

The Star AND REPUBLICAN BANNER.

Noticing the selection of Mr. Stevens...

The Board of Directors of the Theological Seminary will meet in this place on Tuesday the 19th inst.

It is in contemplation to establish a "Book Depository" by the Evangelical Lutheran Church.

A semi-annual meeting of the Board of the Parent Education Society of the Evangelical Lutheran Church, will also be held in this place on Thursday the 21st inst.

There are 28 Banks in Boston, with capitals varying from \$1,800,000 to \$500,000, each—aggregate capital of the whole, \$18,150,000—aggregate amount of the semi-annual dividend, \$543,000, nearly the rate of 6 per cent. per annum.

A fellow named Jackson is passing himself off at Hastings, in England, as the son of the President of the United States, and appears to be in great favor with John Bull.

There was snow in Baltimore on Wednesday morning last two inches deep!

It has been determined by the Legislature of Maryland to hold an extra session in May, for the purpose of considering the Internal Improvement Bill, recently rejected by the Senate of that State.

The house of John Moore, in Champaign County, Ohio, together with its contents, was destroyed by fire, two or three weeks since—two of Mr. Moore's children also perished in the flames.

A church was organized in Southampton, Mass. in 1743, and from that time until the present there have been but two Clergymen called to its charge—the first of which served 60 years, and his successor is still holding on.

The Detroit Journal states that upwards of \$90,000 were received at the Land Office in that city during the space of 28 days; and that the sales of land in Michigan for 1836, will not fall short of three millions of dollars!

GEORGE AVLE was recently sentenced to the State Prison of New Jersey for two years, for swearing falsely, in order to take the benefit of the Insolvent Act.

The sum of \$300,000 will be appropriated by the Assembly of Upper Canada, for the improvement of the Roads in that province.

A bill has passed the United States Senate providing for the settlement of the Northern boundary controversy between Ohio and Michigan.

Gov. Tazewell, of Virginia, has resigned his office. This is said to be the first instance of the resignation of a Governor of that State since the revolution.

We learn that Henry D. Rogers, Professor of Mineralogy and Geology in the University of Pennsylvania, has been appointed to superintend the Geological survey of our state, required by a recent act of our legislature.

The Massachusetts Legislature have subscribed one million of dollars to the Western Rail Road Company, to extend its works westward to the State of New York.

The Harrisburg Telegraph states that the Canal is filled with water, on the main line from Columbia to Pittsburg, and that burthen and passenger boats are now running on it.

The amount charged the House of Representatives last year for Extra Printing was \$1,496 88. This year, \$902 76—difference in favor of "Economy and Reform." \$594 12! The reason—last year the House was Masonic; this year, Anti-Masonic!

The Altos (Illinois) Telegraph says that more than 40,000 persons—two-thirds of the whole number engaged in the mercantile commerce of the Union—are engaged in the commerce of the Lakes and rivers of the West and South.

The late death of Cincinnati, Newport and other cities, has been brilliantly illuminated on the evening of the 28th of February, on occasion of the passage of the Charleston and

Cincinnati Rail Road bill, by the Legislature of Kentucky.

Land is selling at Dunkirk, (situated in the line dividing New York from Pennsylvania) about 50 miles west of Buffalo, on Lake Erie, at \$4,000 an acre for Lots, only half a mile out of the town!

A Farm, two miles below Wheeling, Va. containing 400 acres, was recently purchased by a company of gentlemen, for \$75,000—only one hundred and eighty-seven dollars and fifty cents per acre!!!

Mrs. FOLLY, of highly respectable connection, has been sentenced to the New Jersey State Prison for three years, for so cruelly chastising a little black girl as to cause her death.

The New York State Gazette states that about one-fourth part of the whole capital of the Manhattan Bank—one of the best banks in that city—belongs to an English nobleman. That this Bank held on 1st of February, three millions and sixty-seven thousand dollars of the People's money, which at legal interest will produce \$214,690 annually.

The Public Treasury.—The New York Star states that about one-fourth part of the whole capital of the Manhattan Bank—one of the best banks in that city—belongs to an English nobleman.

LACONIC.—Davy Crockett, at a public dinner in Nacogdoches, Texas, on being toasted is said to have made the following speech:—"I am told, gentlemen, that, when a stranger, like myself, arrives among you, the first inquiry is—what brings you here? To satisfy your curiosity at once as to myself, I will tell you all about it. I was, for some years, a member of Congress. In my last canvass, I told the people of my District, that, if they saw fit to elect me, I would serve them as faithfully as I had done; but, if not, they might go to hell and I would go to Texas." It was beaten, gentlemen, and here I am."

FOLLY.—The recondite John S. Cutts, who perhaps is one of the greatest naturalists of the age, thus accounts for the phenomenon of fog:—"It is occasioned by the Atmosphere coming in contact with the Hemispheres, which causes the earth to sweat."

