Passages from Domestic Life. BY MRS. JANE K. EMMERSON

> The Separation. "Young love, which on their bridal eve Had promised long to stay; Forgot his promise, took French leave; And bore his lamp away."

"It is in the power of woman to alienate the affections of the most adoring husband

to poison his feelings, to embitter the kindhest emotions of his heart, and, in short, to make him hate her," said Charles Proctor, as he rose to leave his once quiet and comfortable home.

"You no longer love me, Charles," said his wife, with much asperity of tone, as p flush passed over her beautiful and expres sive face.

"Not so," said he, "it has not yet arrived at that point, and I dread to think that there s a possibility that it may."

"Why, what have I done to bring about such a change in your feelings?" and she burst into tears. Charles was about to rea call, having had very good success in cur ply, but the sobs of his once dear and still beautiful Kate quite unmanned him, and he sank into the chair he was on the point of quitting, without uttering a syllable.

They sat long and sullenly apart without speaking, each occupied in different reflections, although tending to the same result -of these were through neglect on their part; he, wondering what demon could have imand others to the long standing of the dis planted the ever-fretting thern of discontent in a heart which he had fondly anticipated ted. > The Re-Union. "Oh woman! in our hours of case, Uncertain, coy, and hard to please; But when affliction wrings the brow, A ministering angel thou."

It was autumn: the foliage had put on its variegated mantle, like the patriarch's coat of many colors; and hill, grove, field, and plain flashed back upon the declining beams of the sun the thousand reflections his splendors had lent them. It was that gentle season of quiet melancholy, that tender and saddened time of the year when the heart is in unison with the gorgeous mournings of nature; when the sensibilities are the most vivid in their emotion, and the wailing breeze sweeps a chord in every solt and suffering posour.

Proctor was in his library and alone, book was in his hand, but its contents could not banish the busy thoughts that possessed a counter-spell to the poet's imaginings .---Ilis retrospective glance travelled back through the pensive vista of twelve solitary years, since the gordian knot of this nuptial sharpened by human passions, and the wretched cavillings of failable and yet unforgiving creatures. His mind was dwelling upon the days of his youth: he recalled the hour, the scene, when he first saw Kate: and all the fresh feelings of that hour, and the associations of that spot, were renewed within him. He dwelt upon all the fond endearments that then agitated his bosom; and, he knew not wherefore, a flush came upon his cheek, a pang shot through his heart, his lip trembled, and, why he knew not, but he could have wept like a child! It is true, he was no longer young; but the world had gone prosperously with him, and wealth had crowned his exertions; he had outlived all the standers and ill-will of those who had misjudged his feelings, and knew nothing of his motives; and all his early impressions had been mellowed by the soothing hand of time. Solitude was uncongenial to his nature, and although it gave quiet to his mind, yet it did not bring happiness to his heart.

A knock disturbed his reverie, and announced a visiter. He was glad to be interrupted, and the door was immediately opened, when his daughter, now a blooming, lighthearted, joyous and lovely girl, between that uncertain, but interesting, age of girl and womanhood, bounded into his arms like a fawn, and, as she covered him with her kisses, the words "dear father" broke from her rosy lips.

She had just returned from school for the season, and had come to spead a few weeks with her father; whom she loved with all the fondness of her innocent heart.

STOP THE PIG .- We notice an adversement in an exchange paper, wherein one Mr. Pig speaks of his wife's having eloped from his bed and board. We sincerely hope Mrs. Pig will go back to her liege ford, and make the sty comfortable for old grunter and their little porkers.
