

# The Farm and Fireside

## Preparation of Tools and Implements.

Are your plows in readiness for the soil? If you are to purchase a new one or two, and are in doubt which kind to purchase, ask the privilege of trying three or four different kinds with a view of purchasing. Any manufacturer will willingly grant such a privilege. But do not attempt to use a new plow until it is well polished, so that the earth will slip well. The manufacturers can polish a plow in a few minutes, and would do it if the farmers would request it.

Plow points should now be ordered and brought home for future use. I say order them cast, because many manufacturers are growing cunning about making points, by not chilling the edge. They will tell farmers that they are just as good without being cold chilled as to chill them. But this is not so. One point when chilled will out last two that are not chilled. When points are not chilled they will wear off on the under side in half a day so much as to cause a plow not to run so deep, nor of a depth so uniform, nor so steadily by a great difference, as if they were chilled. Order not only the entering points to be chilled, but the wing of the plow point to be chilled. By the wing is meant the entire edge. Besides this, put every point on the grindstone and polish it before it is ever used. This will save in the strength of teams, and in doing the plowing well, more than fifty cents on every point.

**HARROWS.**—Is a new harrow needed? Procure some good timber, and employ a good workman in wood, who will make the wood work in less than a day. A workman by the job will ask from \$2 to \$3 for the work only—besides the timber. For the teeth procure the best of iron of the proper size, and employ a blacksmith to make the teeth. Our Blacksmiths make harrow teeth for five cents each, with a great profit to themselves, as a man will make over one hundred per day. By this system of management a good harrow may be made for six or seven dollars, quite as good as to pay sixteen dollars for one that is neatly varnished.

There is no economy in planing and painting the woodwork of harrows, because they are always so much exposed to harsh and rough usage, which cannot be avoided, that paint is of very little service.

Let all harrow teeth be well sharpened, and if the points were laid with steel and tempered, they would be much better than iron alone.

The best, most durable and neatest kind of paint for any kind of tools or implements, is a light blue. This is far better than red, as blue will reflect more of the heat of the sun than red. Consequently the wood which is painted will be heated and sun checked less when painted blue. During the warm days in March let tools and implements be washed clean and painted blue.

To prepare blue paint that will dry soon, procure good boiled oil, which will cost about ten cents more per gallon than unboiled. Procure a quart or more, according to amount of painting to be done, of liquid drier or laquer. Then take one pint of oil, half a pint of drier and mingle by stirring in with a stick enough white lead to make it about as thick as cream. Zinc white is best unless a man has an apparatus for grinding the lead. Zinc will require no grinding, but must be thoroughly stirred, and all the lumps washed. Now put in one, or two, or three table-spoonfuls of Prussian blue, and stir it thoroughly. But a small quantity of blue will be necessary to make a handsome blue paint. If it appears too light colored, put in more blue. Paint prepared a few hours before it is used, will work better than that just prepared.

If the oil and drier are good, paint prepared according to the foregoing directions, will dry in from one to two days, although it should be allowed from one to two weeks to become hard.

For green paint, let the white lead, or zinc, and oil and drier be prepared in the same way as for blue, and put in green instead of blue. Continue to put in green until the shade is dark enough to suit the fancy.

Yellow paint may be prepared in the same manner by using chroma yellow with the white lead.

It is stated that, on an average, it takes about fourteen quarts of milk to make a pound of butter.

Read this column carefully.

## Breaking Heifers for Milking.

The American Agriculturist gives the following good advice, which may be put into practice during the next month in many thousands of cases:—

This is often made quite a serious affair, in which kicks and bruises are freely interchanged between the frightened brute and the irritated master. Many an otherwise excellent milker is spoiled for life by harsh treatment. A heifer, if well broken to the milk pail, will pay for much painstaking. Rarely's reasoning respecting horses applies equally to other animals. They only resist when injury is apprehended, and their natural instinct suggests danger whenever any unusual treatment occurs. Every one has noticed how shy a creature is, entering strange inclosures or at the sight of new objects. The handling of a heifer's bag is to her a very unusual proceeding, and in addition, the teats are often tender, and the bags caked and inflamed so as to be painful under even a gentle touch. Training for milking should commence long before calving. First teach the animal to welcome your coming by an apple, a handful of corn, or salt or other delicacy. She will soon readily permit the hand to be laid upon her back and enjoy the gentle rubbing and scratching which may be given. Extend the handling to different parts of the body until she will not flinch from grasping the teats, and the work may be soon accomplished without a harsh word. This will be a good lesson for boys to practice and it will teach them patience and kindness, in addition to the good effects upon the animals.

**SAWDUST IN MANURE.**—F. J. Kinney, of Wayland, Mass., gives in the *New England Farmer*, an interesting account of his use of sawdust for bedding, as a fertilizer and absorbent.

