

[CONCLUDED FROM 1ST PAGE.]  
cause they are so directed. Such a habit is often retained through life. Many think and act just as others do, without investigating for themselves. This we should ever guard against.  
Again—We should endeavor by questioning and illustrations, not only to fix all facts in the mind, but to cause those facts to be digested, as the food is in the stomach, going out so as to form the mind itself.  
A recitation should be something more than a mere formal recital of what has been learned in the book. The truths of every lesson learned, should by some means be impressed on the mind so as never to be forgotten.  
This we can many times accomplish by means of simple illustrations and suitable apparatus.  
Again—We should excite wholesome emulation in our schools. Nothing will operate more effectively upon the minds of some pupils, than a proper desire to excel. They should be excited by a noble ambition. This depends almost wholly on the teacher. If he manifests a desire for them to excel, and an interest in their studies, the school will soon be moved by the same spirit.  
To effect all this, we should have some system or plan to work upon. Many, especially at our common schools, obtain all the education they ever possess, without order or system, studying whatever they may happen to find, or whatever seems most convenient at the time. As well might the carpenter attempt to construct a building without order or arrangement. It is certainly the duty to arrange and assign the branches each scholar should study, and then he should adopt some plan of teaching, and never fail to carry it out.  
We can see many difficulties to overcome before we can accomplish this. The great dissimilarity of text-books, prevents our classifying scholars as we deem best for them. Irregular attendance of scholars, and far more than all, the short time we have charge of our school. We can, in one term get a school well arranged—each scholar pursuing what seems best adapted to his capacity, when we must resign our place to be filled by another, who, perhaps will undo what we have done, or teach upon entirely a different plan, thus at once destroying the effect of our labors, and preventing any lasting benefit to the scholars. This constant change of teachers we cannot prevent, but can we not at our Institutes and Associations adopt similar plans of teaching, so that if changes are made, the system we adopt may be continued?  
We may conclude then that the great work of elevating the common schools to the intellectual rank they should reach, rests with us, the teachers. We alone can prevent the farther extension of the evils resulting from the superficial education of the masses of our people.  
The great exertions that are being made by our Oo, Supt. and other literary men will not effect this. It is our duty to adopt, and put in practice, measures devised for improvement in teaching. All that others can do will not make those in our schools thorough, thinking scholars. Is not the object to be attained worthy to incite us to constant, unceasing exertions? Let us then become thorough teachers, faithfully instilling the truths of every lesson into the minds of our pupils. Let us rouse up and bring into action all our faculties. We must teach them to think, to think for themselves. Ours is not an easy quiet task. O, no! We must work—work energetically and constantly. We must awaken an interest in all we teach, rouse the ambition, and show the scholar that he too has something to do. The work is great, but are we not able to accomplish it? Let us commence now, and not cease our endeavors till the common schools rank first with the literary institutions of our country, and, methinks, we shall receive the gratitude of all.  
Shall we not try?  
Rev. C. M. Blake then delivered an able lecture on the subject of History. Motioned to tender a vote of thanks to Rev. Mr. Blake, for his instructive and interesting address and also to the essays, and that a copy of each be requested for publication. Carried.  
The following Res. was offered. Resolved that the members of the Association do most cordially thank the inhabitants of Louisville and vicinity for the hospitality they have shown during the meeting of the Association. Unanimously adopted.  
Motioned to adjourn, when we adjourn, to meet at Oswayo Village at 10 A. M. on the last Thursday of May next, to hold sessions as follows, viz: Thursday, 10 o'clock, A. M., P. M. and evening, and Friday 10 A. M. to hold the closing session. Carried.  
The President then appointed J. W. Bird, M. O. Crosby and O. P. Rooks to deliver Orations; and E. Cordelia Hydon, Helen Raymond and Elmira Parish to read essays at the next meeting.  
The choir sang a very appropriate piece. Prayer by the Rev. Mr. Blake.  
On motion adjourned.  
J. M. SPAFFORD, Pres't.  
J. W. BIRD, Sec'y.

