

News by Telegraph.

European.

There is no important intelligence from the seat of war. The principal feature of the news of the week is a variety of rumors all stating that at last there is a prospect of peace. One Prussia to make conciliatory offers to the Western powers, and Prussia is said to have accepted the mission, Austria assenting. But the most definite form of the rumor is that propositions have been submitted to Napoleon on behalf of Russia, which can be honorably accepted.

All this is possibly premature, but the hopes are not altogether groundless. The excitement respecting American affairs has almost passed away. The Danish Conference met on the 30th, but took no action.

The King of Prussia in his speech to the Chambers, pronounced decidedly the continued neutrality of Prussia. Some important changes have occurred in the English Cabinet.

There is nothing important from Asia or the Black Sea. The London papers contain details of the battle of Inoon, but they do not differ materially from the previous telegraphic reports.

The official announcement has been issued, raising the blockade of the White Sea, on and after October 1st.

The London Morning Advertiser says that the Russian propositions are defective and unsafe, and full faith of what the united powers have a right to demand, and what is required to satisfy the expectations of the country.

Our dispatches received at Vienna state that Omar Pasha had departed from Kutai, and recommenced offensive operations on the 24th of Nov. but the result was not known.

The force of the Allies at Kerch and Yenikale has been augmented by reinforcements to 45,000 men.

A dispatch from Marseilles states that on the 15th, the Russian batteries on the north of Sevastopol commenced firing, but shot, which the allies replied.

The Russian correspondent of the Austrian Gazette, who is considered a reliable authority, doubts that the Russian army in the Crimea has provisions for eight months.

France.—The King of Sardinia left Paris for Genoa on Thursday evening, and was taken over to Genoa by the Queen's yacht.

The official monthly average of the price of wheat in France has been published. The average of the whole of France is 227, 70 lb, being 1/4 of a cent higher than the present month. The highest and lowest averages are 287, 106, per hectolitre, and 312, 116.

Spain.—A letter to the Colonias (Gazette) from a Russian frontier, dated the 23rd ult., says: "The Russian Government is chiefly engaged in three objects; the construction of railways, and of steamers, and the manufacture of Mine Rifles; adding to these measures the enormous military levies and the military work of the organization of the militia proceeds. It becomes evident that we are not given too much credit to the rumors of peace talks which are so constantly heard, but rather conclude that Russia is preparing for a long and obstinate contest."

Mexico.—A most serious misfortune befell Mexico on the 14th ult., by an inundation, which was so expressed in a water-spout, which swept the whole country about Mexico. The water, trees were rooted up, houses, gardens, furniture, and cattle destroyed, and many persons drowned. Much damage has also been done to the city itself. The total loss is said to exceed two millions of dollars, or one and a quarter million sterling. In Palermo the cholera is now laid dormant, but has not given up yet. In Naples, from 30 to 40 deaths per day are occasioned by this fatal malady.
