HORSE POWER

AND THRASHING MACHINE, Calculated for Two Horses, WHICH WILL THRASH UPWARDS OF

ONE HUNDRED DOZEN PER DAY. To obviate all objections brought against the plans of machines now in use, he has beyond his most sanguine expectations .--As men are daily seeking improvements to lessen their labor by machinery in different ways, the subscriber is convinced that machines built upon this plan will, in a great measure, reduce the amount of labor, and remove all objections which are urged against the machines now in use. These machines are so constructed as to thrash in the open field, or in bank barns; they can also be removed with ease and placed under the over-shot, and the strap taken through the floor and attached to the machine. In this particular these machines have a great advantage over all others.

His work will be done in the very best manner; and his castings cannot be surpassed by any in point of durability. Being a practical Machinist, he flatters himself that nothing will be wanting on his part to render general satisfaction to all those who may see fit to give him a call. His shop is in Carlisle street, a few doors north of Mr. M'Clellan's Hotel.

Jayne's Expectorant! Philadelphia, August 16th, 1838. Mr. ATKINSON-Dear Sir: A few weeks ago I noticed in your paper, an account of the surprising effects of Juyne's Carminative, in restoring a great number of passengers on board a Mississippi steamboat, to perfect health who were affected with Bowel Complaint. I was glad to see you notice it so kindly; you may rest assured it deserves the praise bestowed upon it. The bonofit I have received from this medicine, more especially his Expectorant, induces me to state my case to you, for the benefit of those who are afflicted in the same way. It has been my misfortune, sir, to labor under a cough and asthmatical op-pression, for more than half a century. When a soldier in the American camp, in 1778, I, with many others, (owing to great exposure,) had a violent attack of disease of the Lungs, by which I was disabled from duty for a long time. Since that period until recently, I have never been free from a violent Cough and difficulty of breathing. Year after year I have expectorated over a gill a day; often much more, and sometimes mixed with blood. For months together, night after night, I have had to sit or be belstered up to obtain my breath. The weakness and debility caused by such constant expectoration, frequently brought me to a state bordering on death. It has been a matter of astonishment to my family and

friends that I am here to write this to you. I have had skilful physicians to attend me, and every thing done that was thought likely to give me relief, without any beneficial effect. Last winter I had another severe attack of Inflamation of the Lungs, which I fully expected would be the last. I then considered my case as past the aid of medicine, when I was persuaded to call on Doctor Jayne. With the assistance of Divine Providence, through him, I was once more raised from my bed, but the coughing and wheezing wearied me day and night. He advised me to use his Expectorant. 1 did so, with a strong hope that, as it had cured many of my acquaintances of various discusses of the Lungs, it might at least mitigate my sufferings. Need I say how gratified I folt? It has EFFECTUALLY CURED Me. As soon as I commenced taking it, I found it reach. ed my case, and I began to breathe with more freedom. My expectoration became more easy, and my cough entirely left me. I now feel as well as ever I did in my life, and am better than I have been for the last SIXTY YEARS. Last summer I spit a great deal of blood; now, thank God, I am perfectly cured Now, Sir, after suffering so long, and finding at last such signal relief from Juyne's Expectorant, I feel anxious to infor.n iny fellow citizens where relief may be had. If

you think this worthy a place in your paper you will oblige me by noticing it.
