USEFUL AND SUGGESTIVE.

Milk for Hens. We have generally had very good success in inducing our fowls to lay in winter, but an acquaintance has for three consecutive years beat us at that game. This season he has been doing it with our fowls, that is with pullets procured of us, showing that it is management, not breed, that must account for it. We have visited his farmand repeatedly and made observations, and yard repeatedly and made observations, and he is very frank in describing his method, and the result is we are convinced that an ample allowance of skimmed milk is all the magic there is about it. His fowls roost in a lean-to which is not only on the north side of the barn, but is not especially tight either. The only chance they have for sun is free range out of doors, and the run of several long sheds, which, though facing the south, are unglazed, and entirely open on that side, and so high that the birds may be said to live day and night in an atmos-phere nearly as cold as in an open field.— We mention these particulars to show that we are not to look to warm quarters for an explanation of the prolificness exhibited.—
We add that they do not lay on account of being hatched extra early, but on the contrary they came off last May. They commenced laying in October, and have been it it every since to the astonishment, if not

at it every since, to the astonishment, if not the envy of the neighbors of the fortunate owner, who has been selling eggs for the past four months at 45 cents per dozen, and upwards. Not one particle of meat or scraps is given, and but the veriest trifle of vegeta ble food is fed in the shape of a few boiled potatoes about once a week. An abundance of grain is allowed of various sorts, ground and unground, but never cooked, and plen-ty of unburnt oyster shells pounded are at all times accessible. They have a pailful of skimmed milk every day so that they can help themselves to all they want, no other drink being provided.

Now there are other fowls, and plenty of them, on hundreds of farms, of just the

same breed as those of our friend, and of the same age, which are allowed just as good rations of grain, potatoes and pounded oyster shells, and just about the same sort of buildings and range, that do not lay from October to February. Moreover, it is not during exceptional season that this has been done, but as we have said, it has occurred year after year. We are satisfied that it is the milk that accounts for it.—Skimmed milk and the whites of eggs are very much alike, and though the cream has been separated, undoubtedly the full allowance of Indian corn supplies the oily constituents of the yolks. Some farmers think they can not afford to give milk to hens, but must save it for the pigs. But if skimmed milk is worth one and one-half cents per quart to feed swine as some claim, it is worth three cents for poultry, if by its use winter eggs can be obtained and sold at high prices. - Poultry World.

The Tomato and its Culture.

This delicious, delicately acid, cooling healthful, and now almost indispensable fruit, whose hygienic qualities have been tested by the human system, (that most perfect of laboratories,) is, by careful culture, being brought to perfection; and instead of coarse, unsightly, spongy, seedy, ill-flavored tomatoes, the desirable qualities of earliness, productiveness, size, solidity, fewness of seeds, evenness of form, richness of flavor, and beauty of color may be seen.

vor, and beauty of color may be secured.

How to Start the Plants.—For family use, to get early fruit, sow seed from the earliest ripened fruit (in a little box containing three or four inches of rich soil) in the neighborhood of New York, any time from the beginning of March till the opening of spring; and for a late crop sow seed when the spring opens in the open ground. Plants from the latter will fruit till frost comes, and longer if protected. Place the little box near a window where the sun can shine on it, in a warm room of even temperature. Water with tepid water once a day. Let the plants have light and sunshine, and all the fresh air they can stand. Ill grown plants, crowd- to evangelize Europe and the United States ed to suffocation, such as are seen in most

dealers' hotbeds, have little value.

Transplanting.—When the rough leaves come transplant into pots, or a box, and do so three or four times before open ground to her scalp. She had much difficulty in 3 40 pm 9 40 am 9 40 am 9 40 am 9 33 am 10 pm 10 p culture. Water freely each time before transplanting, so that a ball of earth may be removed with each plant.

Open Ground Culture.—Do not plant in the open ground unless the plants are protected till all danger of frost is over. They will flourish in a rather light than heavy will flourish in a rather light than heavy.

It her scalp. She had much dimettly in getting them loose. She don't wear a jute sail on 9 18 sm witch any more.

Here's another mystery. The New York of the plants are protected till all danger of frost is over. They will flourish in a rather light than heavy.

