Value Your Own Labor.

A correspondent of the *Practical Farmer* thus discourses upon the importance of every farmer placing a proper value on his own labor. "What a silly man he is who sets out in life to work for nothing and continues to operate upon that principle all the days of his life! It is an old saying, and a true one, that 'if you think nothing of yourself no one else will set any store by you.' The same is the case with regard to whatever you do. You ought to know whether your services are of any value. Indeed, you ought, and must make yourself useful in some one department in the great world's work, and there certainly you should have common sense enough to think kindly and appreciatingly of yourself. Now, this is just the reason farming business is so little honored. The men who carry on other branches of business consider their time and labor of some account; they see money in every passing hour; if squandered, the money is lost, if devoted, a value is set upon it and a remuneration claimed. How few have conceived this spring to keep an account with their farms! Not one in ten. We have a way of doing things within ourselves, so that when done they cost nothing. Yet it is folly to operate on such a principle—worse, it is suicidal. Every man should have a price for his labor—not extravagant—but such that he may be able to know what his improvements cost him—what his crops stand him in—as well as what they sell for—or he can never know within many dollars how he stands with the world. The merchant keeps an account with every branch of his trade, and he is able to tell at any hour when he chooses to strike his balance, what his profits and losses are, and to what particular branch he owes his success or failure. But were the farmer to go into this squaring of accounts—making a debtor and creditor of each of his affairs—he would be astonished to see how much time, consumed in matters which never bring any returns, to the neglect of important items, if attended to, would afford him living and perennial sources of wealth. No man can succeed on such a principle. Honor, we pray you, your own labor, and demean yourself with the dignity of a man.

Miscellaneous News Items.

A LADY'S DEPENDENCE ON VEILS.—An exchange paper found fault with the practice of wearing veils—averred that it was "mischievously prevalent" this year, and objected, to it because "they are so terribly annoying and tantalizing to sensitive young men." To this a lady writer answers, with much truth, as follows: "This is one of the very best reasons that could be given for wearing them. Veils save women from a vast amount of annoying impertinence. It requires no small degree of resolution for a sensitive young girl to pass the corner of a street where a knot of these susceptible young men are congregated, knowing that all the curious eyes will be turned upon her, and that her eyes, hair, walk, dress, size of shoes and gloves, will be marks of their close and impudent observation. Veils have a special sanitary use during the spring months, in the protection afforded from the disagreeable influence of the sun and wind, but if comfort did not call for them we should advocate their use until young men acquired the first rules of politeness and good manners in their street deportment."

"We earnestly hope that Lincoln won't be elected; and he certainly won't if the Democracy have good sense enough and patriotism enough to stand in November by the only national ticket before the country. But if, through Democratic madness, Mr. Lincoln shall be elected, the Union must still be preserved. If some Southern communities shall refuse to let postmasters hold office among them, their post-offices can certainly be dispensed with, they alone being the sufferers. They may be assured that the rest of the country will care very little about that. United States mails will pass right through the midst of them to points where mails shall be wanted and postmasters tolerated. If, however, they want fight bad enough to undertake to prevent the transmission of the mails along the public highways, they will have no difficulty in getting just as much of it as will lie easily upon their stomachs.—*Louisville Journal.*

THE death of Mr. Gales (says *The Albany Journal*) revives a reminiscence of the only time his paper (*The National Intelligencer*) ever suspended publication. It was a warm and able advocate of the Madison war policy, seconding the efforts of Clay and his co-workers, and so powerful was its influence, that when Gen. Ross, in command of the British troops, entered the capital after the unfortunate affair at Bladensburg, his first inquiry was not for the Capitol, the President's house, or the departments, but for *The National Intelligencer* office, and it was the first establishment demolished, causing a short cessation in its regular publication. With this exception, *The Intelligencer* has been published regularly for sixty years.

LIFE PILLS AND PHENIX BITTERS.

THESE MEDICINES have now been before the public for a period of THIRTY YEARS, and during that time have maintained a high character in almost every part of the Globe, for their extraordinary and immediate power of restoring perfect health to persons suffering under nearly every kind of disease to which the human frame is liable.

The following are among the distressing variety of human diseases in which the

Vegetable Life Medicines

are well known to be infallible.

DYSPEPSIA, by thoroughly cleansing the first and second stomachs, and creating a flow of pure healthy bile, instead of the stale and acid kind; **PLAGUE**, Loss of Appetite, Heartburn, Headache, Restlessness, Intemperance, Anxiety, Languor, and Melancholy, which are the general symptoms of Dyspepsia, will vanish, as a natural consequence of its cure.

COSTIVENESS, by cleansing the whole length of the intestines with a solvent process, and without violence; all violent purges leave the bowels costive within two days.

FEVERS of all kinds, by restoring the blood to a regular circulation, through the process of perspiration in such cases, and the thorough solution of all intestinal obstruction in others.

The Life Medicines have been known to cure **RHEUMATISM** permanently in three weeks, and **GOUT** in half that time, by removing local inflammation from the muscles and ligaments of the joints.

