Saddles! Saddles! SADDLES!

Important Improvement in Spring-seated SADDLES!

THE Subscriber respectfully informs the Public generally, that he has purchased the Patent Right for making and vending Spring-Seated Saddles of the Zig Zag or W spring in

the Scat, And also a Spring attached to the Girth or Girths and to the tree. The saddle is made with or without a Pommel, just as persons

may fancy. Saddles made upon this plan are incomparably superior to any heretofore in use, in point of strength, durability and elasticity, to the horse and rider. The application of the spring to the girth is productive of ease and comfort to the horse, and protects him from injuries arising from violent or sudden exertions. The Spring is also applicable to LADIES' SADDLES.

CTIt is deemed unnecessary to state any thing more. The public are invited to call and judge for themselves.

The Subscriber returns his sincere thanks to his Customers and the Public in general, for the very liberal support extended to him, and would respectfully inform them that he has at all times

· Notwithstanding the prejudices against these Saddles her tofore, he feels justifiable in saying, that he hopes to gain the confidence and patronage of the public-as he is enabled, on the present principle, to ensure all his saddles without any extra charge. -That a soft, easy saddle is desirable to all persons who ride much, and particularly to those who may not be favored with a very pleasant horse; I presume all persons will unhesitatingly patronize the spring saddles, when they will be ensured as long us the purchaser may deem necessary.

The elasticity of the Saddle acting in harmony with the symetry of the horse and rider, not only affords ease to the man, but incalculable advantage to the horse. All persons of judgment and experience must know, that a dead, unelastic weight on a horse is oppressive. The Spring in the Girth affords the following advantages: 1st Moving or yielding with the horse's chest in breathing, no cramps or cholics or any disbecause the yielding of the spring on the sudden expansion of the chest prevents the girth from breaking, and saves the rider from fall-

sively vegetable, and contains no alcoholic ted to apply, as the little difference in the cost of these and the hard Saddles is so trifling, and incomparable with the difference in comfort and safety.

N. B. Saddlers in the country can be accommodated with Township or Shop Rights at a trifling cost.

We are urged to make these remarks, not from the certificates of unknown per one, but from our own knowledge of several important cures effected by his medicine, which have created general astonishment. The most imporant one is that of Miss E Rohr, the daughter o our worthy Post master, who, after years of suf fering, has been relieved solely by the use of Mr. O'Neill's medicine—the Medical Faculty having tried every thing in vain. These are Miss Rohr own statements. The high reputation of Mr O'Neill's endorsers justify us in saving that their statoments merit universal credence.

From the Baltimore Chronicle. We are not in the habit of expressing an opin ion of the efficacy of Patent Medicines, but in the case of the above mentioned remedy for Rheuma tism, we feel called on, by principles of humanity to state that it has had the most surprising e fects. The inventor is a gentleman in whom the greatest reliance can be placed; but he has other than his own testimony in favor of the medicine which he offers to the public. Clergymen, phy sicians, and those who have been relieved, has borne voluntary witness to its astonishing effica cy; and those who have the misfortune to be afflic ted with this distressing complaint may be assured of inimediate relief by resorting to this remedy.
