The position taken was, that the war should be prosecuted vigorously until every State was brought back to its allegiance, and that in no event should the local laws and institutions of any of the States be interfered with.

THE American Question is still a prominent theme in the English Parliament and the Frenth Assembly. Sweeping resolutions on maritime policy have been debated in both Assemblies, and combated chiefly on the ground that the interests of those countries might be injuriously effected in some future war by the principles sought to be established. The conservative men of both nations are too wary to be entrapped in any course which, although promising advantages when neither country is at war. would be very inconvenient restrictions when they become combatants. It is to this cause more than anything else, that we are indebted for the non-interference, as yes, of France and England with our blockade of the
