

CAMPAIGN JOURNAL.

Forever float that standard sheet, Where breathes the foe but falls before us, With Freedom's soil beneath our feet, And Freedom's banner streaming o'er us!

We have concluded to issue a "Campaign Journal" from the 1st of July to the 21st of October. We do this through the solicitation of numerous friends. The terms will be ten copies to one address, five dollars, payable in advance.

Come friends to humanity, come free-men and bear a hand in the righteous cause of freedom, in spreading the great principles of liberty. The Journal is the only paper in the county which is not sold to the interests of the slave-driver.

Godley's Lady's Book for July, is on our table, replete with beautiful engravings and choice literature. Godley stands in the foremost file of Magazine publishers.

Graham's Illustrated Magazine, has been received for July. It has improved wonderfully under the control of its present conductors, Watson & Co., and bids fair to outstrip competition.

Pickles apologises for Alice's 'lame' defence in last Wednesday's American. He says the little man was sick the night before he wrote, and Nurse administered to the wrong patient! Poor Adie! We pity him. Nurses will make mistakes, especially with chronic patients.

We have borne with the editor of the Huntingdon Globe in his slandering of our character, until forbearance has ceased to be a virtue. When the American's editors assailed us with having for our own self, we heeded it not, but as Mr. Lewis lays some claim to respectability, and has published us in his sheet "a self convicted perverter," justice to ourselves and the community, demands our action in the matter, and as the only means left us, we demand from Wm. Lewis, editor of the Huntingdon Globe, a correction of his slanderous libel. If he refuses us this simple act of justice, we must, and shall (however much it is against our inclination) resort to the last remedy—the law—for the purpose of settling this question forever and clearing ourselves from the vile and contumacious aspersions and animadversions of enemies, once for all.

BILLY BOWLES AT HIS OLD TRICKS. Without intending it, the American of the 11th inst., has really conferred on us a favor, by its own windy remarks about our prices for job work, &c., and by calling forth from the Globe a hypocritical tirade on the same subject. We have long borne in silence with the Globe's unmanly course in business matters; but we now feel fully justified in exposing its skulking rascality. This we shall do by a simple and very brief statement of facts, susceptible of proof.

Shortly after we took charge of the Journal, the several publishers in town met in the Globe office and unanimously agreed on a tariff of prices, and, as we thought, honestly pledged themselves with us, strictly to adhere to those prices in all cases. Being at the time a stranger in the place, and unacquainted with the printer's rates of this place, we submitted the matter almost entirely to Lewis, and on our part, in good faith, observed the specifications of our mutual agreement. How long the other party observed the contract we cannot say; but very soon we received unmistakable evidence that Lewis paid no respect to it whatever. We were sold! The meshes of the Jesuit had ensnared us. We felt bound by a rule of honor which placed no restraint upon him, and we knew not what to do. At least twelve months elapsed after we had become fully convinced of the injurious advantage taken of our too easy confidence, before we could decide on a proper and efficient remedy. We resolved, finally, to meet Lewis on his own ground, and fight him with his own weapons, but with this difference—that whilst he resorted to cowardly concealment we proclaimed openly and above board, our fixed determination to work twenty per cent lower than he will, (and if we don't give entire satisfaction we will make no charge at all), until we should either starve him into honesty, or out of the fraternity he has so long disgraced. We claim no merit for this remedy except its efficiency. Adopted in self defence, it has succeeded like a charm. Startling not only the hony, grey back, monster "RAT" of the Globe, but the puny, sly little of the American. All honorable members of the press will appreciate our notice and justify our course; and jimmy barr, and a few, a very few of his kidney, will no doubt affect to condemn it. Be it so, we do not seek or desire his or their approval. Nay, should we do or say anything which they could approve, we would esteem it a misfortune, and have reason to doubt our own integrity.

EXCURSION OVER THE BROAD TOP RAILROAD.

It was our good fortune to be of the party of excursionists over Broad Top Railroad, last week. It was composed of ladies and gentlemen from Hollidaysburg, Lewistown, Milltown, Philadelphia, and Huntingdon, and was gotten up by the excellent President of the Road, L. T. Watson, Esq. At eight o'clock the cars moved off from the depot, and we left the congregated multitude of lookers on for the region of 'black diamonds.'

