For the Potter Journal.

FRIEND CHASE—The sermon which has appeared at different times in the Journal is very acceptable, and highly appropriate. It is a fair specimen of New England preaching, and the excellent and amiable qualities which make a prudent wife are fully enunciated. The author, Solomon and St. Paul, are all agreed that her price is far above rubies. Our New England mothers and grand-mothers were of this stamp, notwithstanding the fact that their babes were so numerous, fully whipped. Our Grand-father, well kept the worth of such noble women, and the following lines from Thomas Davis's oration, delivered in Boston in the presence of my father, and probably grand-father, show the force of his sentiment against degradation. He said the woman, chosen to serve from the best stock of virtue, is the best of the Republic's strength and its least shame. And one false step forever blots her name. In vain she looks to what she was before. She sees the stain that falls to rise no more. I love to hear reminiscences of our New England ancestors; I am proud of my origin. Their faithful domestic training never makes that awful "seething and boiling of blood in my usually quiet veins." But the Pennsylvania grand-daughter of New England extraction proves the proverb true. "Though thou brayest a fool in a mortar among wheat, with a pestle, yet will not his foolishness depart from him." We hope her wrath will be less kindled against "Our Grand-father's" sermon, and that "Jewish St. Paul," that "man of clay."

For the Potter Journal.

MR. EDITOR—I have just finished the perusal of Michelet's "Book on Love," and I see that therein is discovered to the world an entirely new phenomenon: namely, a Man who understands that wonderful enigma—that bundle of contradictions, called "Woman"; and not only this, but a man who sees what every man and woman should see,—that the happiness, progress and well-being of the world depend on the proper cultivation of stock especially before dropping to lambs, as it enables the ewes to supply a larger supply of milk. Turnips and roots of various kinds, cut fine and mixed with wheat bran, mill-feed oats and buckwheat are fed with good results. Experiments have proved that wheat bran, at a rate of one pound to each per day, fed morning and evening to ewes with lambs, is one of the best kinds of food to produce a flow of milk. It produces no febrile action, is nutritious, and seems to exert a specific influence in producing milk. Chemical analysis shows that the fattening qualities of wheat are mostly contained in the bran. Corn whether fed whole or ground, I consider so far as food for ewes with lambs, and so far as milk is concerned, fed in any quantity, is dangerous. Where the farmer is feeding for mutton, corn fed whole or in a ground state, in moderate quantities, mixed with other food, and cut turnips, I consider as good and profitable.

In all cases let us return to the true principles of agricultural economy,—that he who produces the most at the least expense is most deserving, and that returns are most valuable which my dear wife, most valued married my sister Hetty, Amer. Societies, "It is much better it is, for they would not have been as happy as they are rendered possible. If people would rightly try; and in that way they may the better understand of morals which have all who feel called to forgive a man?—N. Y. Evening which Oregon has agreed on a State Seal. Besides its name, there are on it an eagle, the words—The Union—thirty-three stars mounted in back ground, an antlered elk, an emigrant woman, a retreating British man-of-war, and an advancing American steamer.

The first American woman who ever went ashore in Japan was Mrs. Bailey, wife of Captain Bailey, of Philadelphia, master of ship Mary Ellis. She was surrounded and followed by a large crowd of Japanese, but all their movements were perfectly respectful.

AN OLD SNAKE.—On Monday Mrs. Hopewell Jackson, of East Granby, Ct., found a rattlesnake in the door, which disputed the right of way. She took a stick of wood, and after a brilliant conflict subdued the foe. The reptile was four feet long. Twenty summers had passed over his head, and seventeen rattles had grown to his tail.

A T. OLIMSTED & KELLY'S STORE can always be found the best of S. Cooking, Box and Parlor STOVES. Also, TIN and SHEET-IRON WARE, POTS, KETTLES, SPIDERS, SCOTCH BOWLS, FRYING-PANS, SALT-PANS, and CAULDRONS. Also, Agricultural Implements, such as PLOWS, SCRAPERS, CULTIVATORS, CORN-SHELLERS, HORSE-RAKES, DOG-POWERS, &c.