In January, 1859, he commenced hauling sawdust and fine chips from a clothing manufactory. There were two horses, seven head of cattle, and several swine on the farm; and in course of the year he used 100 cords of this material as bedding for these animals. The stable floors were covered with it about six inches deep, and as fast as that under the swine and cattle became saturated with urine, it was removed with the solid excrement to the manure cellar. The horse bedding and manure were piled under a shed.

In closing his communication, Mr. Kinney remarks:—"Wherever I have examined the roots of a vegetable grown where sawdust, chip or leaves and stable manure had been used, I found them embracing with their delicate fibers every atom of the vegetable matter within their reach, and drawing their natural sustenance from them; and there is nothing I have ever tried as an assistant fertilizer that holds so much liquid or retains it so long, where only the air and sun operate on it, as hard wood sawdust; and nothing that yields up this embryonic vegetable so readily to the petitions of the roots."

**COLIC IN HORSES.**—I will give you a receipt which I have known to cure in a few minutes: I knew a horse taken with it on a tread-wheel to a carding machine, so that the owner thought he could not live. He got the veterinary surgeons, and they did what they could, and all decided that the horse must die. This man's wife, who believed and practiced hygiene, from the time the horse was taken, tried to persuade her husband to use a wet bandage, but he insisted it would do no good. After all had given up that the horse could not live, by her entreaties—the doctors saying it would do no good or hurt—he took a thick bed comforter, bound it around the horse, went to the well and drew water, and poured it on until it was thoroughly soaked. It seemed like a pot boiling. In less than fifteen minutes from the time he commenced the watering process, the horse was up and eating, to the great surprise of the horse doctors, who knew it could not live. The horse did good service afterwards. This recipe I gave several years ago, and it was copied into most, as I was told by an editor, of the agricultural, and many other papers in the United States. Many have tried and proved it. Try it, brother farmers.—*Farmer's Advocate.*

**A GOLDEN RULE FOR FARMERS.**—Do not go on dividing up or using up your capital by cropping without manure. Make it a cardinal principal of action, never to be swerved from, that you will not in any instance, in relation to any field or crop, or rotation, plant or sow without a supply of manure sufficient at least, to preserve the existing fertility of the soil.

## The Bugle Calls! The War has Begun! A War of Extermination Against Bad Teeth, Bad Breath, Diseased Gums, Toothache, Earache, and Neuralgia.

OUR ATZILERY IS

## Dr. Wm. B. Hurd's DENTAL TREASURY:

A complete set of Remedies for PRESERVING THE TEETH, PURIFYING THE BREATH AND MOUTH, AND CURING TOOTHACHE AND NEURALGIA.

CONTENTS: Dr. Hurd's celebrated MOUTH WASH, 1 bottle. Dr. Hurd's unequalled TOOTH POWDER, 1 box. Dr. Hurd's magic TOOTHACHE DROPS, 1 box. Dr. Hurd's UNRIVALLED NEURALGIA PLASTER.

Dr. Hurd's MANUAL on the Best Means of Preserving the Teeth, including Directions for the Proper Treatment of Children's Teeth. FLOSS SILK for cleaning between the Teeth. TOOTH PICKS, etc., etc.

Prepared at Dr. Hurd's Dental Office, 77 Fourth St., Brooklyn (E. D.) Price, ONE DOLLAR, or SIX for \$5.

The Dental Treasury makes package eight inches by five, and is sent by express. Full directions for use is on each article. The following articles we can send separately, by mail, viz:

The Treatise on Preserving Teeth, sent post-paid, on receipt of Twelve Cents, or four stamps.

The Neuralgia Plaster, for Neuralgia in the Face, Nervous Headache, and Earache, sent, post-paid, on receipt of Eighteen cents, or six stamps.

The Neuralgia and Rheumatic Plaster (large size), for pains in the Chest, Shoulders, Back, or any part of the body, sent post-paid, on receipt of Thirty-Seven cents.

Address **Wm. B. Hurd & Co.** Tribune Buildings, New York.

Dr. Hurd's MOUTH WASH, TOOTH POWDER, and TOOTHACHE DROPS cannot be sent by mail, but they can probably be obtained at your Drug or Periodical Stores. If they cannot, send to us for the Dental Treasury, price, One Dollar, which contains them.

NOW, ARE DR. HURD'S PREPARATIONS GOOD?

The best evidence that they are is, that their friends and best patrons are those who have used them longest. Dr. WILLIAM B. HURD is an eminent Dentist of Brooklyn, Treasurer of the New York State Dentists' Association, and these preparations have been used in his private practice for years, and no leading citizen of Brooklyn or Williamsburgh questions their excellence, while eminent Dentists of New York recommend them as the best known to the profession. Without the aid of advertising, dealers have sold them by the gross.

The Editor of the *Brooklyn Daily Times* says:—"We are happy to know that our friend, Dr. Hurd, is succeeding beyond all expectations with his Mouth Wash and Tooth Powder. The great secret of his success rests with the fact that his articles are precisely what they are represented to be, as we can testify from our long use."