DROPSIES of all kinds, by freeing and strengthening the kidneys and bladder; they operate most delightfully on these important organs, and hence have ever been found a certain remedy for the worst cases of GRAVEL.

Also **WORMS**, by dislodging from the turnings of the bowels the slimy matter to which these creatures adhere.

SOURVEY, ULCERS, and INVETERATE SORES by the perfect purity which these LIFE MEDICINES give to the blood, and all the humors.

SCORBUIC ERUPTIONS and BAD COMPLEXIONS, by their alterative effect upon the fluids that feed the skin, and the morbid state of which occasions all eruptive complaints; scaly, cloudy, and other disagreeable complexion.

The use of these Pills for a very short time, will effect an entire cure of **SALT RHEUM**, and a striking improvement in the clearness of the skin. **COMMON COLDS and INFLUENZA** will always be cured by one dose, or by two in the worst cases.

PILES—The original proprietor of these Medicines, was cured of Piles of 35 years standing, by the use of the LIFE MEDICINES also.

FEVER and AGUE—For this scourge of the Western country, these Medicines will be found a safe, speed, and certain remedy.—Other medicines leave the system subject to a return of the disease—a cure by these Medicines is permanent—TRY THEM, BE SATISFIED, AND BE CURED.

BILIOUS FEVERS and LIVER COMPLAINTS—General Debility, Loss of Appetite, and Diseases of Females—the Medicines have been used with the most beneficial results in cases of this description.—Kings Evil, and Scrophulous, in its worst forms, yields to the mild yet powerful action of these remarkable Medicines. Night Sweats, Nervous Debility, Nervous Complaints of all kinds, Palpitation of the Heart, Painters' Colic, are speedily cured.

MERCURIAL DISEASES—Persons whose constitutions have been impaired by the injudicious use of Mercury, will find these Medicines a perfect cure, as they never fail to eradicate from the system, all the effects of Mercury, infinitely sooner than the most powerful preparations of Sarsaparilla.

HOSTETTER'S

STOMACH BITTERS.

It is a fact that, at some period, every member of the human family is subject to disease or disturbance of the bodily functions; but with the aid of a good tonic and the exercise of good common sense, they may be able to regulate the system so as to secure permanent health. In order to accomplish this desired object, the true course to pursue is certainly that which will produce a natural state of things at the least hazard of vital strength and life. For this purpose, Dr. Hostetter has introduced to this country a preparation bearing his name, which is not a new medicine, but one that has been tried for years, giving satisfaction to all who have used it. The Bitters operate powerfully upon the stomach, bowels, and liver, restoring them to a healthy and vigorous action, and thus, by the simple process of strengthening nature, enables the system to triumph over disease.

For the cure of Dyspepsia, Indigestion, Nausea, Flatulency, Loss of Appetite, and other Bilious Complaints, arising from a morbid action of the Stomach or Bowels, producing Cramps, Dysentery, Colic, Cholera Morbus, &c., these Bitters have no equal.

Diarrhoea, dysentery or flux, so generally contracted by new settlers, and caused principally by the change of water and diet, will be speedily regulated by a brief use of this preparation. Dyspepsia, a disease which is probably more prevalent in all its various forms, than any other, and the cause of which may always be attributed to derangements of the digestive organs, can be cured without fail by using HOSTETTER'S STOMACH BITTERS, as per directions on the bottle. For this disease every physician will recommend Bitters of some kind; then why not use an article known to be infallible? All nations have their Bitters, as a preventive of disease and strengthener of the system in general; and among them all there is not to be found a more healthy people than the Germans, from whom this preparation emanated, based upon scientific experiments which have tended to prove the value of this great preparation in the scale of medical science.

FEVER and AGUE.—This trying and provoking disease, which fixes its relentless grasp on the body of man, reducing him to a mere shadow in a short time, and rendering him physically and mentally useless, can be driven from the body by the use of HOSTETTER'S RENOWNED BITTERS. Further, none of the above-stated diseases can be contracted, even in exposed situations, if the Bitters are used as per directions. And as they neither create nausea nor offend the palate, and render unnecessary any change of diet or interruption of ordinary pursuits, but promote sound sleep and healthy digestion, the complaint is removed as speedily as is consistent with the production of a thorough and permanent cure.

For Persons in Advanced Years, who are suffering from an enfeebled constitution and infirm body, these Bitters are invaluable as a restorative of strength and vigor, and need only be tried to be appreciated. And to another while nursing these Bitters are indispensable, especially where the mother's nourishment is inadequate to the demands of the child, consequently her strength must yield, and here it is where a good tonic, such as Hostetter's Stomach Bitters, is needed to impart temporary strength and vigor to the system. Ladies should by all means try this remedy for all cases of debility, and, before so doing, should ask their physician, who, if he is acquainted with the virtue of the Bitters, will recommend their use in all cases of weakness.

Caution.—We caution the public against using any of the many imitations or counterfeits; but ask for Hostetter's CELEBRATED STOMACH BITTERS, and see that each bottle has the words "Dr. J. Hostetter's Stomach Bitters" blown on the side
