He that by the plough would thrive, Himself must either hold or drive.

Light Summer table Beer.—Upon a bushel (of forty quarts) of malt, pour enough boiling water to enable you to draw off 100 quarts of wort. Put into the wort half a pound of hops, and boil it an hour. Having washed your making tub well from the grains, pour the wort into it and when cooled to the temperature of new milk, add in summer half a pint of yeast, in winter a little more. Cover the tub with a cloth, and let it work till next day; pour it into your barrel before it begins to sink, and rack it before the barrel is stopped up. It will fit to drink in a fortnight or three weeks.—F. A. T., Garthmyl, Shrewsbury.

Recipe for a cheap Beer.—A correspondent makes inquiry in reference to brewing spruce beer. As many of your subscribers may be benefited by the following recipe, I take pleasure in forwarding it to you. I use it in preference to coffee in the morning, in preference to wine at dinner, and consider it superior to tea at supper. It is a valuable aperient, and for dyspeptic patients is a valuable medicine.

Prepare a five or ten gallon keg, in proportion to the size of the family—draw a piece of coarse bobbinet or book muslin over the end of the fuzet that is inserted into the keg, to prevent its choking, prepare a good tight bung, and near to that a gimblet hole, with a peg to fit it tight.

Recipe for Five Gallons.—One quart of sound corn, put into the keg, with half a gallon of molasses, then fill with cold water to within two inches of the bung. Shake well, and in two or three days it will be fit for use. Bung tight.

If you want spruce flavor, add one teaspoon of essence of spruce—lemon, if lemon is preferred—ginger, or any flavor you prefer. The corn will last to make five or six brewings; when it is exhausted, renew it. When the beer passes from the vious to the acetous fermentation, it can be corrected by adding a little more molasses and water.

This is a simple, cheap beverage, costing about three cents a gallon. After the beer becomes ripe, it ought to be kept in a cool place, to prevent it from becoming sour before it is exhausted.—Corres. Country Gentleman.

To take Grease spots out of Papered Walls.—With a piece of flannel, dipped in spirits of wine, go carefully over the injured parts once or twice, if very bad, when the spots will be entirely erased from the paper, which will look as well as ever.

An Easy Method of Cleaning Black Kid Boots.—Take three parts of the white of eggs, and one of the best black ink, mix them together thoroughly, and apply the mixture to the article with a soft sponge. I have known this to fail.

To Clean and Remove F ymarks from Gill Frames.—First cleanse the gilding with a camel's hair brush, using the following detergent fluid for the purpose: Water, one pint; borax, half an ounce; carbonate of ammonia, a quarter of an ounce. Use the fluid freely with the brush, doing the frame in portions of about a foot at a time. Let the frame dry by the ordinary influence of the air, but do not attempt to rub it with either linen or silk upon any account. When the frame is dry, those portions which are very much worn may be restored by touching the parts with another fine brush imbued with shell gold that is sold by the artists color men.

Lamp Oil Stains.—To remove lamp oil from cotton and woolen goods, rub in thoroughly with the hand some clean, fresh lard; let it remain for two or three hours, then apply soft soap, and wash in warm water. This can be depended on.

The Best way to Cook Eggs.—Break them into hot—not boiling—water, and let them remain till the yoke is sufficiently cooked—then put on butter, pepper and you have done your utmost with eggs.

Fried Potatoes.—How few cooks know how to fry potatoes! There is no better dish at breakfast, or even dinner, when there is a beef steak on the board. To fry the potato properly, they should be pared sliced lengthwise the thickness of an eighth of an inch, dropped into a pan containing hot fat, turned frequently, nicely browned all over, but never burned. A little flour dredged over them is excellent. Germantown, Pa.

Cooking old Potatoes.—The following method of cooking old potatoes at this season of the year, is recommended by Mrs. H. N. W., of Freeport, Illinois. It is excellent and now is the time to try it.

Put the potatoes about an hour before boiling, and then soak them in cold water until they are to be cooked. The water must be boiling before they are put in, and a little salt is added. When fully cooked the water is poured off, then the water is poured off, then the kettle or pot is placed on the stove, with the lid removed, to allow the moisture to evaporate. By this method of cooking potatoes, I have never failed to render them dry and mealy.

Dr. Hardman, Analytical Physician.

Physician for Diseases of the Lungs, Throat and Heart—Formerly Physician to the CINCINNATI MARINE HOSPITAL, also to "INVALIDS RETREAT," Author of "Lettres à Invalids," IS COMING. See following Card.

MAY Appointments.