### Selected Miscellany.

#### ANNIE LAURIE.

"If you want to hear Annie Laurie sung, come to my house to-night," said a man to his friend. "We have a love-lorn fellow in the village, who was sadly wrecked by the refusal of a girl that he had been paying attention to for a year or more. It is seldom he will ever attempt the song, but when he does, I tell you he draws tears from eyes unused to weeping."  
A small select company had assembled in a pleasant parlor, and were gladly chatting and laughing when a tall young man entered, whose peculiar face and air instantly arrested attention. He was very pale, with that clear, vivid complexion which dark haired consumptives so often have. His locks were black as jet, and hung profusely upon a square white collar. His eyes were very large and spiritual, and his brow such an one as a poet should have. But for a certain wandering look, a casual observer would have pronounced him a man of uncommon intellectual powers. The words "poor fellow," and "how sad he looks," went the rounds, as he came forward, howed to the company, and took his seat. One or two thoughtful girls laughed as they whispered to him was "love cracked"—but the rest of the company treated him with respectful deference.  
It was late in the evening when the singing was proposed, and to ask him to sing "Annie Laurie" was a task of uncommon delicacy. One song after another was sung, and at last that one was named. At its mention the young man grew deadly pale, but did not speak; he seemed instantly to be lost in a reverie.  
"The name of the girl who treated him so badly was Annie," said a lady whispering to a new guest—"but oh! I wish he would sing it; nobody else can do it justice."  
"No one dare sing Annie Laurie before you Charles," said an elderly lady; "would it be too much for me to ask you to favor the company with it?" she added, timidly.  
He did not reply for a moment—his lips quivered a little, and then looking up as if he saw a spiritual presence, he began. Every sound was hushed—and it seemed as if his voice were the voice of an angel. The tones vibrated through nerve, and pulse, and heart, and made one shiver with the pathos of his feeling; never was heard melody in a human voice like that—so plaintive so tender and earnest!  
He sat with his head thrown back, his eyes half closed—the locks of dark hair glistening against his pale temples, his hands lightly folded before him; and as he sang—  
"And 'twas there that Annie Laurie  
Gave me her promise true"  
It seemed as if he shook from head to foot with emotion. Many a lip trembled—and there was no jesting, no laughing; but instead, tears in more than one eye.  
And on he sang, and on, holding every one in wrapt attention, till he came to the last verse—  
"Like dew on the gowan lying  
Is the fall of her fairy feet—  
And like winds in summer sighing  
Her voice is low and sweet;  
And she's a world to me—  
He paused a moment before he added—  
"And for bonnie Annie Laurie  
I'll lay me down and die."  
There was a long and solemn silence. The black locks seemed to grow blacker; and white temples whiter—almost imperceptibly, the head kept falling back—the eyes were close shut. One glanced at another—all seemed awe struck—till the same person who had urged him to sing, laid her hand gently on his shoulder, saying:  
"Charles, Charles!"  
Then came a hush—a thrill of horror crept through every frame—the poor tried heart had ceased to beat—the love-betrayer, was dead.—*Oliver Branch.*  
A BEAUTIFUL INCIDENT.—A naval officer being at sea on a dreadful storm, his lady was sitting in the cabin near him and filled with alarm for the safety of the vessel, was so surprised at his composure and serenity, that she cried out:  
"My dear, are you not afraid? How is it possible you can be so calm in such a dreadful storm?"  
He rose from his chair, lashed to the deck, supporting himself by a pillar of the bed place, drew his sword, and pointing to the breast of his wife, exclaimed:  
"Are you not afraid?"  
She instantly answered "No."  
"Why?" said the officer,  
"Because," rejoined the lady, "I know that this sword is in the hands of my husband, and he loves me too well to hurt me."  
"Then," said he, "remember, I know in whom I believe, and that he holds the winds in His fists, and the water in the hollow of His hands."

#### THE TOWANANDA INDIANS of New York have concluded a treaty with the Federal Government, by which, for a consideration, they have relinquished to the United States all the lands in Kansas to which they are entitled, under the treaties of 1833 and 1842, amounting to 320,000 acres per soul, and making about 20,000 acres.

#### HOWARD ASSOCIATION, PHILADELPHIA.

A Benevolent Institution, established by special endorsement for the relief of the sick and distressed, afflicted with Virulent and Epidemic diseases.

#### TO ALL persons afflicted with Sexual Diseases, such as SPERMATORRHOEA, SEMINAL WEAKNESS, IMPOTENCE, GONORRHOEA, GLEET, SYPHILIS, the Vice of ONANISM, or SELF ABUSE, &c., &c.

The HOWARD ASSOCIATION, in view of the awful destruction of human life, caused by Sexual diseases, and the deceptions practiced upon the unfortunate victims of such diseases by Quacks, several years ago directed their Consulting Surgeon, as a CHARITABLE ACT worthy of their name, to open a Dispensary for the treatment of this class of diseases, in all their forms, and to give MEDICAL ADVICE GRATIS, to all who apply by letter, with a description of their condition, (Age, occupation, habits of life, &c.) and in cases of extreme poverty, to FURNISH MEDICINES FREE OF CHARGE. It is needless to add that the Association commands the highest medical skill of the age, and will furnish the most approved modern treatment.