NEW-YORK.—An act has lately passed the Legislature of New York providing for a Geological, Botanical, and Zoological Survey of that State. The bill provides for the appointment, by the Governor, of four competent surveyors to discharge this important duty. It appropriates for four successive years, \$20,000 a year, to defray the expenses of the survey.

The salary paid to the cashier of the Citizens' Bank of New Orleans, is equivalent to \$10,000 per annum.

DAVID CROCKETT.—This distinguished hero, it is known, is now in Texas. In a late attack of the Mexicans on Béjar, he displayed his usual bravery. The Lieut. Colonel, commanding, in writing to Gen. Houston, says, "Oh, the Hon. David Crockett was seen at all points animating the men to do their duty."

The average population of Key West, permanent and transient, is estimated at 600. The total number of deaths on the Island last year was 13.

A bill has passed the New York Legislature for making a Tunnel under the Hudson River.

The National Intelligencer has just shown a letter from Cincinnati, Ohio, which states that Carpenters are in great demand, not only in that place, but in the whole West. The wages paid to Journeymen, from \$1 37 to \$1 50 per day, and expected to advance to \$1 75.

The New York Journal of Commerce states that the high rate of wages in that City is bringing great numbers of Mechanics there; and that several companies of Masons have arrived, and are to arrive, from Great Britain, and a number from Canada.

It will inevitably increase the power of the country, and it is necessary to the safety of the nation or insurrection. City can rush to the defence of a city in a few hours, and States to the defence of States in a few days. Before the fleet could appear, the necessary arrangements for the defence of our great maritime cities, the whole power of several of her sisters would be at hand to defend her. Before an attack could be planned and executed, the interior cities would send down their thousands and tens of thousands by very rail-road. Furs are useful in certain positions, but the surest defence of the country is an invincible army of armed men.

I mean those men, whose intellectual acquirements and moral deportment are such as men do generally appear. With the exception of the despotic habit of Intemperance, that they have fallen into. I have seen them hourly, resorting to the Bar of the public house to repeat the intoxicating craft of the Government, and the cheapest memory is confused, their judgment is lost,

their evil passions are excited, their business neglected, and, perhaps, an amiable wife and little children mourning over left this side the grave. This is a picture that is witnessed in every little Town and Village, and even on the Sabbath, that of a straggling man, dazed to rest, how often do we see him, with his eyes glazed, and his feet tottering under the influence of the dram, as he reels from one public house to another. A principal source of these evils arises from licensing too many public houses. In every little town, village, two or three are licensed—where not more than one is necessary for the public accommodation. Any person applying for a license, must have a petition signed by twelve respectable citizens, certifying that the applicant is a man of good character, and that it is necessary for the public accommodation for to grant him a license.

I would ask—is it not to be feared, that many persons signing applications and recommendations to obtain licenses for their neighbors to keep a public house, do so without due deliberation, or as a matter of course, without any reference to the public good? The Judges of our Courts are the Guardians of the public morals of the community—and it is their great responsibility. They are not to be trifled with in the subject of granting tavern licenses, where they can in a great measure remedy the evils complained of—and put a stop to the debasing crime of Intemperance, and all its consequent evils.

A TRAVELLER. GENERAL INTELLIGENCE. THE LEGISLATURE ADJOURNED.

On Saturday last, after one of the most laborious and eventful sessions, the Legislature adjourned for the winter.

On Saturday last, after one of the most laborious and eventful sessions, the Legislature adjourned for the winter.

to his objection, that there is no Professor of Medical Jurisprudence in most of the medical schools, we would remark that it is not the University of Maryland, where the scientific attainments, clear illustrations, and eloquent language of Dr. Donnell are daily appreciated. Several of the members of the Legislature, who are distinguished by a widely extended acquaintance with the law, are to be discharged their duties in a manner no where surpassed, it is manifestly impossible for the students who listen to the lectures, to be benefited by the superabundance, as it would be for the stomach to digest six full meals in the same time; since the mind as much as the body may be injured by a surfeit.

No adequate provision is made in Philadelphia for the exercise of clinical skill; the same, we are afraid, is too true respecting Baltimore; for though a few students may be admitted to the Infirmary, their number is too small to be taken into the account when surveying the whole system.

In Prussia, the students undergo a half-yearly examination in their still of clinical practice, whereas in this country no such examination takes place. This is not at all to be wondered at, when we consider, in many cases, as insufficient as a guide-book where the student is not to be instructed.

We cannot but think that the public in general, and the medical profession in particular, are under obligations to Dr. Cooper for the publication of his work, which we are glad to see has been published in this country.

Finally, this project, if adopted, will put to rest forever all questions as to the power of Congress to make roads within the States, by receiving all the benefits of the power without expiring or expiring.

It is, we think, no small recommendation of this project, that it promises to put an end forever, and that speedily, to the disputes which have so long agitated the States.

It is admitted on all hands, that there has been some talent in the Legislature than in any other body in the Union.