Railway stock recorded in the name of *Flag Stations.*

will flourish in a rather light than heavy and rich, but not over-rich soil. Hoe early and often. Let no weeds grow. Keep the soil friable. Pruning.—The advantages of pruning

have been questioned, but my tomatoes do best when well pruned. Cut out all suckers and non-bearing branches. Let in air, light, and sunshine. Most of the fruit always grows on the lower part of the vines, and there will be no loss in shortening the vines; for nutrition will then flow to fruit instead of making fiber.

Supporting the Vines.—It is sometimes thought well in garden culture to support the vines by brush or other refuse material, or by training, which may be done by setting poles twelve feet apart, the tops five feet out of the ground. Attach wires to them horizontally. Thus the fruit may be exposed to the free action of sun and air.

How Deep to Plant Seeds.

On this subject the monthly report of the Department of Agriculture says:

'The proper depth to plant seeds is a question of considerable importance, and one which like many other similar questions relating to plant growth, cannot receive a definite answer that would be of general or universal application. In dry, sandy soils, situated in dry climates, a deep-er covering will be required than would be judicious where both soil and climate indicate the reverse of these conditions. For instance, it has been shown that peas continue longer in bearing condition on sandy soils, when sown at a depth of 6 inches,

than they do when placed nearer the surface; and it is said that the Indians on the table lands of Colorado plant corn 10 to 12 inches below the surface with the best results; but if planted with only 1 or 2 inches of covering, the crop fails. Seeds also vary in their ability to penetrate depths of soil in germinating.

Leguminous seeds, and some of the largest seeding gramine, can be planted deeper than those of a lighter character. It has been given as a general rule that all from the Gymnase of Paris. seeds germinate most speedily when covered

THE BEST VEAST-IN THE WORLD.—Boil a pint bowl full of hops in two gallons of water, strain and add a teacupful of flour, one of brown sugar, a teaspoonful of salt.— No yeast is required to raise it. Let it stand have days in a warm place, and it will then begin to foam. Then boil three pounds of potatocs, mash fine, and add them to the cast, and stirthe whole well together; then but it into a jug and cork tight and set in a ool place. It should be made at least two weeks before using, and it will keep good any length of time, and grow better all the hile. A small teacupful is sufficient for make a new jug full in the same way, and keep it corked tight, and you never need go to the baker's or brewer's for yeast. Since Violet of bread. When this is gone.

writing the above, my wife opened a large bottle full of this yeast, that had been sealed and put in the cellar for more than a year, and the usual quantity raised her bread splendidly.—Rural New Yorker. To CLEAN PAINT.—Use but little water at a time; keep it warm and clean by chang-A flunnel cloth is better than

cotton. Be careful of soap. Put but a lit-tle soap or skim milk in the water; add, soap to the cloth when needed. A sharp piece of soft wood is indispensable for the cornof soft wood is indispensable for the corners; the point will become like a paint brush. A saucer of sifted ashes, used where paint is badly smoked or fly specks are thick, is better than soap; wipe last with clean wettowel, and don't spill a drop of water—Never put soap on glass unless it can bely limited, which can never be the case with windows; wash off dirt in clean warm water and dry; then with a paste of whiting and water, and with a little cloth, place a little in the center of each pane. With another cloth rinse over the glass; next rub another cloth rinse over the glass; next rub affectation." off with a dry cloth till the window shines

BILL BISCUIT. Bill Biscuit was a baker bold,

And high he held his head, Well off was he in stocks and gold, And yet he kneaded bread. O'er his dough-minions one sweet child . Asserted sovereign power;

No fairer bud in garden wile E'er blossomed into flower. A butcher boy, young, poor, alone, Wearing his fingers to the bone,

In making both ends meet. Poor butcher Jim had sought to woo This lass for many a year, But speak not, as his fear still grew,

She was above his sphere. But love strange things oft brings about, And so Jim's qualms were braved,

One happy day he waived all doubt When she her kerchief waved. He sought her side, she sighed and smiled, He plead with vow and tear,

He said, "Oh, let, endearing child, My single life end here."