The Directors, on a review of the past, feel assured that their labors in this sphere of benevolent effort, have been of great benefit to the afflicted, especially to the young, and they have resolved to devote themselves, with renewed zeal, to this very important but much despised cause.

Just Published by the Association, a Report on Spermatorrhoea, or Seminal Weakness, the Vice of Onanism, Masturbation or Self Abuse, and other Diseases of the Sexual Organs, by the Consulting Surgeon, which will be sent by mail, (in a sealed envelope,) FREE OF CHARGE, on receipt of TWO STAMPS for postage.

Address, for Report or treatment, Dr. GEORGE R. CALLIQUEN, Consulting Surgeon, Howard Association, No. 2 South Ninth Street, Philadelphia, Pa.

By order of the Directors,  
RZA D. HEARTWELL, President,  
GEO. FAIRCHILD, Secretary. (0:34-1y)

#### IMPARTANT DISCOVERY.

#### CONSUMPTION

AND ALL DISEASES OF THE LUNGS AND THROAT ARE POSITIVELY CURABLE BY INHALATION, WHICH conveys the remedies to the cavities in the lungs through the air passages, and coming in direct contact with the disease, neutralizes the tubercular matter, allays the cough, causes a free and easy expectoration, heats the lungs, purifies the blood, imparts renewed vitality to the nervous system, giving that tone and energy so indispensable for the restoration of health. To be able to inhale, is to me a source of unalloyed pleasure. It is as much under the control of medical treatment as any other formidable disease; ninety out of every hundred cases can be cured in the first stages, and fifty per cent. in the second; but in the third stage it is impossible to save more than five per cent. For the Lungs are so cut up by the disease as to bid defiance to medical skill. Even, however, in the last stages, Inhalation affords relief to the suffering attendant, this fearful scourge, which annually destroys ninety-five thousand persons in the United States alone; and a correct calculation shows that of the present population of the earth, eighty millions are destined to fill the Consumptive's graves.

Truly the quiver of death has no arrow so fatal as Consumption. In all ages it has been the great enemy of life, for it spares neither age nor sex, but sweeps off alike the brave and the feeble, the great and the gifted. By the help of that Supreme Being from whom cometh every good and perfect gift, I am enabled to offer to the afflicted a permanent and speedy cure in Consumption. The first cause of tubercles is from impure blood, and the immediate effect produced by their deposition in the lungs is to prevent the free admission of air into the air cells, which causes a weakened vitality through the entire system. Then surely it is most rational to expect great benefit from medicines entering the cavities of the lungs than from those administered through the stomach; the patient will always find the lungs free and the breathing easy, after inhaling remedies. Thus, Inhalation is a local remedy, nevertheless it acts constitutionally, and with more power and certainty than remedies administered by the stomach. To prove the powerful and direct influence of this mode of administration, chloroform inhaled will entirely destroy sensibility by means of paralyzing the entire nervous system, so that a limb may be amputated without the slightest pain; Inhaling the ordinary burning gas will destroy life in a few hours. The inhalation of ammonia will rouse the system when fainting or apparently dead. The odor of many of the medicines is perceptible in the skin a few minutes after being inhaled, and may be immediately detected in the blood. A convincing proof of the constitutional effects of inhalation, is the fact that sickness is always produced by breathing foul air; is not the positive evidence that proper remedies, carefully prepared and judiciously administered through the lungs should produce the happiest results? During eighteen years practice, many thousands suffering from diseases of the lungs and throat, have been under my care, and I have effected many remarkable cures, even after the sufferers had been pronounced in the last stages, which fully satisfies me that consumption is no longer a fatal disease. My treatment of Consumption is original, and founded on long experience and a thorough investigation. My perfect acquaintance with the nature of tubercles, &c., enables me to distinguish, readily, the various forms of disease that simulate consumption, and apply the proper remedies, rarely being mistaken even in a single case. This familiarity, in connection with certain pathological and microscopic discoveries, enables me to relieve the lungs from the effects of contracted chests, to enlarge the chest, purify the blood, impart to the entire system, giving energy and tone to the nervous system.

Medicines with full directions sent to any part of the United States and Canada by patients communicating their symptoms by letter. But the cure would be more certain if the patient should pay me a visit, which would give me an opportunity to examine the lungs and enable me to prescribe with much greater certainty, and then the cure could be effected without my seeing the patient again.

G. W. GRAHAM, M. D.,  
Office 1131 Filbert Street, (Old No. 109) below Twelfth, PHILADELPHIA, PA.

#### AYER'S CHERRY PECTORAL

For the rapid Cure of COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA, AND CONSUMPTION.