The well-known P. T. Barnum writes:—"I found your Tooth Powder so good that my family have used it all up. We find it the best powder for the teeth that we ever used. I shall feel obliged if you will send me another supply at the Museum at your convenience, with the bill."

But their cost is so small that every one may test the matter for himself. Beware of the ordinary Tooth Powders. Dr. Hurd's Tooth Powder contains no acid, nor alkali, nor charcoal, and polishes without wearing the enamel. Use no other.

**WHAT DOES DR. HURD'S REMEDIES EFFECT?** Dr. Hurd's Mouth Wash and Tooth Powder will give young ladies that finest charm in woman—a sweet breath and pearly teeth. Try them, ladies.

Dr. Hurd's Mouth Wash and Tooth Powder make the mouth fresh, all night exhilarating, and if used in the morning, will make the breakfast taste sweeter and the day begin more pleasantly. Hundreds of persons can testify to this. Try them, gentlemen.

Dr. Hurd's Mouth Wash and Tooth Powder are the best preparations in the world for curing BAD BREATH and giving firmness and health to the gums. Hundreds of cases of Diseased Bleeding Gums, Sore Mouth, Canker, etc., have been cured by Dr. Hurd's astringent wash.

Dr. Hurd's Mouth Wash and Tooth Powder give an additional charm to courtship, and make husbands and wives as agreeable to their wives and wives to their husbands. They should be used by every person having ARTIFICIAL TEETH, which are liable to impart a taint to the mouth.

Dr. Hurd's Toothache Drops cure Toothache arising from exposed nerves, and are the best friends that parents can have in the house to save their children from torture and themselves from loss of sleep and sympathetic suffering.

Farmers and Mechanics! you cannot well afford to neglect your teeth. For a trifling sum, you can now get preservatives than which Rotisschid or Astor can get nothing better. Remember that Dyspepsia and Consumption of the Lungs often originate in Neglect of Teeth. Send for the *Treatise on Teeth*, and read Dr. Fitch's observation on this subject. If too late to arrest decay in your own teeth, save your children's teeth.

**Neuralgia Plasters.** Dr. Hurd's Neuralgia Non-adhesive Plasters are the most pleasant and successful remedies ever prescribed for this painful disease. The patient applies one, soon becomes drowsy, falls asleep, and awakes free from pain, and no blister or other unpleasant or injurious consequences ensue. For Earache and Nervous Headache, apply according to directions, and relief will surely follow. Nothing can be obtained equal to Dr. Hurd's Compress for Neuralgia. Try them. They are entirely a novel, curious, and original preparation, and wonderfully successful. They are of two sizes, one small, for the face, price 15 cents, and the other large, for application to the body, price 37 cents. Will be mailed on receipt of price and one stamp.

**WHAT ARE THE PEOPLE DOING?** The American people are intelligent enough to appreciate preparations that contribute so much to the happiness of those using them, and they want them. Every mail brings us letters, some ordering the TREATISE ON TEETH, some the NEURALGIA PLASTERS, and not a few enclosing 37 cents for the MOUTH WASH, to be sent by mail; but to those we are compelled to reply that it is impossible to send a half-pint bottle by mail. The people want these Remedies. Who will supply them? Now is the

**Chance for Agents.** Shrewd agents can make a small fortune in carrying these articles around to families. The Dental Treasury is the nearest article that man or woman can carry around. Send for one and see, or, better, a dozen, which we will sell as samples for \$7. **WM. B. HURD & CO.** Tribune Buildings, New York.

That remittances may be made with confidence, W. B. H. & Co. refer to the Mayor of Brooklyn; to G. W. Griffith, Presid't Farmers' and Citizens' Bank, Brooklyn, and to others.

## THE DAY SCHOOL BELL.

A NEW SINGING BOOK FOR DAY SCHOOLS, called the DAY SCHOOL BELL, is now ready. It contains about 200 pages of choice Songs, Choruses, Catches, Duets, Trios, Quartets, and Choruses, many of them written expressly for this work, besides 23 pages of the Elements of Music. The Elements are so easy and progressive, that ordinary teachers will find themselves, entirely successful in instructing even young scholars to sing correctly and scientifically, while the tunes and words embrace such a variety of lively, attractive and soul-stirring music and sentiments, that no trouble will be experienced in inducing all beginners to go on with zeal in acquiring skill in one of the most health-giving, beauty-improving, happiness-yielding, and order-producing exercises of school life. In simplicity of its elements in variety and adaptation of music, and in excellence and number of its songs, original, selected, and adapted, it claims by much to excel all competitors. It will be found to be the best book ever issued for Seminaries, Academies, and Public Schools. A few sample pages of the Elements, Tunes, and Songs, are given in a circular; send and get one. It is compiled by **HORACE WATERS,** Author of "Sabbath-School Bells." Nos. 1 and 2, of which have had the enormous sale of 655,000 in 36 months.