THEIR WORK is well made and the material good. Good and substantial EAVES-TROUGHS put up in any part of the County—Terms easy. Ready Pay of all kinds, including Cash, seldom refused. Store on Main Street opposite the Old Court House, Coudersport, Aug. 1, 1859—50

a man is obliged to creep when an infant, that therefore it would always be best for him to continue to do so? The Democratic party in this county is in its second childhood, and is obliged to creep, and it creeps past the Republican party, it will be because the latter is foolish enough to get down and creep a race with it. This is what "Inquirer" evidently desires.

"Inquirer" goes to the past history of the party, and we will go with him! Previous to 1854, we had no organization in this county. In 1856 the first Republican-nominating convention was held here. For six years we had been running independent candidates, sometimes successfully, but often not. Our majorities were never, we think, higher than one hundred. Our majority for sheriff in 1853 was only thirty-nine. Since 1856 we have elected every candidate for county offices by majorities ranging from one to six hundred. Our past history proves, then, if it proves anything, that we have no cause at present to return to our early policy.

But the crowning argument—the keystone of "Inquirer's" arch—is that the Democrats can only have voluntary candidates taken from Republican ranks to vote for, that it will be the means—the very means—by which they may be converted. In 1857 and 1858 they had that opportunity and nine-tenths of them improved it, and we only ask "Inquirer" to point to a single instance of conversion on that account. On the contrary the converts, if any, have been the other way. What will be the feelings of those leading "Democrats" who are daily in the receipt of letters urging them to support certain independent candidates, when they learn that that is only a means which Providence, or some other power is using to convert them to the dangerous doctrines of Black Republicanism? We here raise our warning voice, bidding them beware!!!

Letter from Oberlin. OBERLIN, Ohio, Aug. 30, 1859. EDITOR OF POTTER JOURNAL: As most of your readers have some knowledge of the Institution of Farmington located here; and still more of them feel a deep interest in the noble citizens of Oberlin who lay in Cleveland jail, rather than in the Slave Power, I venture to feebly call a few lines for publication. Oberlin, a beautiful town of about first class board, located on the Cleveland handkerchief road 3 1/2 miles west of a single week by the town is all laid out better supplied with bleeding and blind, is one of its age that and obstinate forms of disease—five stories, difficult to cure on the ordinary, two very which find an entire and sound relief in the Piles Specific. True, time, but the Specific is pleasant to a business; neither diet nor restraint, and binds. As a perfect cure is the result. Hespering persons, in purchasing a case of and have obtained a cure for this most obstinate form of disease, which is worth to them ten times the cost of a house, set. Cases of over twenty years' duration have been cured with this Specific. We believe all may be cured by perse; the case contains the best.

FEVER AND AGUE SPECIFIC, known. A remedy without nearest to heaven of the agent, we knew of. may founder Oberlin College is overflowing with students and fast becoming the cherished place of learning, to the best citizens of the Nation. The present Term commenced yesterday with about seven hundred students. I was present this morning at the organization of the preparatory class in Greek. Forty-one young people promptly entered the class-room at the hour, two of whom were colored, and seven ladies. Is there another College in the world where such a class could be formed? I was also present at the organization of the History class, composed of over fifty, some fifteen of whom were ladies, with two colored. This class is under the care of Professor HENRY C. PECK, and the immortal heroes of the West, which it deigns, whose determined spirit position to reach a match for the entire The Specific for government. Could have proved invaluable. His open-leucorrhoea or Whites, were such as with debility or exhaustion, and many other forms of medicine are of little fully controlled and cured by the P-FORTS PILLS, while the specific for irregular control almost every form of scanty, pain or irregular menstruation.

