

A LITERARY GEM.

An Appeal for Ate to the Sextant of the Big Meetinghouse.

BY A GASPER. [The following appeal to a sexton for pure air in the meeting house, should have a general circulation. The spelling is not very good but the argument is irresistible.]

O sextant of the meetinghouse, which sweeps And dusts, or is supposed to! and makes fiers, And lites the gas, and sometimes leaves a screw loose,

As zero, and like as not green wood for kindlers; I wouldn't be hired to do it for no some—

But o Sextant! there is a hermodity Wich's more nor gale, wich donat cost nothin, Worth more nor anythin except the sole of man!

Each one must take whatever comes to him. Sextant don't you no our lungs is bellows,

To blow the fire of life, and keep it from going out; And how can bellows blow without wind,

And aint wind aere? I put it to your consensers, Are is the same to us as milk to babies,

Or water is to fish, or pendulums to cloz— Or roats and airbs into an injun Doctor,

Or boys to girls. Are is far us to breathe. Wat signifies who preches, if I can't breathe?

Wat Poles! Wat Pollus to sinners who r de? Ded for want of breth? sextant when we dyed

Its only cause we can't breathe no more— And now, o sextant, let me beg of u

Let a little are into our church. (Dewer are is aere pro for the peas)

And do it week days and Sundays too. It aint much trouble—only make a hole

And the are will cum in of itself: (It lvs to cum in where it gets warm;)

And o how it will rouse the people up, And sperrit up the preacher, and stop garps,

And yawns and figgits as effectool As wind on the dry Boans the Profit tels of.

BEANS FOR SOUP.—The use of beans as an article of food, is not so considerable as it should be.

Beans are the most nutritious of all kinds of food used by man.—Chemical analysis, and the experience of those who make extensive use of them,

demonstrate this. Besides, they are the most economical food which can be used for the support of a family.

Those who find the times hard, are most respectfully invited to try the experiment.

To provide an excellent dinner—healthy, palatable and nutritious—take a pint of beans, with one gallon of water, and the beef bones we are accustomed to throw in the street.

Boil all together, adding a few potatoes if convenient, until the bean becomes soft—add salt and pepper to suit the taste, and dinner is ready.

Such a dinner costs next to nothing, and will rest easier upon the stomach than venison steaks, quail or partridge, washed down with champagne.

A piece of fat beef thrown into the pot will give a pretty good flavor to soup, porridge; or such a dish as I have named.

But if you want the genuine flavor use bones—such bones as are usually thrown away. There is a flavor obtained from the bones which is not obtained from the fat, which is not given from the solid meat.

TOMATOES.—The following method of preparing tomatoes for the table, we are assured by one who has made the experiment, is superior to anything yet discovered for the preparation of that excellent vegetable:

Take good ripe tomatoes, cut them in slices, and sprinkle over them finely pulverized white sugar, then add claret wine sufficient to cover them. Tomatoes are sometimes prepared in this way with de-luted vinegar, but the claret wine imparts to them a richer and more pleasant flavor, more nearly resembling the strawberry than anything else.

Fish are said to be a very healthy food.—With exception of such as have oil inter-fused in their muscular tissues, fish are easy of digestion, and it is remarkable that fishermen and their families, and those who consume a large quantity of fish, are healthy to a more than ordinary degree, and are almost wholly exempt from scrofula and pulmonary consumption.

LOAF PUDDING.—Tie up a pound loaf of baker's bread in a cloth, and put it into boiling water with considerable salt in it, and boil it an hour and a half. Eat with cold sauce.

FRUIT CAKE.—Take 4 cups of flour, 3 of sugar, 4 eggs, 1 lb. of butter, 1 cup of milk, 1 teaspoonful of saleratus, 2 nutmegs, 2 lbs. raisins, 1 lb. Zante currants. For this, baked in 1 cake, bake 24 hours.

Air your bed clothes every day. It is necessary.

TERMS OF THE JOURNAL.

