Period of Human Life.

ol washing-a right good scrubbing- To the Editors of the Daily Advertiser : for it is not young and smooth, and must Donati's Comet will, in a few days, ap have harbord no little of the flying dirt pear to increase rapidly in size and bril-of the locomotive. If the President had liancy. It will be nearest the earth on

M. Flourens the distinguished French not mashed his face on the ground that the Sth of October, at which time its physiologist, has recently published a book the public basia was por the thing for a brilliancy will be nearly three times as in which he announces that the normal public man, what would the Democracy great as on the 23d of September, and its period of the life of man is one hundred say? Would they make it an argument distance from us about fifty-two millions

period of the life of man is one hundred grars. The grounds on which he comes to this acy philosophic conclusion may be builty stated. It is we believe, a fact in matural history, that the longth of each animal's life is in exact proportion to the burilty stated he is in exact proportion to the animal's life is in exact proportion to the in the wash-basin aforesaid he the con-washing in the wash-basin aforesaid he the con-basin aforesaid he is in exact proportion to the in the wash-basin aforesaid he the con-basin aforesaid he the conperiod he is in growing. Buffon was in the wash basin aforesaid be the con-bright star Arcturus, October 5th, and nearest the carth's orbit on the 20th. Some confusion seems to prevail in re-

pensed, was not known. At. Biourens, "that and some has the worke-tor-wearing. This is owing to the considerable has ascertained that period, and thereon wehicle, with whom he role down to northern declination of the Comet, with lies his present theory. "It cousists," Wheatland, no one along the road sus-la right ascension differing but little from pays he, "in the union of the bones to the posting that it contained the President that of the sup. I mention this because cpiphyses. As long as the bones are not of the United States, the incumbent of united to their epiphyses, the animal the highest office in the world." Pro-grows: as soon as the bones are united to ligious! Where was the coach-and-siz, whether there are two comets now to be the eniphyses the animal animal discussion of the coach-and-siz,

years. "It is now fifteen years, since I growd of office seekers? Did he ever take commenced researches into the physio-logical law of the duration of life, both in man and in some of our domestic animals, and I have arrived at the result that the parmel duration of a single hour up to the tage of that lowly association with the country friend? normal duration of a man's life is one cen- Probably not; and herein may lie the untury. Yes, a century's life is what Prov- recognized cause for demogratic wonidence meant to give us." Applied to derment.

domestic animals, M. Flouren's theory has, he tells us, been proven correct ---"The union of the bones with the epiph- an American packet ship, "came suddenyses, takes place in the camel at eight ly aboard; and there was no American years of age, and he lives forty years; in Consul ready to do the official honors. the horse at five years, and he lives twen-ty-five years; in the ox at four years, and breathless aboard, and began to express he have from fitteen to the transform fitteen to express ty-five years; io the ox at four years, and he lives from fifteen to twenty years; in the dog at two years; and he lives from the dog at two years; and he lives from ten to twelve years; and in the lion at four years, and he lives twenty. As a pecessary consequence of the prolonga-tion of life to which M. Flourehs assures man he is entitled, he modifies very con-siderally his different ages. "I prolong the duration of infancy," says he "up to ten years because that it is from nine to ten that the second dentition is termina-ted. I prolong adolescence up to twenty. ted. I prolong adolescence up to twenty model, "How the devil should be cut it?" years, because it is at that age that the development of the bones ceases, and con-plushery of our common nature.—N. Y. sequently the increase of the body in

length. I prolong youth up to the age of forty, because it is only at that age that the increase of the body in bulk terminates. After forty, the body does not grow, properly speaking; the augmentation of its volume, which then takes place, is not a veritable organic development,

thirty years.

consequently, he proclaims that the nat-ural cutation of life is five times twenty big drum, the gong, and the vociferous Harvard ("Ilis Majesty," said a Havre merchant. describing the visit of Louis Phillippe to Fall and Winter

Tribude.

Rust in Oals-What is it!

Throughout the whole, Southwestern portion of the Union, the cat crop has suffered from a terrible blight, which, from its resemblance to the fungus substance that sometimes attacks wheat by that but a simple accumulation of fat. After are informed, rust in oats has hitherto the growth, or more properly speaking, been usknown. We have cover heard or terminated, nian enters into what I call tion of the kind, in any secthe period of invigoration-that is, when thus unusual opens a wide and interesting all our parts become more complete and firmer, our functions more assured, and minimized to the entomologist, as it invites investithe whole organism more perfect. This period lasts to sixty-five or seventy years, and then begins old age, which lasts for The cause of all this destruction of the The cause of all this destruction of the

But though M. Flourens thus length; oat crop is a living worm, too small to be But though M. Flourens thus length-plainly seen with the naked eye. A sin-ens man's days, he warns him, more than gic blade or leaf of the oat contains a hunonce, that the prolongation of them can dred of them. They lie encased in the only be obtained on one rigorous condi-tissues of the leaf or blade where they always occupied—of labor, of study, mod-deration, of sobriety in all things." To those who may be disposed to ask why it is that of men destined to live a hundred years, so few do so, M. Flourens answers triumphauly—"With cur manners, our possions, our terments, man does not die he kills himself!" And he speaks at great length, of Ceanaro, of Lessius, and menifons Parr and others, to show that by prudence, and above all, sobriety, life can easity be extended to a century or can easity be extended to a century or
