The elasticity of the Saddle acting in har rider, not only affords ease to the man, but incalculable advantage to the horse. All persons of judgment and experience must know, that a dead, unelastic weight on a horse is oppressive. The Spring in the Girth affords the following advantages: 1st Moving or yielding with the horse's chest in breathing, no cramps or cholics or any diseaso can rise therefrom. 2d. The girth will outlast two or three of the common kind because the yielding of the spring on the sudden expansion of the chest prevents the girth from breaking, and saves the rider from falling; many falls have been the fruits of break-
