THE POTTER COUNTY JOURNAL

Condensport, Tuesday Evening, Feb. 6, 1866. Local and General.

The Annual Statement of the County Commissioners and Auditors will be found on our second page. Study them!

We call the attention of all desiring a pleasant and profitable employment to the advertisement in this paper headed "\$15.000 per year."

S. C. Phelps, late landlord of the Union House, advertises that he will take boarders during Court and at other times.

Mr. Brennele is out with a new card. We commend it to the attention of all in need of work in his line. He is a good workman, neat and tasteful, besides being an honest man.

Our columns are crowded with new and paying advertisements, and to give our subscribers a fair portion of reading matter we issue seven long columns extra this week containing the Governor's Message and other items of interest. This cost us considerable additional expense and we hope our friends will appreciate it properly.

The Potter Journal comes to us lately very much improved in appearance. Our neighbor is not enlarged, (which we consider a foolish move in these days of paper monopolies) but procured new and smaller type, with which he can publish as much reading matter as any of the 7 column papers in the country. We are pleased with this evidence of your prosperity, friend McLainey. "May your shadow never grow less."—M. Kean. Mar.

SMALL QUANTITY.

One teaspoonful of that world renowned remedy, Coe's Dyspepsia Cure, taken after meals, will enable the most delicate and feeble to eat anything he chooses, without fear of any distressing effects. It is a blessing to all who are troubled with diseases pertaining to the stomach and bowels.

The proprietors of Coe's Cough Balsam say, take little and often. This is the secret of its success. It will not harm you to take it often, and every time you take it, you will see its beneficial effects.

The following interesting item was translated from the German for the JOURNAL, by a son of Mr. Christian Brennele, and occasions a new thought in connection with the population of the first world:

The size of Man.—A member of the Academy of Inscription at Paris, has given that society, a chronological scale of the size of man since the creation of the World, up to the birth of Christ, from which we see that there has been a great degeneration among the race of men.

If we can believe the table of the highly learned Academicist our honored fore-father Adam, was no less than 123 feet and 9 inches, and his companion Eve 118 feet and 9 inches. His first son was already 90 feet smaller than the humble height of 28 French feet. We can feel ourselves better acquainted with Moses for he was (as the Academicist has correctly ascertained) but only 10 feet high.

Bye and bye there has fortunately been a stop put to the shrinking, or we might at present have come down to the diminutive size, so that M. Tom Thumb would appear as a giant amongst us.

Hercules was about 10 feet high yet, (as we can see from the Academicist's table) there is no wonder that he could so easily overpower the big Lion.