DIARRHEAS AND SUMMER COMPLAINTS in adults or children are controlled like magic by the Diarrhoea Pills, while it may be averred without the possibility of successful contradiction, that the Diarrhoea Pills are the most perfect Specific for that disease known. For the various forms of FEVERS, SCARLET FEVER, MEASLES, and other diseases of children, the Fever Pills may be safely and surely relied upon. These Specifics are the prescriptions of Prof. HUMPHREYS, used for years in his extensive practice, and to the perfection of which he has devoted the resources of extensive knowledge, experience and study.

The public may rest assured that during the life-time of Dr. H. no one has been or shall be entrusted with the preparation of his Specifics, and he offers the guaranty of his professional life and reputation that they shall be just as he represents them. They have now been before the public for five years, and have everywhere won golden opinions from the many thousands who have used them. Simple, free from intricacy, technically, or danger, they have become the ready recourse and aid of the parent, traveler, nurse, or invalid, and have become the family physician, and medical adviser of thousands of families. Nowhere have they been tried without having been approved, and their highest appreciation is among those who have known them longest, and most intimately. Every Family will find these Specifics all they have been recommended: prompt, reliable.

For STATE SENATOR, ISAAC BENSON, of Potter, [Subject to decision of Conference.] FOR ASSEMBLY, LEWIS MANN, of Potter, LORRENZO P. WILLISTON, of Tioga. [Subject to decision of Conference.] FOR SHERIFF, ARCHIBALD F. JONES. FOR CORONER, DR. HENRY H. MUNSQON. SENATOR CONYERS COMMISSIONER, DR. EDWIN THATCHER. SENATOR CONYERS, with a SENATOR A. SLADE, the paper you see McChesney, of Chambers per, and he to the unanimous nomination above. District, composed Full directions, and Fulton county or Cream Tartar each package; a making all kinds of the Northern Den for making Soda been recommended. MAKE YOUR County Committee candidate for B. T. BABBITT, of Tioga. TRATED in lie n.p.s.e.s a great Warranted doubly. The fun of the ordinary Potash. (three in 1 lb. 2 lbs., 3 lbs. m.p.s.e.s) (three in Hard and Soft S will find this the light themselves of market. hinking that no dem- No. 68 and 70 W shadow of success. New York, and B. committee are M. D.'s, is a compliment to

their professional judgment. We have not yet learned whether either the publisher or editor of the Wellsboro Democrat will be presented. Either of them is equally eligible with Cotter, mentally.

The Nominations. In another place we give the proceedings of the Republican County Convention, and take pleasure in placing the names of the candidates nominated by the Convention, at the head of our columns. The Convention was one of the fullest and strongest that the Republican party have ever assembled in this county—and the delegates came directly from the voice of the people, as would naturally result from a spirited contest in the delegate meetings—the principal struggle being between the various candidates for Sheriff. The result, though not generally anticipated, is entirely satisfactory, we believe, to the people of this county generally, and we have no hesitation in saying that Mr. Jones will be elected by a majority that will convince everybody of the integrity of the Republican vote of this county.

The recommendation of Mr. Benson for State Senator, is a significant expression of the popularity of that gentleman in this county, and we trust will be properly respected by the Conference which meets here on the 21st inst. Tioga county presents the name of S. H. Wilson; Warren, that of Mr. Scofield, the present incumbent; and McKean, that of Mr. Williams.

The re-nomination of Mr. Mann for Representative, is a hearty endorsement of his course and efficiency while in the House last winter. L. P. Williston, Esq., his colleague last winter, has also been re-nominated by the Republicans of Tioga county, and their reelection by large majorities is a matter of course.

Mr. Jones, the candidate for Sheriff, is eminently capable for the duties of that office, well-known to the people of the county, and personally popular wherever known. The Convention could not well have been more fortunate in their selection of a candidate, though none of the candidates presented were any more objectionable than he was. Mr. Jones' majority will not fall far short of 800, and we are confident will exceed that number.

