A married man says that when he was first married (he had been in the happy state of matrimony just six months) he loved his wife to such a degree that he thought he could eat her up, and now he is sorry he didn't.

LOOK TO YOUR CATTLE.—Decisions are becoming very general all over the country that railroad companies are not bound to fence against the cattle, and they are only required to use ordinary care not to destroy cattle upon the track. This will undoubtedly be the rule of action with all the courts. In the densely populated countries of Europe, railroad companies realize the necessity of fencing their tracks, for the safety of their passengers and the general economy of their operations. In time, this will be the rule in our country but at present our roads, of immense length compared with European roads, travel for hundreds of miles through scarcely settled districts, and the cost of fencing and keeping it in order would be enormous. The obligation consequently falls upon farmers and graziers to take due care themselves to keep their cattle off the railroads. The human or moral obligation to do this in behalf of human life and property of others is apparent and incontestable. And the owner of cattle who has not done this and by whose neglect life and property are destroyed, incurs an accountability that reaches beyond the courts of law and the incidents of time.

An exchange paper says: We recently picked up the following memorandum which we saw dropped by a young lady fattired in an embroidered velvet tunic, an exquisite Honiton lace collar, a white hat with plume, and a painfully brilliant silk dress, with exaggerated flourishes: 'I must get a—

Vail, Brown hoos, Sarcelnet, Louse, Gluvs, Shimmyzet, Kulone'. We confess we were startled at the last item, but think it means Cologne. The whole simply proves that wealth and intellect do not necessarily travel in couples.

Recently a man was arraigned for stealing a demijohn of whisky. "Are you guilty?" asked the clerk. "Wall, you can call it what you likes; I tak the whisky, that I admit, and drank it, too."

You took it without leave; did you not? "I never waits to be asked when that article is around."

TESTIMONIALS.

"Having had one of Grover & Baker's Machines in my family for nearly a year and a half I take pleasure in commending it as every way reliable for the purpose for which it is designed—Family Sewing."—Mrs. Joshua Leavitt, wife of Rev. Dr. Leavitt, Editor of N. Y. Independent.

"I confess myself delighted with your Sewing Machine, which has been in my family for many months. It has always been ready for duty, requiring no adjustment, and is easily adapted to every variety of family sewing, by simply changing the spools of thread."—Mrs. Elizabeth Strickland, wife of Rev. Dr. Strickland, Editor of N. Y. Christian Advocate.

"After trying several different good machines, I preferred yours, on account of its simplicity, and the perfect ease with which it is managed, as well as the strength and durability of the seam. After long experience, I feel competent to speak in this manner, and to confidently recommend it for every variety of family sewing."—Mrs. E. B. Spooner, wife of the Editor of Brooklyn Star.

"I have used a Grover & Baker Sewing Machine for two years, and have found it adapted to all kinds of family sewing, from Cambric to Broadcloth. "For several months we have Grover & Baker's Sewing Machine, and have come to the conclusion that every lady who desires her sewing beautifully and quickly done, would be most fortunate in possessing one of these reliable and infatigable tireless women, whose combined qualities of beauty, strength, and simplicity, are invaluable."—J. W. Morris, daughter of Gen. Geo. P. Morris, Editor of Home Journal.

Extract of a letter from Thos. R. Leavitt, an American gentleman, now resident in Sydney, New South Wales, dated 12th Nov. 1858. "I had a tent made in Melbourne, in 1833, in which there were over three thousand yards of sewing done with one of Grover & Baker's Machines, and a single seam of that has stood out all the double seams sewed by sailors with a needle and twine."

"If Homer could be called up from his musy hales, he would sing the advent of Grover & Baker as a more benignant, miracle of art than was ever Vulcan's smith. He would deprecate midnight shirt-making as 'the direful spring of woes unnumbered.'—Prof. North.

"I take pleasure in saying, that the Grover & Baker Sewing Machines have more than sustained my expectation. After trying and returning others, I have three of them in operation in my different places, and, after four years' trial, have no fault to find."—J. H. Hammond, Senator of South Carolina.

