USEFUL AND SUGGESTIVE.

A correspondent of the Country Gentleman says: I would say to E. R. that the common gad-fly (Estrus boxis) is a severe torment to all kinds of cattley especially in the wooded or timber districts. On our western prairies we are troubled to some extent, but in the opening the cattle suffer much from these plagues. Mr. G. E. B. is wrong; the Ukstrus boxis does not, as does the Estrus equi, deposits its ova or eggs on the hair; it punctures the skin of the animal, and therein deposits eggs, which, if unmolested, remain until the following spring, when the full grown maggot must for his own safety seek a fresh home, or like the fætus past the proper time of parturition, die. Now for my remedy. All persons at all acquainted with stock will notice that the bot-fly looks, as a rule, only for suitable parts in the front, or parts within reach of the mouth. Why? Simply from instinct, for the bot can only be propagated by being taken into the stom-Grubs in the Skin of Cattle. Simply from instinct, for the bot can only be propagated by being taken into the stomach of the horse, where it remains, as the cattle maggot does in the skin, until fresh quarters are necessary, as a longer residence in the stomach is death. Horses, like cattle, suffer more in the timber than in the open country, and are little troubled when kept in the stable and well and carefully groomed, for whatever of the eggs may be adhering to the hairs of such a horse may be removed the hairs of such a horse may be removed by rubbing and easily by the edge of a knife. This is the only remedy for bots, for once in the stomach, there they remain until they are ready for a new life. None but the quack attempts their removal; no medicine, not of sufficient strength to kill several horses, would dislodge them from the coating of the stonach or in anywise seriously interfere with them. The milk and molasses and such nonsense as I have seen recommended in the papers, is ridiculous.

There is a much better chance to destroy these pests when in the skin, and a much casier way to prevent them getting there.—
The same most wonderful instinct guides the gad-fiy of the bovine; they seem as though they knew of the rough tongue he possesses, with which, if within his reach, he would lick off the deposited egg, and so they select such parts as are out of the reach of the tongue, and where do we most—nay. of the tongue; and where do we most—nay, only—find them? Along the back, and behind the shoulders. What then are we to do? Wlly, examine on every opportunity these parts and destroy the embryo maggot, which is easily done by touching each in turn with a strong solution of carbolic acid. Better still is the following: sublimated sulphur loz., and pulverized charcoal loz.

Change of Seed.

given occasionally as a dose, will entirely prevent the eggs from hatching; and if

It has long been the practice of some of our farmers in the Middle States to occasionally procure seed potatoes and grains from more northerly localities. Oats and potatoes in particular appear to be more perfectly developed in a cold climate than in a warm one, and they retain in a measure their inherent vigor for a year on two after removal to a less congenial soil and climate. Hence the importance of a fre-

we are not prepared to assert that the apparent deterioration could not in a measure be prevented by proper culture, but the well-known fact that a change does take place is sufficient to show that a new importation of seed is occasionally needed. Many of the farmers in this vicinity have proved by years of experience that it pays them handsomely to buy their seed potatoes annually in more northern markets, even if they have to sell reverse course, and procure tubers for planting from the South

The same principle should be applied to any other vegetables, cereals and fruits, especially to the annuals and biennials.— Melon seed from the South will usually produce earlier fruit, and often of larger and better quality, than that raised at the North. There is also a difference in the climate on the same parallels of latitude, and an ex-change of seed between the Eastern and change of products of the soil than there should be in these days of rapid transit and cheap transportation. We are very certain that if our horticulturists and agriculturists would study more closely the climatic officer upon vegetation. upon vegetation, they could turn the knowledge obtained to valuable account, not only to themselves, but to science.—New York

Care of Horses at Night.