Dr. Hardman, Physician for disease of the Lungs, (formerly Physician to Cincinnati Marine Hospital,) will be in attendance at his rooms as follows: Huntington, Jackson's Hotel, Sunday, June 27th Dr. H. is compelled to make this month's visit on Sunday or discontinue the visit.

Dr. Hardman treats Consumption, Bronchitis, Asthma, Laryngitis and all diseases of the throat and lungs, by medical Inhalation, lately used in the Bromton Hospital, London. The great point in the treatment of all human maladies is to get at the disease in the direct manner. All medicines are estimated by their action upon the organ requiring relief. This is the important point upon which Inhalation is based. If the stomach is diseased we take medicine directly into the stomach. If the lungs are diseased, breathe or inhale medicated vapors directly into the lungs. Medicines are the antidotes to disease and should be applied to the very seat of the disease. Inhalation is the application of this principle to the treatment of the lungs, for it gives us direct access to those intricate air cells and tubes which lie out of reach of every other means of administering medicine. The reason that Consumption, and other diseases of the lungs, have heretofore resisted all treatment has been because they had never been approached in a direct manner by medicine. They were intended to act upon the lungs and yet were applied to the stomach. Their action was intended to be local, and yet, they were so administered that they should not act constitutionally, expending immediate and principal action upon the unoffending stomach, whilst the foul mucus within the lungs were unremoved. In the use of the medicine in direct contact with the disease, without the disadvantage of any violent action. Its application is simple, that it can be employed by the youngest infant or feeblest invalid. It does not derange the stomach, or interfere in the least degree with the strength, comfort, or business of the patient.

OTHER DISEASES TREATED.—In relation to the following diseases, either when complicated with lung affections existing alone, I also invite consultation. I usually find them promptly cured. Prolapsus and all other forms of Female complaints, Irregularities and Weakness. S. D. HARDMAN, M. D. June 3, 1858.

IMPORTANT DISCOVERY. CONSUMPTION And all Diseases of the Lungs and Throat, ARE POSITIVELY CURABLE BY INHALATION. Which conveys the remedies to the cavities in the lungs through the air passages, and coming in direct contact with the disease, neutralizes the tubercular matter, allays the cough, cures a free and easy expectoration, heals the lungs, purifies the blood, imparts renewed vitality to the nervous system, giving that tone and energy so indispensable to the restoration of health. It is curable by inhalation, is to me a source of unalloyed pleasure. It is as much under the control of medical treatment as any other formidable disease. Thirty out of every hundred cases can be cured in the first stages, and seventy per cent. in the second; but in the third stage, it is

impossible to save more than five per cent., to the Lungs are so cut up by the disease as to bid defiance to medical skill. Even, however, in the last stages, Inhalation affords extraordinary relief to the suffering attending this fearful scourge which annually destroys ninety-five thousand persons in the United States alone; and a correct calculation shows that of the present population of the earth, eighty millions are destined to fill the Consumptive's graves. The conquer of death has no arrow so fatal as Consumption. In all ages it has been the great enemy of life, for it spares neither age nor sex, but sweeps off alike the brave, the beautiful, the graceful and the gifted. By the help of that Supreme Being from whom cometh every good and perfect gift, I am enabled to offer to the afflicted a permanent and speedy cure in Consumption. The first cause of tubercles is from impure blood, and the immediate effect produced by their deposition in the lungs is to prevent the free admission of air, and to excite a cough, which causes a weakened vitality through the entire system. Then surely it is more rational to expect greater good from medicines entering the cavities of the lungs than those administered through the stomach; the particles of the medicine find the lungs free and the breathing easy, and the inhalation remedies. Thus, Inhalation is a local remedy, nevertheless it acts constitutionally and with more power and certainty than remedies administered by the stomach. To prove the power of the direct influence of this mode of administration, chloroform inhaled will entirely destroy sensibility in a few minutes, paralyzing the entire nervous system, so that a limb may be amputated without the slightest pain; inhaling an ordinary burning gas will destroy life in a few hours.

The Inhalation of ammonia will rouse the system when fainting or apparently dead. The odor of many of the medicines is pernicious in the skin a few minutes after being inhaled, and may be immediately destroyed by the use of a convincing proof of the constitutional effects of inhalation, is the fact that sickness is always produced by breathing foul air; not this positive evidence that proper remedies, carefully prepared and judiciously administered through the lungs should produce the happiest results? During eighteen years' practice, many thousands suffering from diseases of the lungs and throat, have been under my care, and I have effected many remarkable cures, even after the sufferers had been pronounced in the last stages, when all medicines were exhausted, and the patient satisfied me that consumption is no longer a fatal disease. My treatment of consumption is original, and founded on long experience and a thorough investigation. My perfect acquaintance with the nature of tubercles, and the means to distinguish, readily, the various forms of disease that simulate consumption, and apply the proper remedies, rarely being mistaken even in a single case. This familiarity, in connection with certain anatomical and microscopic dissections, enables me to relieve the lungs from the effects of contracted chests, to enlarge the chest, purify the blood, impart to it renewed vitality, giving energy and tone to the entire system.