TO CURE A COLD WITH HEADACHE AND SORROWNESS OF THE BODY. Take the Cherry Pectoral on going to bed and wrap up warm. Repeat during the night.  
FOR A COLD AND COUGH, take in the morning, noon and evening, according to the directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, undisturbed sleep, and consequent refreshing rest. Great relief from suffering and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effects in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

TO SINGERS AND PUBLIC SPEAKERS this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

ASTHMA is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. The Cherry Pectoral will cure them if they can be cured. BRONCHITIS or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

FOR CROUP. Give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subsides the disease. If taken in season, it will not fail to cure.

WHOOPING COUGH may be broken up and soon cured by the use of Cherry Pectoral. THE INFLUENZA is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral were suffering from the disease.

FOR CONSUMPTION in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed directions on the bottle. If judiciously used, and the patient is carefully nursed meantime, it will seldom fail to subdue the disease.

For settled CONSUMPTION of the Lungs, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords relief, and not infrequently cures patients that were considered hopeless. There are many thousands scattered all over the country, who feel and publicly proclaim that they owe their lives and present health to the Cherry Pectoral.

Many years of trial, instead of impairing the public confidence in this medicine, has won for it an appreciation and notoriety far exceeding the most sanguine expectations of its friends. Nothing but its intrinsic virtues and the unmistakable benefit conferred on thousands of sufferers could originate and maintain the reputation it enjoys. While many inferior remedies thrust upon the community, have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted that can never forget, and produced cures too numerous and too remarkable to be forgotten.

While it is fraud upon the public to pretend that any one medicine will infallibly cure all still there is abundant proof that the Cherry Pectoral does not cure as a general thing, but almost invariably cures the maladies for which it is employed.

As time makes these facts wider and better known, this medicine has gradually become the best reliance of the afflicted, from the log-cabin of the American Peasant, to the palaces of European Kings.

The CHERRY PECTORAL is manufactured by a practical Chemist, and every ounce of it under his own eye, with invariable accuracy and care. It is sealed and protected by law from counterfeits, consequently can be relied on as genuine without adulteration.

Prepared and sold by JAMES G. AYER, Practical and Analytical Chemist, Lowell, Mass.

Sold by SEITH & JONES and D. W. SPENCER, Goddardport, and by country merchants and druggists everywhere. 10:3-4m.

#### MILLPORT HEAD-QUARTERS.

THIS subscribers take this method of reforming their friends that they are in respect of, and are now opening, a choice and desirable stock of

#### STAPLE AND FANCY DRY GOODS,

to which they invite the attention of all who desire to make purchases. Our stock is large has been selected with great care, and is particularly adapted to the wants of this section of our country. Our stock of Dry Goods consists of

- DRESS GOODS, TRIMMINGS, RIBBONS, EMBROIDERIES, PARASOLS
- CLOTHS, CASSIMERES
- VESTINGS, DO-
- MESTICS,

- LINENS, PRINTS,
- HOSIERY, SHAWLS,

and a variety of other articles, too numerous to mention. We have also a complete assortment of

#### GROCERIES, HARDWARE AND CROCKERY;

all of which will be sold uncommonly cheap for ready pay, and for approved credit on as reasonable terms as any other establishment. MANN ANCIOLS.

Millport, Aug. 11, 1856.—0:13-1y.

#### THE WELCOME VISITOR

The Cheapest and Handsomest Periodical in the world.

#### Circulation 100,000.

THIS ELEGANT AND FASCINATING LITERARY AND FAMILY MONTHLY MAGAZINE closes its first volume in June next. During the few brief months of its existence it has attained a popularity unequalled in the annals of the Press.

The publishers have offered liberal Premiums for choice literary efforts, the Stories, Romances, Essays, Poetry, and other sparkling and interesting reading was commenced in January last, and are being still published in the "Visitor."

The New Volume will be commenced in July 1857, greatly improved and enlarged. Each number will contain thirty-two extra large sized royal octavo pages, making a magnificent volume of nearly 400 pages for the year—or presenting an amount of the choicest reading on all subjects, equal to what would cost in the book stores at least fifty cents, payable invariably in advance.

Some of the most popular and brilliant male and female contributors are regular contributors and the publishers will spare no pains or expense to render the "Welcome Visitor" every way acceptable to a refined and intelligent community.

The publication is adapted to all classes of people—the young and the old—and wherever seen and perused, meets with universal approval.

Now is the time to subscribe to the New Volume.

\*The back numbers may be had (to complete sets) for 2 cents each, or the whole series of 12 numbers for TWENTY-FIVE CENTS. Liberal inducements to Clubs and Corresponders.