With the candidates for Commissioner, Auditor, Surveyor and Coroner, we are only sufficiently acquainted to assure our readers that they are capable and deserving men; and as there will not be likely to be any opposition to them, they will be elected by a full party vote. Mr. Thatcher, the candidate for Commissioner is a young man, well educated and well informed, and in every respect worthy of the support and confidence of the people of this county. We speak thus particularly of his qualifications, because we are desirous that voters may know that they are supporting a worthy person.

Of the duty of Republicans with respect to the ticket, we will speak at length in our next issue; for the present only calling attention to the communication of "Y. Z." in another part of the paper.

We copy the following from Farnley's Weekly Express of August 27: THE GIFT BOOK BUSINESS.—The gift-book business, which has sprung up within the last four or five years, is peculiar to this country, and, from its popularity, has become entitled to be designated an "institution." It was originated by Mr. George G. Evans, now occupying very extensive premises at 439, Chestnut street, only half a dozen doors from the publishing office of THE PRESS. You buy a book, out of a multitudinous collection, including all the new publications of merit, and with each book receive a gift, varying in value from 50 cents to \$100. In the last six months, between two and three hundred gold and silver watches have thus been distributed, and over \$250,000 worth of other jewelry. We have seen the receipts for money paid for watches and jewelry, by Mr. Evans, since Christmas, and they corroborate this statement to the full. No more than a dollar is paid for a dollar book—yet a gift is presented with each purchase. Mr. Evans, who is not connected with any other house in Philadelphia or New York, buys books cheaply for cash, and in such large quantities that the discounts he receives are great. Moreover, he is himself an extensive publisher, judiciously "spreading himself" in that line, also, with first-class books. He is able for any enterprise requiring spirit and capital.

Mr. Evans publishes a classified catalogue of the largest assortment of books, in every department of literature, in the country, which will be sent, free of expense, to any person in the United States, by addressing GEORGE G. EVANS, Gift Book Establishment, No. 429 Chestnut street, Philadelphia.

CHARLES DICKENS' WORKS.—The well-known firm of T. B. Peterson & Brothers, 306 Chestnut street Philadelphia, have just commenced publishing a remarkably cheap edition of these unap-

proachable works of fiction. It is called "Peterson's Cheap Edition of the Miscellaneous Writings of Charles Dickens," and will be issued complete in twenty-eight weekly volumes. One volume will be published regularly on each and every Saturday, until the whole number of volumes—twenty-eight—is completed. The low price fixed by the publishers for them are only 25 cents a volume, or the whole twenty-eight volumes for five dollars. A complete set will be forwarded free of postage, by Mail, to any part of the United States, to any one, by the publishers, on receiving a remittance of five dollars for the twenty-eight volumes; or a remittance of three dollars will pay for the first fourteen volumes; or a remittance of one dollar will pay for the first four volumes. The volumes will be neatly printed, and each volume will contain 160 large octavo pages, printed on fine white paper, and neatly bound with paper cover. The revised uniform Edinburgh edition, from which this is reprinted, comprises twenty-eight volumes, the cost of which is seventy-five dollars; and this edition will contain every word of the Edinburgh edition. We commend the determination of this enterprise, Philadelphia firm, to furnish the complete and entire works of Charles Dickens at a price so reasonable, that all persons whatever may possess a full set, and direct the especial attention of our readers to the fact, and would advise them all to make a remittance of Five Dollars at once, per first mail, to the publishers, for the entire set, who will send them complete to any one, free of postage, on receipt of that sum.

SUICIDE.—A melancholy case of suicide occurred in this village on Monday morning. The wife of W. B. LARNED, saloon keeper, was found about 7 o'clock in the morning suspended by the neck in the cellar of her residence, her hands tied behind her. She had probably been hanging half an hour when first discovered, and upon being taken down it was ascertained that life was extinct. A Coroner's jury was immediately summoned, who gave in their verdict that she died by her own hands.—Wellsboro, (N. Y.) Budget.