After a most pleasant ride arrived at the town of Barnett, our destination. Here in a most beautiful grove, everything in the shape of beauty and comfort combined to make all happy. At one o'clock dinner was served, and never before, have we seen such a dinner. The tables groined under the load of good things; all the rarities of the season were spread in abundance, huge cakes, and indeed almost everything the heart could desire or the appetite crave was on that table. We will say to the gentlemanly and active Chairman of the Committee of Arrangement, R. Bruce Petrikin, Esq., that he has permanently established his reputation as an excellent caterer.

After dinner we made an examination of the mines of Messrs. Orison, Dorris & Co., Whitney & Kessler, Port & Maguire, and Saxton & Powell. These mines are inexhaustible, and already a great amount of coal has been taken out. We know of a no more pleasant manner of spending a day than by a visit to these mines.

At five o'clock, after a day of pleasure unalloyed with any disagreeable circumstances, we were on our return and at seven were "home again."

We cannot close without noticing one or two other places of interest which are destined to become thriving towns. The town of Saxton lately laid out by our excellent County Surveyor, J. S. Africa, for Saxton Focker & Co., is beautifully situated and will be a thriving town, being the centre of trade of a large and wealthy district. Markleburg is looking up bravely, and will ere long be a rival of our "ancient borough." Conlont and Stonerstown are also thriving places.

Broad Top Coal. As an evidence of the high esteem in which this coal is held wherever it is used, we give the following as one among many of the very flattering notices of the press. We quote from the Chester County Filigree Rec'd: "This coal which is brought from Huntingdon county, in this State, by way of the North Pennsylvania Railroad, has been recently introduced into Chester county, and bids fair to come into general use. It has been tried in the rolling mills in the vicinity of Conestoga and other places, and it is thought to be a very superior article at the same time it is considerably cheaper than the other coal."

Good, Very Good. The Philadelphia Ledger says that ten German Editors, issuing seventy thousand papers weekly, met in Cincinnati, Ohio, last Monday, and resolved to act with the Republicans, against the extension of slavery.

MISCELLANEOUS ADVERTISEMENTS.

FOR SALE. 95 ACRES OF LAND In Kishacoquillas Valley, Huntingdon County, Penn'a. Four miles from the village of Mill Creek, adjoining lands of James McDonald & others, late the property of James Ross, dec'd., about thirty acres cleared, part of which is excellent meadow; with log house and barn, good spring of water at the door and having Salsider's Creek running through it. ROMAN respectfully informs his customers and the public generally, that he has just opened at his store-room in Market Square, Huntingdon, a splendid new stock of Ready-made Clothing for Spring and Summer! which he will sell cheaper than the same quality of Goods can be purchased at retail in Philadelphia or any other establishment in the country. Persons wishing to buy Clothing would do well to call and examine his stock before purchasing elsewhere. April 9, '56.

CONSUMPTION SUCCESSFULLY TREATED BY INSALATION OF MEDICAL VAPORS.

BY JOHN STUART ROSE, M. D., Fellow of the Royal College of Physicians, and for years Senior Physician in the London Royal Infirmary for diseases of the LUNGS. In this age of progress, Medical Science has contributed her full share to the general welfare, and that which shines resplendent, the brightest jewel in her diadem is MEDICAL INSALATION in the treatment of Consumption and kindred affections. The treatment hitherto pursued has been faulty and inefficient; the stomach being made the receptacle of nauseous oils, and other odorous matters, all being expected to act upon the lungs; the failure to eradicate, or even stop the ravages of the disease, in nearly every case of well-developed Consumption, is surely warning enough to the Consumptive to turn, such a treatment, to the Inhalation of Medical Vapors. Common sense will at once teach, that medicine applied in the form of Vapor, directly to the diseased surface of the Lungs, will be far more effectual than medicine taken into the stomach. It is being expected to act upon the lungs; the failure to eradicate, or even stop the ravages of the disease, in nearly every case of well-developed Consumption, is surely warning enough to the Consumptive to turn, such a treatment, to the Inhalation of Medical Vapors. Common sense will at once teach, that medicine applied in the form of Vapor, directly to the diseased surface of the Lungs, will be far more effectual than medicine taken into the stomach. It is being expected to act upon the lungs; the failure to eradicate, or even stop the ravages of the disease, in nearly every case of well-developed Consumption, is surely warning enough to the Consumptive to turn, such a treatment, to the Inhalation of Medical Vapors. Common sense will at once teach, that medicine applied in the form of Vapor, directly to the diseased surface of the Lungs, will be far more effectual than medicine taken into the stomach.