Medicine with full directions sent to any part of the United States, at the lowest possible rate, communicating their symptoms by letter. But the cure would be more certain if the patient should pay me a visit, which would give me an opportunity to examine the lungs and enable me to prescribe with much greater certainty, when the cure could be effected without my seeing the patient again.

G. W. GRAHAM, M. D., OFFICE, 1131 FILBERT STREET, (Old No. 109.) Below Twelfth, PHILADELPHIA, PA. August 5, 1857. 4t.

Of all diseases it the great first cause Springs from neglect of Nature's laws. SUFFER NOT WHEN A CURS IS GUARANTEED IN ALL STAGES OF SECRET DISEASES.

Self Abuse, Nervous Debility, Strictures, Gleet, Gravel, Diabetes, Diseases of the Kidney and Bladder, Mercurial Rheumatism, Scrofula, Pains in the Bones and Ankles, Diseases of the Lungs, Throat, Nose and Eyes, Ulcers upon the Face, Ulcers of the Throat, Erysipelas, Eczema, Erys. St. Vit's Dance, and all diseases arising from a derangement of the Sexual Organs. Such as Nervous Trembling, Loss of Memory, Loss of Power, General Weakness, Dimness of Vision, with peculiar spots appearing before the eyes, Loss of Sight, Wakeness, Dyspepsia, Liver Disease, Eruptions upon the Face, Pain in the back and head, Female Irregularities, and all improper discharges from both sexes. It matters not what cause the disease originated, or how long standing, or how obstinate the case, recovery is certain, and in a shorter time than a permanent cure can be effected by any other treatment, even after the disease has baffled the skill of eminent physicians and resisted all the means of cure. The medicines are pleasant without odor, causing no sickness and free from mercury or balsam. During twenty years of practice, I have rescued from the jaws of Death many thousands, who, in the last stages of the above mentioned diseases had been given up by their physicians to die. I desire to place me in promising to the afflicted, who may place themselves under my care, a perfect and most speedy cure. Secret diseases are the greatest enemies to health, as they are the first to destroy Consumption, Scrofula, and many other diseases, and should be a terror to the human family. As a permanent cure is scarcely ever effected, a majority of the cases falling in to the hands of incompetent persons, who not only return the patient to his former state of debility, but also destroy the system with mercury, which the disease, hastens the sufferer into a rapid Consumption.

But should the disease and the treatment not cause the patient to apply an untried remedy, the disease is entailed upon the children, who are born with feeble constitutions, and the current of life corrupted by a virus which betrays itself in Scrofula, Tetter, Ulcers, Eruptions, and other affections of the skin, Throat, Eyes, Throat and Lungs, entailing upon them a further extension of suffering and consigning them to an early grave.

Self-abuse is another formidable enemy to health, for nothing else in the dread catalogue of human diseases causes so destructive a drain upon the system, drawing its thousands of victims through a few years of suffering down to an untimely grave. It destroys the Nervous system, rapidly wastes away the energies of life, causes mental derangements, prevents the proper development of the system, disqualifies for marriage, society, business, and all earthly enjoyments, and leaves the sufferer wrecked in body and mind, predisposed to consumption and a train of diseases more to be dreaded than death itself. With the fullest confidence I assure the unfortunate victims of Self Abuse that a speedy and permanent cure can be effected, and with the abandonment of ruinous practices my patients are restored to robust, vigorous health. The afflicted are cautioned against the use of Patent Medicines, for there are so many ingenious snares in the columns of the public prints to catch and rob the unwary sufferers that millions are their constitutions ruined by the consumption of such medicines, and the equally poisonous nostrums vendes as "Patent Medicines." I have carefully analyzed many of the so-called Patent Medicines and find that nearly all of them contain Corrosive Sublimite, which is one of the most potent preparations of mercury and a deadly poison, which instead of curing the disease disables the system for life.

Three-fourths of the patent medicines now in use are put up by unprincipled and ignorant persons, who do not understand even the alphabet of materia medica, and are equally as ignorant of any knowledge of the human system, having only one object in view, and that to make money regardless of consequences.

Irregularities and all diseases of males and females treated on principles established by twenty years of practice, and sanctioned by thousands of the most remarkable cures. Medicines with full directions sent to any part of the United States and Canada, by patients communicating their symptoms by letter. Business correspondence strictly confidential. Address J. S.
