At the Oyster Supper for the benefit of the Lewisville Academy given last Friday night, the sum of \$231,57 was received.

We are requested by Prothonotary Olmsted to give notice to Constables and others who have returns to make to February Court, not to appear until Thursday of that gage shall claim.

A Teachers' Institute (County) will be held in Lewisville, commencing the first Monday in March and to continue during the

the 14th of Feb. Brown's Bronchist Troches. The beneficial effects resulting from the use of this lemedy and its extensive use for Coughs, Colds, and Throat Affections, has brought out many imitations, most of which contain injurious ingredients. The Troches have proved their efficiery. cure bargains!

We send out this week bills to almost every one indebted to this office, and expect prompt answers. After the 1st of March we expect to manage the Jounnal upon a different system than that of credit. If Congress does not reduce the tax on paper we will be compelled to follow the example of almost every paper in the State and charge Two Dollars or Two Fifty per year. All those who desire the Journal had better subscribe in advance, now. The Oil investigations the coming Summer will give additional interest to a county paper. - Where bills are not paid, they will be placed in the hands of some one authorized to collect them.

We are apt to be free with our jokes upon Doctors and their drugs, until sick and in need of their aid, then all alike bow to the nn need of their aid, then all alike bow to the necessity of recourse to their hard-carned and often ill-requited skill. The prevailing belief that physicians frown upon whatever deviates from their peculiar, system and usages, arises from the fact that their better information leads them somest to detect and information leads them somest to detect and discard the medical delusions and impositions that are thrust upon the community. That they are ready and prompt to adopt any really valuable invention is seen by the treatment Dr. J. C. Ayer's Chemical Remedies have received at their hands. They appreciate the value of these medicines because they know their composition, and where is the man who ever heard a respectable physician either disdiscourage their use? profession or pursuit has done more for the human family than the medical profession None is followed by nobler men or for nabler ends; nor is there one which better deserves the thanks of mankind .- Clinton (N. Y.) Democrat.

Petroleum and Salt.

To the Editor of the Petroleum Recorder: It is asserted as a fact beyond question numerous articles in your paper, particularly those referring to the Sinnemahoning region of Northern Pennsylvania, that Petroleum is the product of bituminous coal. This is asaumed, I imagine, because such coul if tound in these and other localities where coal is found in these and other localities where oil is found." But I am not satisfied with this theory. Chemical analysis has shown that Petrolenm may be produced by certain combigations of salt and lime. Now in many localities, oil is found where coal does not exist; but salt and gas is always found, and, so far as I have learned, limestone also. This is particularly the case upon the headwaters of the Allgheny and Sinnemuhoning rivers in Cameron and Potter Counties, which is now attracting so much attention from oil seekers. It is true that there are mountains of coal in that region, but it is equally true that there are large deposits of limestone rock on the west bank of the Sinnemahoning and east bank of the Allegheny rivers, both of which head in Potter County; and this, combined with the strong saline water alluded to. would, in my mind, most certainly account for the gas and oil found there, on purely scientific principles.