Of course to love so strongly pressed, She yielded. For although A high-strung girl, her quivering heart Ne'er yet had owned a beau. Her little head was all awhirl,

In an ecstatic state; ; ; She was an animated girl, And pined for any mate. Recked not these sighers of sires, who

Consent might not concede, "My heart starves with a greed for you," She answered him, "agreed." He yowed if he could raise a loan,

Alone they'd fly the shore, "In some far clime, adored one," Here Bill climbed in a door. Escape shut off, no time to pause, The oven opened wide, They saw, plunged in its iron jaws. To save their hides and hide.

We draw a veil, for what avail Details of their sad fate; They early died, so ends the tale, Twere uscless to dilate.

Long with the morning bread, And mourning straight turned Bill devout, 'Ane then it turned his head.

The moral this-men, shun dear girls, Who secret love men-tion, What's done can never be men-ded By men dead, though well done. ALL SORTS.

Billings says: "He who will flatter anothr, will rob him, if he gets a good chance.' A monument to the memory of old John Brown is to be erected at Harper's Ferry, it a site can be obtained. A Cincinnati paper describes the pattern

of a Dolly Varden as "red floss rhinocerosses rooting up a black satin morass." Wendell Phillips says his lecture on "The Lost Arts" has never been written, a faithful memory only preserving the outlines. Russian leather fans are considered appropriate for full dress, and are made round-

to his clergy forbidding the employment or admission of women as singers in church choirs.

The royal family of England costs the people to support over £700,000 per annum, or the sum of \$3,500,000. It is paying pretty dear for the sort of "whistle" they

"I'm so thirsty," said a boy at work in the cornfield. "Well, work away," said his industrious father, "you know the proph-et says, 'Hoe, every one that thirsteth." We like to see faith in ideas, but the appointment by the Mormons of missionaries

looks very much as if the tail was trying to

James Fisk, Jr.

was the prompt reply. Mr. John W. Odin, of Concord, has received the appointment of private secretary to P. S. Gilmore during the World's Peace

Jubilee, which is near at hand, the same position which he held in the Peace Jubilee of 1869. They have a rather singular railroad in

East Tennessee. A newspaper at Jonesboro' speaks of that place as its termini." It is 905 am 8 37 pm 8 27 pm iot one time in a thousand that you find a railroad with both ends sticking into the same town.

A spiritualistic journal, published in Australia, says that Gladstone, the English Prime Minister, is a firm and faithful believer in that doctrine, and knows himself to be spiritually inspired in all his great works of political progression.

Rev. Augusta J. Chapin, pastor of the Universalist Church in Iowa City, exchanges regulary with all the male ministers in the vicinity, and she preaches so well that the reverend gentlemen she exchanges with are unpopular among their congregations

forever after. A real impetuous laugh dissipates many illusions, sweeps the twilight out of our imaginations, and brings honest daylight. No dry, hacking laugh. It should be spontaneous. We have seen men fall to laughing, who had not heard the cause of mirth, but only had caught the contagion of other men's laughing. It is hard not to laugh with men who are in carnest about it.

A remarkable change is said to have lately come over the Khedive of Egypt. From an ambitious sovereign he has become an intense admirer of the opera and devoted patron of the drama—resigning prospects of soverignty over the Soudan, and severance from the Turkish suserainty, in new operas of Verdi and representations of dramas

Prince Arthur turned the first sod on an with a depth of soil equal to their own thick-ness, and where the constant presence of spade and an ornamental wheelbarrow were sufficient moisture for germinating can be provided. II. R. II. went to work with such maintained; this rule is, perhaps, as nearly vigor that he broke the spade-handle at the correct as any that can be given.

were made before shovels, he lifted the turf into the barrow with his hands, to the in-

tense gratification of the assembled thous-ands, who hailed with cheers this act of royal magnanimity. A Pulaski bride for several days recently was the subject of constant attacks from an miscen foe. Whenever she was in the vicinity of a window or near the door, stones flung-by invisible hands would come crashing through the glass, or the door would open and a rock fly in. She was wounded se-

verely by these mysterious missives in various parts of her body, and finally each at-tack would throw her into convulsions.— Her persecutor is supposed to be a young man of that city whom she jilted. A miniature Dend Sea has been discovered in Nevada. It lies in an oval basin, 150 feet below the surface of the plain, the banks shelving down with as much symmetry as if fashioned by art. The water of this lake is impregnated with soluble substances, mostly borax, soda, and salt, to a degree that renders it almost ropy with

slime and so dense that a person can float on it without effort. This lake has no vis-ible outlet or inlet, but being of great depth is probably fed by springs far down in the The Graphic says of Kate Field: "But few can doubt the clearness of her insight,

