

Agricultural

We have original local articles in this department, believing that the publication of observations and experiments in regard to the Agricultural and Horticultural peculiarities of this county will mutually benefit our farmers. Try it, farmers of Potter.—Ed. JOURNAL.

Farmers, Study Nature.

Though the following article would be appropriate in any department of a new paper, we give it a place here, because we would have farmers adopt its suggestions in the pursuit of their business. They who draw most directly and largely upon the treasures of Nature, should best know her resources, and the manner of applying them to the wants of man. * * * We find this article in the Scientific American.—Ed. JOURNAL.

THE PLEASURES OF KNOWLEDGE.

"How charming is divine philosophy! Not harsh and crabbed, as dull fools suppose, but musical as Apollo's lute. And a perpetual feast of pictured sweets, Where no crude surfeit reigns."—So young Milton two centuries ago, and long before that date Plato had announced that "the world is God's epistle to mankind." It is the grand book in which all may read, and whose pages are so full of varied interest and genial knowledge that the being who, having the power, neglects to study it, surely may be written down an ass, for he deprives himself of an enjoyment such as no other pursuit can give.

We are sometimes inclined to be vexed with our race when we find them all toiling after every vain fancy, some bent upon one ambition, some another, and but a minority digging in the deep mine of nature for the grandest of all possessions—Truth. Granted that its gold is not yellow nor its silver white, for its treasures have not the color of material wealth, but they are as glowing and beautiful as the sparkle of the diamond and as enduring as the hills. "Sainces, clothes not her virtues in purple and fine linen, but dresses them in lovely flowers or in iridescent shells, and gives as her reward a contented mind and a pure soul." The poetry of science sometimes flashes in the oration of a professor, or in the pages of a book, but her truest epics are written upon all materiality, which proclaims that in all things there is a law which, when known and applied, shall make man happier, better and more truly human.

By the investigation of the laws which govern the objects that are all around us, the motions of the planets, the relations of life and health, the destiny of man, and the glory of the deity, are better understood; and the lighting of a cottage, the building of a palace, or the cooking of a dinner are better performed. We can never be in any position in which knowledge is not of value to us, and we can never prophesy the moment at which we may most require it. Indeed many of us only know that there is more to be known than occurs to us in the daily round of business life, by the discovery that something we do not know is calculated to make us richer or give us more ease.—"But," exclaims many a petulant person, "how shall I study without an instructor? or how investigate without apparatus? Foolish notions! the best workman always uses the simplest tools. Have you eyes, ears, nose and hands? Then you are provided with apparatus, and inquiry is the tablet on which to write down your impressions. Each one of us is better furnished than a college laboratory or a professor's lecture room, and all we have to do is to learn the use of our apparatus; and then there is no pipe in the universe where man cannot find some object to invent, some study to pursue. Goldsmith found time to observe nature and record his thoughts, and in glowing language he tells us that "the blushing beauties of the rose, the modest blush of the violet, are not in the flowers themselves, but in the light which adorns them. Odor, softness, and beauty of figures are their own, but it is light alone that dresses them up in their robes, which shame the monarch's glory." As a concluding incentive to our readers to study for themselves, as well as to read books and scientific periodicals, we will give a quotation from a lecture by Prince Albert of England. "Man," observes this eminent sovereign, "is appreciable; a more complete fulfillment of that great and sacred mission which he has to perform in the world. His reason being created after the image of God, he has to use it to discover the laws by which the Almighty governs his creation, and, by making these laws his standard of action, to conquer nature to his use—himself being a divine instrument. Science discovers these laws of nature, and transformation; industry applies them to the raw material which the earth yields us in abundance, and which becomes valuable only by knowledge.

Oh! that all would study nature more and think of themselves less; then we should indeed be a people of kings, whose empire would be the world and whose subjects would be all created things!

