods, and in this Rod. This Rod has been examined by the most scientific gentlemen in the world—Professors M'Murtrie, Johnson, Wallor and many others that have examined them, recommend and speak of them in the highest terms of approbation, and have pronounced them the only safe rods in use in this or any other country, for the protection of Lives and Property. One advantage is to divide and throw back a part of the electric fluid harmless to the clouds, in time of a stroke it enables the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of leaving the conductor. This Rod has many other advantages over the old one. The only place of manufacturing is in 38-3 doors above Teelth, Philadelphia, where all persons are respectfully invited to call and examine for themselves. For sale Wholesale and Retail, by THOS. ARMITAGE. Orders promptly attended to. Terms cash.

Recommendations.

I have this day carefully inspected a conductor or Lightning Rod, with vane and index, erected by Mr. Thomas Armitage, on Bellevue House, Gloucester, and have no hesitation in saying that it is not only the best that I have ever seen, but that it is the only one I have yet examined that is constructed on strictly scientific principles. It is with much pleasure that I recommend this conductor to the attention of owners of buildings.

I am well satisfied that the Magneto-Electric Rod, manufactured by Mr. Thomas Armitage, of Philadelphia, is the best that has ever been made.

I have spent several years in the study of the laws of electricity and magnetism, and have no hesitation in saying that the Magneto-Electric Rods are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before he commenced the manufacture of these rods I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rods, and the extensive sales in all parts of the country, is ample confirmation of their utility and superiority.

THE HOGS ROUPE PLACED upon our dwelling we have had taken down, and another erected by Mr. Armitage, to which we would call the attention of our farmers and readers generally. It is put up on true scientific principles, and is a rod that has been approved by the highest authority, and will bear the most thorough examination. Those who have been deceived, as we have been, at a loss in not having a proper protection against lightning, substituted. The cost is a mere bagatelle when compared with the entire safety of our houses and barns against this destructive element. Mr. Armitage's advertisement will be found in the columns of this paper, and we feel as though we were performing an imperious duty to the community, by thus inviting to its general attention.

PHILADELPHIA, Dec. 4, 1852.

Mr. T. ARMITAGE, Vine Street, west of Twelfth Street, Philadelphia.

My DEAR SIR: After a trial of many weeks, it affords me great pleasure to inform you that I am highly delighted with the lightning rod you send upon my house at Bastion. As far as my chemical knowledge enables me to perform an opinion, I am satisfied you have developed the correct principles in the adaptation of rods to protect property from destruction by lightnings as soon as the advantages of your arrangements are understood, I am convinced that few persons will be found so reckless as to fail to avail themselves of the protection afforded by your rods. Wishing you all success in your enterprise.

JAMES MCINTOCH, M. D., Professor of Anatomy, Philadelphia College of Medicine.

SAMUEL HOOPER, M. D., of the Union Co., Pa.

Is Agent for Huntington, and adjoining counties, and will furnish the Rods on the same manner as the Proprietor. Any person desiring to be supplied with the Rods can leave their order with the Editor of the Journal, or with J. S. Africa, or the Rail Road Hotel. April 13, 1854.

Shirkleyburg Female Seminary,

Rev. JAMES CAMPBELL, A. M., Principal.

Junia Academy,

HUGH J. CAMPBELL, A. B., } Principals. A. C. FENDALL, }

THE Summer Session of these Institutions commences on Wednesday, the 5th of May, and continues five months. They are situated in the retired Village of Shirkleyburg, in the heart of one of the most lovely and fertile valleys of the Alleghenies.

In a rural district, among one of the plainest and simplest people of Pennsylvania, apart from the bustle and evils of a thoroughfare, or large town, convenient access from all sides, with a community noted for its temperance and morality, and possessing a healthy and unusually beautiful situation, this Village presents advantages for Literary Institutions, which strike the eye of the visitor. Each one possesses neat and commodious buildings, and a full corps of teachers.—They are under entirely separate government and instruction, being situated about a quarter of a mile apart, and having nothing in common except that the use of the Academy Apparatus is given to the Seminary.

