### U.S. 7-30 LOAN.

The Secretary of the Treasury gives notice that subscriptions will be received for Coupon Treasury Notes, payable from Aug. 15th, 1864, with semi-annual interest at the rate of seven and three-tenths per cent. per annum, prin-chaland interest both to be paid in lawful money.

These notes will be convertible at the eption of the noider at maturity, into six per cent. gold bearing bonds, payable not less than five nor more than twenty years from their date, as the Government may elect. They will be issued in denominations of \$50, \$100, \$500, \$500, \$100, and \$5,000 and \$5,

by the Treasury Department upon the receipt of the bill for the amount, certified to by the most whom the deposit was made. No deductions for commissions must be made other publication that has come under our

from the deposits.

SPECIAL ADVANTAGES of this LOAN. It is a National Savings Bank, offering a higher rate of interest than any other, and the best security. Any savings bank which pays its depositors in U. S. Notes, considers that it is paying in the best circulating medium of the country, and it cannot pay in any the other for its own assets are either in the Office of Publication thing better, for its own assets are either in the Office of Publication.

The postage on Harper's Magazine is 24 cts payable in government paper.

It is equally convenient as a temporary or post-office.

permanent investment. The notes can always be sold for within a fraction of their face and accumulated interest, and are the best security with banks as collatterals for discounts.

Convertible into a Six per cent. 5-20 Gold Bond. In addition to the very liberal interest on the notes for three years, this privilege of conversion is now worth about three per cent. for the current rate for 5-20 Bonds is not less than nine per cent. premium, and before the war the premium on six per cent. U. S. stocks was over twenty per cent. It will be seen that the actual profit on this lban, at the present market rate, is not less than ten per cent. per

But aside from all the advantages we have enumerated, a special Act of Congress exlempts all bonds and Treasury notes from local taxation. On the average, this exemption is worth about two percent. per annum, according to the rate of taxation in various parts of

the country.

It is believed that no securities offer so great inducements to lenders as those issued by the government. In all other forms of indebtedness, the faith or ability of private parties, or stock companies, or separate communities, only, is pledged for payment, while the whole property of the country is held to secure the discharge of all the obligations of the United

States. While the government offers the most liberal terms for its loads, it believes that the very stronge: tappeal will be to the loyalty and patriotism of the people.

Duplicate certificates will be issued for all deposition.

deposits. The party depositing must endorse upon the original certificate the denomination of notes required, and whether they are to be ssued in blank or payable to order. When so endorsed it must be left with the officer receiving the deposit, to be forwarded to the Treasury Department.
Subscriptions will be received by the Treas-

Depositor es, and by the