PRICE CURRENT. Corrected every Wednesday, by P. A. STEUBINS, wholesale and retail dealer in Groceries and Provisions, Main Street, COUDERSPORT, PA.

Table with 2 columns: Item and Price. Includes Apples, green, 75 to 1.00; Beans, 1.25 to 2.00; Butter, 20 to 25; Beef Hides, 5 to 6; Berries, dried, 10 to 18; Buckwheat, 6 to 7; Butter, 15 to 16; Cheese, 8 to 12; Corn, 1.00 to 1.12; Corn Meal, per cwt., 2.25 to 2.75; Eggs, 10 to 12; Flour, superfine, 6.00 to 7.00; do double extra, 6.50 to 7.50; Hams, 12 to 14; Hay, 9 to 10; Honey, 10 to 12; Lard, 12 to 16; Maple Sugar, per lb., 8 to 10; Oats, 1.00 to 1.10; Onions, 8 to 10; Potatoes, 1.00 to 1.20; do in whole hog, 6 to 7; Potatoes, 5 to 7; Peaches, dried, 5 to 6; Poultry, 5 to 6; Rice, 7 to 8; Salt, 3 to 4; do sack, 2 to 3; Trout, 6 to 8; Wheat, 1.50 to 1.75; White Fish, per 1-bbl., 6.00 to 6.50; Wool, per lb., 28 to 35.

FOR SHERIFF. To the Electors of Potter County: Fellow-citizens—Having long been a resident of your county, (being among the first) I offer myself as an independent candidate for the office of Sheriff, at the ensuing election. I do not offer myself through the solicitation of any person, but because I desire the office. I have not the means nor the disposition to hire any one to canvass the county for me, or to do so for myself, desiring rather to rest my claim with the unbiased feelings of the people. WM. CROSBY. Homer, June 26, 1859.

SPECIAL NOTICES. GRAVEL AND STONE. By this we understand a collection of sand-like substance having been lodged in the passage of the urine. When the system is in a healthy state, this substance is carried off by the natural passage of the body; but when there is a weakness of any organ, especially the kidneys, they become incapable of expelling such sandy concretions, and consequently they are lodged in the kidneys, urethra, or the bladder, causing great inflammation to those organs, and great pains and swelling, and great difficulty in voiding urine. It has been admitted by many physicians, that Morse's Indian Root Pills are made out of some particular plants which have a wonderful charming influence in dissolving the substance which has clogged the passage, and by their cooling properties, they expel all inflammation, and leave the water passage in an active and healthy state. From three to four of these Pills night and morning, from one to two weeks, will decide how this dreadful disease is to be treated, and as they remove the cause of every kind of diseases, it is utterly impossible for them to fail in curing the gravel as they unclog the passage, and leave the parts in a healthy and lively condition. Dr. Morse's Indian Root Pills are sold by all dealers in Medicines.

THE FALL TERM OF ULYSSES ACADEMY WILL commence on Wednesday, the 21st day of September, inst., to continue ten weeks. The Trustees would announce that they have secured the services of JOSEPH A. COOPER, A. B., of Long Island, (Late of Yale College), as Principal of the Institution. Competent Assistant Teachers have also been secured in every department. Tuition front three to six dollars. Extras, at the usual rates of other institutions. Board in good families can be obtained at \$1.50 per week, and rooms can be secured at reasonable rates for those who wish to board themselves. All Bills must be pre-paid or satisfactorily arranged in advance. Students entering before the middle of the term, will pay for the full term; and in the last half of the term, for half term. All necessary Books and school requisites can be had in Lewisville. The regulations of the Academy are such as are deemed necessary to secure the propriety of the Institution, and the correct deportment of the students, and all are expected cheerfully to unite in their support. O. A. LEWIS, President of the Board of Trustees. DAN BAKER, Secretary.