Remember, our terms are Fifty cents for one year, for a single copy, or three copies will be sent under one cover or address for One Dollar.

Address,  
COSDEN & COMPANY,  
Publishers, No. 38 North Seventh Street, (up stairs,) Philadelphia. 10:1-ly

#### SUFFER NOT!

When a CURE is guaranteed IN ALL STAGES OF SECRET DISEASES, Self-Abuse, Nervous Debility, Strictures, Gleet, Gravel, Diabetes, Diseases of the Kidneys and Bladder, Mercurial Rheumatism, Scrofula, Pains in the Bones and Ankles, Diseases of the Lungs, Throat, Nose and Ears, Etc., Etc., the Body or Limbs, Cancer, Dropsy, Epilepsy, St. Vitus's Dance, and all diseases arising from a derangement of the Sexual Organs.

SUCH as Nervous Trembling, Loss of Memory, Loss of Power, General Weakness, Dimness of Vision with peculiar spots appearing before the eyes, Loss of Sight, Wakefulness, Dyspepsia, Liver Disease, Eruptions upon the face, Pain in the back and head, Female irregularities and all improper discharges from both sexes. It matters not from what cause the disease originated, however long standing or obstinate the case, recovery is certain, and in a shorter time than a permanent cure can be effected by any other treatment, even after the disease has baffled the skill of eminent physicians and recruited all their means of cure. (The medicines are pleasant without odor, causing no sickness and free from mercury or bismuth. During twenty years of practice, I have cured of the jaws of Death many thousands who, in the last stages of the above mentioned diseases had been given up to die by their physicians, which warrants me in promising to the afflicted, who may place themselves under my care, a perfect and most speedy cure. Secret Diseases are the greatest enemies to health; they are the first cause of Consumption, Scrofula, and many other diseases, and should be a terror to the human family. As a permanent cure is scarcely ever effected, a majority of the cases falling into the hands of incompetent persons, who not only fail to cure the disease; but ruin the constitution, filling the system with mercury, which, with the disease, hastens the sufferer into a rapid Consumption.)

But should the disease be cured by treatment not cause death speedily, and the victim marries, the disease is entailed upon the children, who are born with feeble constitutions, and the current of life corrupted by a virus which betrays itself in Scrofula, Tetters, Ulcers, Eruptions on other affections of the skin, Eyes, Throat and Lungs, entailing upon them a brief existence of suffering and consigning them to an early grave.

SELF ABUSE is another formidable enemy to health, for nothing else in the world causes so destructive a drain upon the system, as its thousands of victims through the years of suffering down to an untimely grave. It destroys the Nervous system, rapidly wastes away the energies of life, causes mental derangement, prevents the proper development of the system, disqualifies for marriage, society, business, and all earthly happiness, and leaves the sufferer wracked in body and mind, and a prey to consumption and a train of evils more to be dreaded than death itself. With the fullest confidence I assure the unfortunate victims of Self-Abuse that a permanent and speedy cure can be effected, and with the abandonment of ruinous practices my patients can be restored to robust, vigorous health.

The afflicted are cautioned against the use of Patent Medicines, for there are so many ingenious snarcs in the columns of the public prints to catch and rob the unwary sufferer that millions have their constitutions ruined by the vile compounds of quack doctors, or the equally poisonous nostrums so called "Patent Medicines." I have carefully analyzed many of the so-called Patent Medicines and find that nearly all of them contain Corrosive Sublimates, which is one of the strongest preparations of mercury and a deadly poison, which instead of curing the disease disfigures the system for life.

Three-fourths of the patent nostrums are in use are put up by unprincipled and ignorant persons, who do not understand even the alphabet of the materia medica, and are equally as destitute of any knowledge of the human system, having no object other than to get the public to make money regardless of consequences.

Irregularities and all diseases of males and females treated on principles established by twenty years of practice, and sanctioned by thousands of the most remarkable cures. We riches with full directions sent to any part of the United States or Canada, by letter, and communicating their symptoms by letter. Business correspondence strictly confidential.

Address,  
J. S. SUMMERVILLE, M. D.,  
Office No. 1131 Filbert St., (Old No. 109.)  
PHILADELPHIA. 10:6-ly.

#### NEW GOODS.

Low Prices and Ready Pay, AT SHARON CENTER.

THE SUBSCRIBERS are offering for sale an entirely new stock, consisting of

- DRY GOODS, GROCERIES, HARDWARE, CROCKERY, GLASS WARE, BOOTS & SHOES, HATS & CAPS, UMBRELLAS, PARASOLS, WINDOW SHADES, WALL PAPER, READY MADE CLOTHING, YANKEE NOTIONS, &c., &c.