The "HUNTINGDON JOURNAL" is published at the following rates: If paid in advance.....\$1.50

If paid before the expiration of the year, 2.00 And two dollars and fifty cents, if not paid after the expiration of the year.

All subscriptions are continued until otherwise ordered, and no paper will be discontinued until arrears are paid, except at the option of the publisher.

Returned numbers are never received by us. All numbers sent us in that way are lost, and never accomplish the purpose of the sender.

Persons wishing to stop their subscriptions, must pay up arrears, and send a written or verbal order to that effect, to the office of publication in Huntingdon.

Giving notice to a postmaster is neither a legal or a proper notice.

After one or more numbers of a year have been forwarded, a new year has commenced, and the paper will not be discontinued until arrears are paid. See No. 1.

The Courts have decided that refusing to take newspaper from the office, or removing and having it uncollected, is prima facie evidence of intentional fraud.

Subscribers living in distant counties, or in other States, will be required to pay invariably in all cases.

The above terms will be rigidly adhered to in all cases.

SUFFERING HUMANITY READ THIS!

The undersigned takes this Method of informing the public generally that there is no medicine now offered to the public that is equal to DU VALL'S GALVANIC OIL in relieving suffering humanity.

I was an observer of its effects in a friend of mine, who suffered almost everything from a neuralgic affection which resisted the best medical treatment in Centre county. We applied for the Galvanic Oil to the painful part, and he gave some inwardly, and in 20 minutes the patient was asleep, and when awaked was free from pain, and continued so.—This is a positive fact which I am willing to make good at any time. A case of Rheum. was cured in nearly the same length of time. J. H. HAHN, Centre Hill. Aug. 18, 58-ly. Centre county.

HUNTINGDON WARM SPRINGS.

The Warm Springs at the base of Warrior Ridge, five miles north of Huntingdon, overlooking Standing Stone Creek, and environed by romantic hills and woodlands, have been leased by the former proprietor of the Leamer House.

The extensive Hotel buildings, both houses, &c., erected at great expense by General A. P. Wilson, have been completed—and the groves and lawns have been laid out and adorned.

The Hotel parlors and chambers airy and comfortably furnished; and the prospect, from the verandahs for beauty, cannot be excelled.

For half a century, these Springs have been celebrated for their medicinal qualities, and the great nature of the waters in rheumatic and chronic affections. The temperature of the water being 69 degrees, renders the bathing delightful and refreshing.

In the surrounding woods and mountains, game abounds, and the finest fish are caught in Stone Creek. Persons in pursuit of health or pleasure, will find this a most delightful and healthful retreat; and its nearness to the Pennsylvania Railroad, and the cheapness of the rates charged guests, give it a decided advantage over any other watering place in the State.

The proprietor has had years of experience in the business, no pains or trouble will be spared to make guests comfortable.

Hacks run from Huntingdon to Warm Springs on the arrival of the different Railroad trains—fare 25 cents. Families accommodated at moderate rates. JOHN R. HERRD, Proprietor. Huntingdon, June 23d.

THE HUNTINGDON JOURNAL.

The undersigned owners of the Huntingdon Mill, inform farmers and the public generally, that they now have their new mill in running order, with all the modern improvements in the water wheels and machinery.

They have put in two of the Improved Jonival Turbine Water Wheels, and can grind all stages of the water, and during the wet weather, any and all kinds of grain.

They are prepared to sell, and have on hand for sale at all times, at market rates, all kind of FLOUR, FEED AND STUFFS, and farmers can have their own grain ground, and take it back in a return load, or they can be furnished in exchange at a moment's notice an equal quantity of Flour and Bran or chopped feed.

THE SHUT MACHINE is an improved manufacture; and they will insure a FULL TURN OUT of superior quality to every bushel of grain left at their mill. JOHN R. HERRD & MCMURTHRE, Proprietors. Huntingdon, December 10, 1856.

DU VALL'S GALVANIC OIL.