Earthquakes appear to be steadily on the increase. According to the best authorities there were in the fourth century twenty-

Ayer's Cherry Pectoral,

such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma, and Consumption.

Among the great discoveries of modern science, few are of mankind than this ef-

CHERRY PROTORAL will and does relieve and cure the afflicting disorders of the Throat and Lungs beyond any other medicine. The most dangerous affections of the Pulmonary Organs yield to its power; and cases of Consumption, cured by this preparation, are publicly known, so remarkable as hardly to be believed, were they not proven beyond dispute. As a remedy it is adequate, on which the public may rely for full protection. By curing Coughs, the forerunners of more serious disease, it saves unnumbered lives, and an amount of suffering not to be computed. It challenges trial, and convinces the most sceptical. Every family should keep it on hand as a protection against the early and unperceived attack of Pulmonary Affections, which are easily met at first, but which become incurable, and too often fatal, if neglected. Tender lungs need this defence; and it is unwise to be without it. As a safeguard to children, amid the distrossing diseases which beset the Throat the distressing diseases which beset the Threat and Chest of childhood, CHERRY PECTORAL is invaluable; for, by its titlely use, multi-tudes are rescued from premiture grayes, and saved to the love and affection centred on them.

saved to the love and affection contred on them. It acts speedily and surely against ordinary colds, securing sound and health-restoring eleep. No one will suffer troublesome Influenza and painful Bronchitis, when they know how easily they can be cured.

Originally the product of long, laborious, and successful chemical investigation, no cost or toll is spared in inaking every bottle in the utmost possible perfection. It may be confidently relied upon as possessing all the virtues it has ever exhibited, and capable of producing cures as memorable as the greatest it has ever effected.

New Spring Goods in Corning!

We now have a full and very complete stock of

Staple and Fancy Dry Goods,

uited to the SPRING TRADE, and additions made almost daily, to which we jinvite the attention of all in want of DRY GOODS of any kind or variety. We make a specially of

CLOTHS & CARPETS.

and in both or cities of these departments, we are not excelled in this section. Our Cloths will be made to

SKILLED WORKMEN.

We take pride in our CARPET DEPARTMENT as one of the institutions of the town, and as it comprises about MU rails of all prices from 25 cours to \$2,50, we can suit almost any customer in quality and price, and none need pass our village to find a variety. Almost the entire stock was purchased before the advance, and we shall sell as near to old prices as possible. None need wait to buy cheaper, as they are continually advancing in market.

The citizens of Tioga County are cordially invited to call and see us.

Corney, March, 1872. SMITH & WAITE

C. C. Mathers's Cheap Cash Store.

All hail! creation far and near; Of Mathers's Store you soon shall hear; Let pealing Drums and Cannons' roar Proclaim the news from shore to shore:

Mathers's stock is now complete; He has good goods and sells them cheap. He trusts no one, but sells for cash, And sell so cheap some think him rash.

Some said he would break in a short time, But if he does then this don't rhyme; For he sells heaps and sells them right, And has his cash for all at night. Of Boots and Shoes so very cheap,

I'll take a moments time to speak; Delighted too you can't but be, With prices and the quality. He does his business on the square; That is, he does it right and fair. He says at once just what he'll do, And what he says is right and true. I cannot stop to enumerate

I have bargains both good and great. My stock is plentiful, cheap and fine, Especially in the Dry Goods line. Mathers's Boot & Shoe, Hat & Cap, Dry Goods & Grocery Store is the cheapest place in Tioga county to buy goods. Give it a trial and you will be convinced.

"Charley" has just returned from New York with a large stock of Spring Goods, which he will, on account of his immense trade; sell at less profit than before, and which he has bought much cheaper than ever.