To Make Butter in Five Minutes Without a Churn!
A correspondent of the Scientific American highly recommends the following recipe:—After straining the milk, set it away for about twelve hours, for the cream to rise. (Milk-dishes ought to have good strong handles to lift them by.) After standing as above, set the milk without disturbing it on the stove; let it remain there until you observe the coating of cream on the surface assume a

wrinkled appearance, but be careful it does not boil, as should this be the case the cream will mix with the milk and cannot again be collected. Now set it away till quite cold and then skim off the cream, mixed with as little milk as possible. When sufficient cream is collected proceed to make it into butter as follows:—Take a wooden bowl, or any suitable vessel, and having first scalded and then rinsed it with cold spring water, place the cream in it. Now let the operator hold his hand in water as hot as can be borne for a few seconds, then plunge it in cold water for about a minute, and at once commence to agitate the cream by a gentle circular motion. In five minutes, or less, the butter will have come, when, of course, it must be washed and salted according to taste; and our correspondent guarantees that no better butter can be made by the best churn ever invented.

To those who keep only one cow, this method of making butter will be found really valuable; while quite as large a quantity of butter is obtained as by the common mode, the skim-milk is much sweeter and palatable. In the summer season it will usually be found necessary to bring the cream out of the cellar (say a quarter of an hour before churning) to take the excessive chill off; in winter place the vessel containing the cream over another containing water to warm it; then continue to agitate the cream until the chills has departed.

Before washing the butter, separate all the milk you possibly can, as the latter will be found excellent for tea-pakes. Butter made in this manner will be much firmer, and less oily in hot weather than when made in the ordinary way.

Miscellany.

WONDERFUL ESCAPE.—About 7 o'clock, last evening, a boy named J. McCarthy, about twelve years of age, went to a well, on Ohio street, near South street, to draw a bucket of water. While engaged in doing so, his feet slipped on the curbing, and he fell in. The well is twenty-eight feet in depth, and of the crowd that rushes to the spot there was not one but thought the poor lad was instantly killed. The tears and sympathies of the crowd were, however, brought to a terminus by a shrill voice exclaiming: "Come—ain't you going to help a fellow up? What are you standing there all day for?" This produced another movement in the crowd, a rope being procured, the young man was speedily drawn to the surface. On arriving in the sunlight he was very indignant, and wanted to know "how long they wanted to keep a fellow in a well!" then, taking his bucket again he filled it with water, and walked away as unconcerned as he was perfectly uninjured.—Buffalo Republic.

MR. VERNON.—Mr. Charles S. Price, of Alexandria, has gone down to Mount Vernon for the purpose of making some repairs needed by the premises. These repairs are preliminary to the delivery of possession from John A. Washington, Esq., to the agent of the Ladies' Mount Vernon Association. The Alexandria Gazette says: "The carpenter's tools imported from England, by Gen. Washington, during his lifetime, have been preserved, and will, in all probability, be used now in making the contemplated repairs."

At a venue of the personal property of a Mr. Oaks, recently deceased, in Dauphin County, Pa., a few days ago, a bag of flaxseed was offered for sale. One of the bidders put his hand into the bag to examine the seed, and hauled out a purse, which was found to contain gold and silver coin. The bag was then thoroughly overhauled, and over one thousand dollars in gold and silver coin were found therein. The treasure was then retained by the expropriators.

An ingenious Scotchman has trained a couple of mice to turn a small reel for twisting twine—the laborers run to ten miles a day, and reel from 100 to 120 threads. A half-penny's worth of oat meal last a mouse five weeks, and the clear annual profit on each animal per year, is computed at six shillings. This beats the "industrious flea."

The Hon. Israel Washburn of Maine gave the following felicitous sentiment at the late Bangor celebration on the Fourth:—"Our Country—Our country, right or wrong; when right, to be kept right; when wrong to be put right."

Auditor's Notice.
NOTICE is hereby given that the Auditor appointed by the Court to make distribution of the proceeds of the sale of real estate in the case of Warren Carter vs. W. T. Jones, No. 174, June Term, 1859, and in the case of Paul & Taylor vs. W. T. Jones & A. F. Jones, of Sept. Term 1856, No. 144, will attend to the duties of his appointment at the Office of the Probate in Condsport, on Saturday, the 13th day of August, next, at one o'clock, P. M. All persons interested in the said distribution, will attend promptly at said time and place, fully prepared if possible to present and substantiate their claims without unnecessary adjournment or delay.
H. J. OLMSTED, Prothy.
Condsport, July 29, 1859.—48.