For the Potter Journal. MR. EDITOR—I have just finished the perusal of Michelet's "Book on Love," and I see that therein is discovered to the world an entirely new phenomenon: namely, a Man who understands that wonderful enigma—that bundle of contradictions, called "Woman"; and not only this, but a man who sees what every man and woman should see,—that the happiness, progress and well-being of the world depend on the proper cultivation of stock especially before dropping to lambs, as it enables the ewes to supply a larger supply of milk. Turnips and roots of various kinds, cut fine and mixed with wheat bran, mill-feed oats and buckwheat are fed with good results. Experiments have proved that wheat bran, at a rate of one pound to each per day, fed morning and evening to ewes with lambs, is one of the best kinds of food to produce a flow of milk. It produces no febrile action, is nutritious, and seems to exert a specific influence in producing milk. Chemical analysis shows that the fattening qualities of wheat are mostly contained in the bran. Corn whether fed whole or ground, I consider so far as food for ewes with lambs, and so far as milk is concerned, fed in any quantity, is dangerous. Where the farmer is feeding for mutton, corn fed whole or in a ground state, in moderate quantities, mixed with other food, and cut turnips, I consider as good and profitable.

In all cases let us return to the true principles of agricultural economy,—that he who produces the most at the least expense is most deserving, and that returns are most valuable which my dear wife, most valued married my sister Hetty, Amer. The Convention could not well have been more fortunate in their selection of a candidate, though none of the candidates presented were any more objectionable than he was. Mr. Jones' majority will not fall far short of 800, and we are confident will exceed that number.

With the candidates for Commissioner, Auditor, Surveyor and Coroner, we are only sufficiently acquainted to assure our readers that they are capable and deserving men; and as there will not be likely to be any opposition to them, they will be elected by a full party vote. Mr. Thatcher, the candidate for Commissioner is a young man, well educated and well informed, and in every respect worthy of the support and confidence of the people of this county. We speak thus particularly of his qualifications, because we are desirous that voters may know that they are supporting a worthy person.

Of the duty of Republicans with respect to the ticket, we will speak at length in our next issue; for the present only calling attention to the communication of "Y. Z." in another part of the paper.

We copy the following from Farnley's Weekly Express of August 27: THE GIFT BOOK BUSINESS.—The gift-book business, which has sprung up within the last four or five years, is peculiar to this country, and, from its popularity, has become entitled to be designated an "institution." It was originated by Mr. George G. Evans, now occupying very extensive premises at 439, Chestnut street, only half a dozen doors from the publishing office of THE PRESS. You buy a book, out of a multitudinous collection, including all the new publications of merit, and with each book receive a gift, varying in value from 50 cents to \$100. In the last six months, between two and three hundred gold and silver watches have thus been distributed, and over \$250,000 worth of other jewelry. We have seen the receipts for money paid for watches and jewelry, by Mr. Evans, since Christmas, and they corroborate this statement to the full. No more than a dollar is paid for a dollar book—yet a gift is presented with each purchase. Mr. Evans, who is not connected with any other house in Philadelphia or New York, buys books cheaply for cash, and in such large quantities that the discounts he receives are great. Moreover, he is himself an extensive publisher, judiciously "spreading himself" in that line, also, with first-class books. He is able for any enterprise requiring spirit and capital.

Mr. Evans publishes a classified catalogue of the largest assortment of books, in every department of literature, in the country, which will be sent, free of expense, to any person in the United States, by addressing GEORGE G. EVANS, Gift Book Establishment, No. 429 Chestnut street, Philadelphia.