"I use my Machine upon coats, dressmaking, and fine linen stitching, and the work is admirable—far better than the best hand-sewing, or any other machine I have ever seen."—Lucy B. Thompson, Nashville, Tenn.

"I find the work the strongest and most beautiful I have ever seen made either by hand or machine, and regard the Grover & Baker machine as one of the greatest blessings to our sex."—Mrs. Taylor, Nashville, Tenn.

"I have one of Grover & Baker's Sewing Machines in use in my family, and find it invaluable. I can confidently recommend it to all persons in want of a machine."—G. T. Thompson, Nashville, Tenn.

ANTIPHLOGISTIC SALT;

For the Lancel, Leeches and Blisters!!! when the undersigned, after a long series of laborious and costly experiments, became convinced in his conviction, that the Antiphlogistic Salt which he now has the happiness to present to the American public, was a PERFECT SUBSTITUTE for Blood-Letting, Leeches and Blisters, his mind was so agitated that he could not sleep for many nights. The cause of his agitation was the striking fact, that the manner of its operation like that of the virus in vaccination, could not be satisfactorily explained upon any known principle. How, in what way, it so effectively subdues Inflammatory Disease and no other was at first wholly inexplicable—but, on further experiment, it was proved that it equalizes the fluids of the body, the want of an equilibrium in which is the sole cause of inflammation. Such is its potency, that like the vaccine matter, it requires merely to be applied to the point of a quill dipped into a solution of it, to effect the entire system—but must be instantly used to prevent decomposition and secure its full virtue. Three quills in acute, and twenty in chronic diseases, every 24 hours, in the heat, pain and fibrile action have subsided, and a perfect cure effected. When it takes the place of blisters, ointment and leeches in local affections, as Brain Fever, Croup, Toothache, Pleurisy, &c., its mode of administration is two-fold. (See direction of dissolving, &c.)

The discoverer has been favored by the public till now, by the advice of a judicious physician and valuable friend whom he consulted—a gentleman who desired to submit it to the test of experiment. After witnessing under his own scrutinizing eye, its signal triumph over both acute and chronic inflammatory diseases, in repeated and re-repeated trials, he offered \$25.00 for an original and special and complete Recipe for its manufacture, but the proposal was rejected.

The disease of the lancet and blisters, is deemed both by humanity by humanity and economy, as a mistake, as suppose that a kettle of boiling water (the inflamed blood) will cease to boil, by dipping out a part of it—or a cask of bad cider (bad blood) be made good, by drawing a portion of it? It is not a question of the efficacy of blisters, but of the efficacy of the Antiphlogistic Salt, which will remove inflammation, when the vaccine matter is superadded inflammation to another? The late Dr. B. Waterhouse, of Harvard University, said "I am sick of learned quackery." One of the eminent physicians in New England acknowledged to me that he had used the Antiphlogistic Salt, and that he had been doubting for many years, whether blood-letting and blisters did not aggravate rather than arrest disease? Some who stand high in the Old and New School, have quite recently expressed their views on this subject, and believe the lancet, setons leeches and blisters injure ten where they benefit one. They think there is a meaning to Deut. 12, 23 "Gen. 9, 4—And wilt, 17, 14—That this should be a rule for us? It is not the excess of blood (there never is too much) that causes the disease, but the want of a balance between the fluids and solids.

The special excellence of the Antiphlogistic Salt, is without the useless loss of blood and strength, as indicated by the pulse, which assumes its natural state as the heat, pain and fever disappear.

Many medicines offered for sale, are backed by doubtful certificates, (their chief virtue) and claim to be universal remedies, curing all maladies—burning on common faces. As the discoverer of this Salt, solemnly protest against having it placed in the category of frauds and impostures, he has resolved that it should be put to the test of a pure gold dollar, with no other passport than its true value. If the public find it genuine, they will receive it—if untrue