FARRIERY.
DR. W. HAWKINS, Veterinary Surgeon, would respectfully inform the inhabitants of Condsport and its vicinity, that he has located himself at the House of D. F. Glassmire, where he will be pleased to treat all cases incident to that noble animal, the Horse. His services put up in the latest and on the most approved principles. Castration skillfully performed.
Refer to S. M. Mills, D. F. Glassmire and N. J. Mills.

SOMETHING NEW.—B. T. BABBITT'S BEST

MEDICINAL SALERATUS.
Is manufactured from common salt, and is prepared entirely different from other Saleratus. All the deleterious matter extracted in such a manner as to produce Bread, Biscuit, and all kinds of Cake, without containing a particle of Saleratus when the Bread or Cake is baked; thereby producing wholesome results.
70 Every particle of Saleratus is turned to gas and passes through the Bread or Biscuit while baking, consequently leaving them free from common Salt, Water and Flour. You will readily perceive by the taste of this Saleratus that it is entirely different from other Saleratus.
68 It is packed in one pound papers, each wrapper branded "B. T. Babbitt's Best Medicinal Saleratus;" also, picture, twisted loaf of bread, with a glass of effervescing water on the top. When you purchase one paper you should preserve the wrapper, and be particular to get the next exactly like the first—brand as above.
68 Full directions for making Bread with this Saleratus and Sour Milk or Cream Tartar, will accompany each package; also, directions for making all kinds of Pastry; also, for making Soda Water and Spicelitz Powders.
70 MAKE YOUR OWN SOAP, WITH B. T. BABBITT'S PURE CONCENTRATED POTASH, warranted double the strength of ordinary Potash; put up in cans—1 lb., 2 lbs., 3 lbs., 6 lbs., and 12 lbs.—with full directions for making Hard and Soft Soap. Consumers will find this the cheapest Polish in market.
70 Manufactured and for sale by B. T. BABBITT, Nos. 68 and 70 Washington-street, New York, and No. 38 India-street, Boston. [11-44-18-]

WHO SELLS THE AMERICAN SMOKER?

Special Notice to the Ladies.
SUMMER FASHIONS.
MRS. GRIDLEY tenders her thanks to the citizens of Potter and adjoining counties, for their generous patronage. She would say to the public; that she has on hand a splendid assortment of Millinery Goods, which she will sell retail or wholesale at the lowest rates, especially in those in the trade; at a small advance from N. Y. prices. All orders promptly attended to.
T. B. GRIDLEY will deliver Bonnets to any place ordered. Bleaching and Repairing done up in the latest style, with taste. The large quantity of work to be "done over," will be delivered at the earliest moment. Ladies please call or send in your orders. Shop located 2 1/2 miles west of Lewisville.
E. H. N. GRIDLEY.
Ulysses, May 3, 1859.—38.

HO, YE HUNGRY!!
W. M. H. KILGORE would inform the citizens of Condsport and vicinity that he has established a
MEAT MARKET
in the Basement of J. B. Smith's Store, where he will supply the public with Fresh Beef and Mutton every Tuesday and Friday morning, and Fresh Venison whenever practicable. By low prices, promptness and regularity he hopes to deserve and receive a liberal patronage.
Condsport, June 27, 1859.—45-1mo.

Auditor's Notice.
NOTICE is hereby given that the Auditor appointed by the Court to make distribution of the proceeds of the sale of real estate in the case of Jacob Reed vs. N. L. Dike, of June Term, 1857, No. 219, will attend to the duties of his appointment at the Office of the Probate in Condsport, on Monday, the 15th day of August, next, at one o'clock, P. M. Those interested will attend if they think proper.
H. J. OLMSTED, Prothy.
Condsport, July 20, 1859.—48.

PLASTER for sale by P. A. STEBBINS.

The American Trade Comp'y

What they manufacture.
THE AMERICAN SMOKER.