CHARLES DICKENS' WORKS.—The well-known firm of T. B. Peterson & Brothers, 306 Chestnut street Philadelphia, have just commenced publishing a remarkably cheap edition of these unap-

proachable works of fiction. It is called "Peterson's Cheap Edition of the Miscellaneous Writings of Charles Dickens," and will be issued complete in twenty-eight weekly volumes. One volume will be published regularly on each and every Saturday, until the whole number of volumes—twenty-eight—is completed. The low price fixed by the publishers for them are only 25 cents a volume, or the whole twenty-eight volumes for five dollars. A complete set will be forwarded free of postage, by Mail, to any part of the United States, to any one, by the publishers, on receiving a remittance of five dollars for the twenty-eight volumes; or a remittance of three dollars will pay for the first fourteen volumes; or a remittance of one dollar will pay for the first four volumes. The volumes will be neatly printed, and each volume will contain 160 large octavo pages, printed on fine white paper, and neatly bound with paper cover. The revised uniform Edinburgh edition, from which this is reprinted, comprises twenty-eight volumes, the cost of which is seventy-five dollars; and this edition will contain every word of the Edinburgh edition. We commend the determination of this enterprise, Philadelphia firm, to furnish the complete and entire works of Charles Dickens at a price so reasonable, that all persons whatever may possess a full set, and direct the especial attention of our readers to the fact, and would advise them all to make a remittance of Five Dollars at once, per first mail, to the publishers, for the entire set, who will send them complete to any one, free of postage, on receipt of that sum.

SUICIDE.—A melancholy case of suicide occurred in this village on Monday morning. The wife of W. B. LARNED, saloon keeper, was found about 7 o'clock in the morning suspended by the neck in the cellar of her residence, her hands tied behind her. She had probably been hanging half an hour when first discovered, and upon being taken down it was ascertained that life was extinct. A Coroner's jury was immediately summoned, who gave in their verdict that she died by her own hands.—Wellsboro, (N. Y.) Budget.

FOR SHERIFF. To the Electors of Potter County: Fellow-citizens—Having long been a resident of your county, (being among the first) I offer myself as an independent candidate for the office of Sheriff, at the ensuing election. I do not offer myself through the solicitation of any person, but because I desire the office. I have not the means nor the disposition to hire any one to canvass the county for me, or to do so for myself, desiring rather to rest my claim with the unbiased feelings of the people. WM. CROSBY. Homer, June 26, 1859.

SPECIAL NOTICES. GRAVEL AND STONE. By this we understand a collection of sand-like substance having been lodged in the passage of the urine. When the system is in a healthy state, this substance is carried off by the natural passage of the body; but when there is a weakness of any organ, especially the kidneys, they become incapable of expelling such sandy concretions, and consequently they are lodged in the kidneys, urethra, or the bladder, causing great inflammation to those organs, and great pains and swelling, and great difficulty in voiding urine. It has been admitted by many physicians, that Morse's Indian Root Pills are made out of some particular plants which have a wonderful charming influence in dissolving the substance which has clogged the passage, and by their cooling properties, they expel all inflammation, and leave the water passage in an active and healthy state. From three to four of these Pills night and morning, from one to two weeks, will decide how this dreadful disease is to be treated, and as they remove the cause of every kind of diseases, it is utterly impossible for them to fail in curing the gravel as they unclog the passage, and leave the parts in a healthy and lively condition. Dr. Morse's Indian Root Pills are sold by all dealers in Medicines.

THE FALL TERM OF ULYSSES ACADEMY WILL commence on Wednesday, the 21st day of September, inst., to continue ten weeks. The Trustees would announce that they have secured the services of JOSEPH A. COOPER, A. B., of Long Island, (Late of Yale College), as Principal of the Institution. Competent Assistant Teachers have also been secured in every department. Tuition front three to six dollars. Extras, at the usual rates of other institutions. Board in good families can be obtained at \$1.50 per week, and rooms can be secured at reasonable rates for those who wish to board themselves. All Bills must be pre-paid or satisfactorily arranged in advance. Students entering before the middle of the term, will pay for the full term; and in the last half of the term, for half term. All necessary Books and school requisites can be had in Lewisville. The regulations of the Academy are such as are deemed necessary to secure the propriety of the Institution, and the correct deportment of the students, and all are expected cheerfully to unite in their support. O. A. LEWIS, President of the Board of Trustees. DAN BAKER, Secretary.