The course of instruction is thorough and extensive, embracing the branches usually taught in such Institutions. These Schools offer two principal inducements; first, the most extensive and complete Philosophical Chemical Apparatus in this section of the State, to which Professor FENDALL has made the valuable addition of his choice collection of Astronomical and Mathematical Instruments, including a fine Astronomical Telescope second, the cheapness of the terms.

Wishing to give to the moment of application, the most acute pain is instantly relieved, wherever it is located, by the passing through a constant current of uninterrupted electro magnetism. In the following diseases, no other remedy has ever given such complete and perfect relief to the patient as Pulvermacher's Chains: Rheumatism, Painful and Swelled Joints, Pains in the Back, Neck, Blindness, Paralysis, Neuralgia in the Face, Long standing Nervous Headache, Palpitation of the Heart, General Debility, Dyspepsia, Female Diseases, Asthma, Contracted Joints, &c.

1000 DOLLARS will be given to any person who will produce so many well authenticated certificates of cure from intelligent patients and scientific physicians, of the above diseases, as has been performed by the use of the Electric Chain during the past year.

ANOTHER FACT.

It is truly the fact that wherever the electric chains have been introduced, bottled nostrums and common lard have greatly diminished in sale, people having become disgusted with the practice of using such nostrums.

RECOMMENDATIONS.

The Electric Chains are highly recommended by Professors Mott, Van Buren, Post and Carnochan, of New York; are also in daily use in every Hospital in that city. The chains will last for years, are always ready for use, and produce no injurious results, when used as directed.

FEMALE DISEASES.

The introduction of the Electric Chain into this country is the dawn of a new era in medicine.—During the last twenty years, it can safely be estimated that ten thousand females have died yearly from this one disease.

PROLAPSUS UTERI.

It is well known to medical men that this common disease is beyond the reach of medicine, and that in proportion to the amount of medicine given, the more the patient is doomed to suffer, and sooner will die.

CHRONIC RHEUMATISM.

The Electric Chains never fail to relieve the severe pains and swelling incident to this disease. The worst forms of this disease readily yield to a few applications of a chain, and in no single instance has it failed to give instant relief, if it did not effect a cure.

TO THE PUBLIC.

A. P. FIELDS, M. D., DISEASES OF THE UTERUS, &c. &c. has located a medical office, for the purpose of treating all kinds of diseases, on a safe and scientific principle, and is now ready to attend to all calls, and by strict attention to business, hopes to receive a good portion of public favor. Fever and Ague cured in three days, and warranted to remain cured July 20, '53.—A. P. F.

THE HUNTINGDON FOUNDRY.

R. C. McGILL returns his thanks to his friends and the public for their liberal patronage, and for the honor conferred upon him by their selection to merit a continuance of the same, in all kinds of Castings, Cooking Stoves, Air-Tight, Parlor, Ten Plate Wood and Coal Stoves, of various sizes, and all kinds of Ploughs; the Lancaster and the Plank Barshar patterns, and Keystone No. 1 Self-sharpening and Hill-side Ploughs, and Shares to suit all kinds of Ploughs in the country. Rolling-mill and Forge Castings, Grist and Saw-mill Castings, Lewistown Threshing Machine Patterns, and the four horse and two horse power Castings, and all other kinds of castings too numerous to mention, all of which will be sold cheaper than ever for cash and all kinds of country produce. Also, old metal taken in exchange for castings. Huntingdon, November 9, 1853.

Grocery, Confectionary, Bakery, AND OYSTER SALOON.

HENRY J. AFRICA, would respectfully invite the public to call at his establishment in Railroad Street, where all those who need any good Bread, Rusk, or any other kind of Cakes found at a Bakery, may be supplied.

NOTICE.

He has just received a very large and well selected supply of Fruit and Confectionaries, such as Oranges, Lemons, Raisins, Nuts, &c. and a large stock of TOYS.

THE BEST OYSTERS that can be found.

Those in want of fresh shell fish, can be accommodated by calling at the saloon. He has fitted up a saloon expressly for the Ladies.

Thankful to the public for past favors, he hopes by strict attention to business to merit a continuance of the same.

Oct. 12, 1853.