Consisting of a great variety of antique and beautiful patterns of Cigar Tubes; also, several varieties of Pipe Tubes. The peculiarity about these articles is that each one is arranged so as to receive a damp sponge, through which the smoke of the burning cigar has to pass on its way to the mouth. This damp sponge not only cools the smoke, but extracts from it the nicotine oil; the poisonous property of the tobacco, which renders the breath less offensive. Smokers will find the use of these Tubes a luxury never before attained except by using the Turkish water-jar. Their use will also greatly promote the health of the habitual smoker and preserve the sweetness of the breath.

THE AMERICAN CARPET HOOK.
Is a little contrivance for putting down carpets without tacks. This is a new article, which has never before been upon the market. But it possesses the merit of enabling a person to put down or take up a carpet of the largest size in general use in fifteen minutes, without any injury to the floor or carpet. It is very cheap—cheaper in the long run than tacks—and the great facility with which even a servant can take up and put down carpets, without the possibility of a mistake, renders it invaluable to the housekeeper.

THE AMERICAN PEN HOLDER & WIPER.
Is a neat invention for holding a wet sponge, in which the pen is thrust, always coming out clean and ready for use. A very convenient article for the Counting-House, Desk and Library Table. 11-29

The American Trade Company.

was organized November 8, 1857, with a Capital of one hundred thousand dollars. This Company was formed with a view of using up inventors of small articles of general utility, who are unable to make independent arrangements for introducing their inventions, by an equitable arrangement with them for their rights by purchase out and out, or by a tariff on the articles manufactured and sold. The inventive genius of this country has long called for an institution of this kind. The American mind is so active, that thousands of things are invented, many of which would be really useful to the community, but which are never introduced, because the inventors of them have no means to carry them out. The capital of this Company will be devoted to the development of really useful inventions. The Company have a Committee on Patents, whose duty it is to pass upon all applications, and from their large experience in such matters judgments have a security that their inventions will not be misjudged; and the high character of the parties composing that Committee is a sufficient guaranty that plans and specifications may be submitted before patents are applied for, without any risk of advantage being taken of this circumstance, and when desired to do so, the Company will take out patents for others, securing for the inventor all of his invention that is patentable. This Company respectfully invite inventors to submit to them their plans; and it will be furthering the objects of the Company if its officers and agents can be of any service to them.
Any one of the following modes is acceptable to this Company:
First: To manufacture any articles for which their machinery is adapted by contract; the inventors receiving the articles and paying for the same on delivery.
Second: They buy any patent which is approved by their committee.
Third: They will manufacture and sell any article which they choose to adopt, giving to the inventor such a proportion of the profits as may be agreed upon.
The extensive building, No. 22 and 24 Frankfort-st., New York, being about 60 feet front by over 100 feet deep, and 7 stories high above the sidewalk, is owned by the President of the Company, and is occupied in part by all the machinery, warehouse and offices of the Company, where all its business and sales are transacted.

THE NE PLUS ULTRA OF SWING MACHINES.
THE PATENT LEVER SEWING MACHINE, MANUFACTURED BY THE GLOBE MANUFACTURING COMPANY, 339 Broadway, New York.
May be truly regarded as the "ne plus ultra" of sewing machines, and all who are wishing to find a Machine which is capable of doing any kind of sewing for Tailors and Housewives, with a satisfaction heretofore unknown, should lose no time in ordering one of the PATENT LEVER MACHINES, which are sold at a similar position towards other sewing Machines that a Patent Lever Watch (and everybody knows its value) occupies towards a Lapine or any other second rate watch.
This Machine makes the "Lock Stitch," which looks the same on both sides of the fabric, and cannot be ripped.
PRICE \$50.
In all respects equal to machines heretofore sold at a hundred dollars and upwards.
Specimens of sewing done by the PATENT LEVER MACHINE, will be forwarded to any part of the country, upon receipt of a postage stamp.
N. B. An energetic and reliable agent is wanted in every town and village of the United States and Canada to sell the above named machine. An advantageous arrangement will be made with the right kind of merchant who is willing to have the exclusive agency.
Address Globe Manufacturing Company, 339 Broadway, N. Y., 11-30

TAKE NOTICE!
If you want to get your Watch— as at Clocks put out and run— send them to D. J. DAYTON'S. You will find him on hand to do your work on short notice, and in a workmanlike manner, at No. 2 PHENIX BLOCK, opposite Parmer's Drug and Book Store. Jewelry neatly repaired, and work done on short notice, cheap for cash.
JOHN B. DAYTON, Wellsville, April 17, 1859. 40-6mo.

HOWARD ASSOCIATION.
PHILADELPHIA.
Renowned Institution, established by special endorsement for the relief of the sick and distressed, afflicted with Venereal and Epidemic diseases.
THE HOWARD ASSOCIATION, in view of the awful destruction of human life, caused by Sexual diseases, several years ago directed their Consulting Surgeon, to open a Dispensary for the treatment of this class of diseases, in all their forms, and to give MEDICAL ADVICE GRATIS, to all who apply by letter, with a description of their condition, (age, occupation, habits of life, &c.) and in cases of extreme poverty, to FURNISH MEDICINES FREE OF CHARGE.
The Directors of the Association, in their late Annual Report express the highest satisfaction with the success which has attended the labors of their Surgeons in the cure of Syphilis, Gonorrhoea, Seminal Weakness, Gleet, Gleet, Syphilis, the Vice of Onanism or Self-Abuse, Disease of the Kidneys and Bladder, &c.; and order a continuance of the same plan for the ensuing year.
An admirable Report on Spermatorrhoea, or Seminal Weakness, the Vice of Onanism, Masturbation or Self-Abuse, and other Diseases of the Sexual Organs, by the Consulting Surgeon, will be sent by mail, (in a sealed envelope) FREE OF CHARGE, on receipt of TWO STAMPS for postage.
Address for Report or treatment, Dr. J. SKILLIN HOUGHTON, Acting Surgeon, Howard Association, No. 2 South Ninth Street, Philadelphia, Pa. [11-24-19]

Scrofula, or King's Evil,

is a constitutional disease; a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which is not destroyed. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, squalid and filthy habits, the depressing vice, and, above all, by the venereal infection. What ever be its origin, it is hereditary in the constitution, descending from parents to children, into the third and fourth generation; indeed, it seems to be the rod of God, who says, "I will visit the iniquities of the fathers upon their children."
Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which renders the blood, depraves the energies of life, so that scrofulous constitutions can only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.
One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedies that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Eczema, Scald Head, St. Anthony's Fire, Ringworm, Roset, or Impetigo, Pimples, Pustules, Blemishes, Blains and Boils, Tonsils, Trichomania, and Salt Rheum, Scald Head, Ringworm, Rheumatism, Syphilis and Mercurial Diseases, Dropsy, Dyspepsia, Debility, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and renovate the blood, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC, are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its disordered action, and restoring its healthy vitality. As a consequence of these properties, the individual is relieved from pain or physical debility; is astonished to find his health or energy restored by a remedy as easy and simple and inviting.
Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is placed to furnish gratis my American Almanac, containing certificates of their cures and directions for their use in the following cases: Catarrhs, Heartburn, Headache arising from disordered Stomach, Nausea, Indigestion, Pain in and Morbid Stimulation of the Bowels, Flatulency, Loss of Appetite, Jaundice, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Croupy Patients in advance of Stages of the disease.
So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is so apparent to every observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted that can never forget, and secured cures too numerous and too remarkable to be forgotten.

MILLPORT HEAD-QUARTERS.

THE subscribers take this method of informing their friends that they are in receipt of, and are now opening, a choice and desirable stock of

STAPLE AND FANCY DRY GOODS,

to which they invite the attention of all who desire to make purchases. Our stock has been selected with great care, and is particularly adapted to the wants of the residents of our country. Our stock of Dry Goods consists of

DRESS GOODS, TRIMMINGS, RIBBONS, EMBROIDERIES, PARASOLS, DLOTHS, CASSIMERS, VESTINGS, DO-NESTINGS, SHIRTINGS, LINENS, PRINTS, HOSE, YARNS, SHAWLS, and a variety of other articles, too numerous to mention. We have also a complete assortment of

GROCERIES, HARDWARE AND CROCKERY.

all of which will be sold uncommonly cheap for ready pay, and on APPROVED ACCOUNT, on reasonable terms, as usual with our establishment. MANN & NICHOLS, Millport, Aug. 11, 1858.—24-19