Few men who handle horses give proper attention to the legs and feet. Especially is this the case on farms. Much time is spent of a morning in rubbing, brushing and smoothing the hair on the sides and hips, but at no time are the feet examined and tered wat properly cared for. Now, be it known, that ly opens. the feet of a horse require more care than the leet of a horse require more care than the body. They need ten times as much, for in one respect they are almost the entire horse. All the grooming that can be done won't avail anything if the horse is forced to stand where his feet will be filthy. In this case the feet will become disordered, and the legs will get badly out of fix; and with bad feet and bad legs, there is not much left of feet and bad legs, there is not much left of the horse fit for anything. Stable prisons are generally severe on the feet and legs of herses, and unless these prisons can afford he day room, where a horse can walk around, he down, or roll over, they are not half so he dthy to the horse as the pasture, and should be avoided by all good hosters in the country --North British Review.

For the Household.

RASPECTRIES These can be preserved for ace cream or cakes or tarts, without boiling. They should be picked when the fruit is dry, and put at once into a deep bowl or pan and bruised gently. Mix with an equal weight of best "sifted" sugar, and put immediately into wide-necked bottles; cork those firmly without dalay and to bladdors. these firmly without delay, and tie bladders over the tops. Keep in a cool place or the fruit will ferment. This mixture should be stirred softly, and only just sufficient to blend the sugar and the fruit. The bottles must be perfectly dry and the bladders, after having been cleaned in the usual way, and allowed to become nearly dry, should be moistened with a little whisky or alcohol on the side next the cork. I have thus successfully put up respherical for future way. cessfully put up rassberries for future use. WASHING FLANNEL.—Many persons buy flaunel partly cotton to avoid the shrinkage in washing which is supposed to be inevita-ble. We have in the house all wool Shaker thannel which has been washed every other week for two years, and although nearly worn out, the shrinkage is scarcely perceptible. The secret of washing-lies in two particulars. First, the soap used must contain no tosin, as this hardens the fibres of the wood. Flannel soap, so-called, is manufactured by one leading soap boilers, and differs from other laundry soaps chiefly in containing no fosin. Second, no water below 10 or 112 degrees Fahrenheit ever comes in contact with the flannel. Our white flanded to be precedented over all the rest of the nels take precedence over all the rest of the washing. We fill the Doty washer with soap suds, pass the flannels through it, wring

them out, scald in blue water, wring again and hang out immediately, then go on with the rest of the washing. Blankets are washed in this way as easily as sheets, and feel as soft and look as nice almost as when they came from the store. If one has no washer, with a wringer and pounding barrel, blank-ets and flannels need never come in contact with any but boiling water. - Tribune. To restore the original appearance to white flannel which has turned yellowish by lying

for a long time or by wear, soak for an hour in a weak solution of bisulphate of soda,

The flannel will be purely white.

Cleaning Tinware.—An experienced housekeeper says the best thing for cleaning tinware is common soda. She gives the following directions: Dampen a cloth and dip in soda and rub the ware briskly, after which wine dry. Any blackened ware can thus be wine dry. Any blackened ware can thus be disaster of '68."

Greecy at Dampen, Could we instruct that conviction, could we insist upon his indorsement? Personally solicit a fair share of trade. "Small prome and upon returns," we believe to be a good business maxim: and we hold the best goods, to be the cheapest. We keep no shoday. Our assortment is enflicient to meet against him, but we do not now believe he is available. We fear a reputation of the disaster of '68."

DERRY & FISHLER.

A BUBLESQUE OF MRS. BROWNING. [In "Fly-Leaves," a volume of varses by S. C. Calverley, soon to be published, there will be found the following "Ballad," which is less majeste to the fame of Mrs. Browning. The best English critics tell us that no such amusing parodies have appeared since the "Rejected Addresses."]

J. B. ANDERSON, AGENT.

of all kinds.

Parlor, Cook and Office

The auld wife sat at her ivied door,
(Butter and eggs and a pound of cheese)
A thing she had frequently done before;
And her spectacles lay on her aproned knees. The piper he piped on the hill-top high (Butter and eggs and a pound of theese).

Till the cow said "I die," and the possessed "Why?"
And the dog said nothing; but searched for fless.

The farmer he strode through the square farm-yard (Eutter and eggs and a pound of cheese) His last brew of ale was a trills haud— The connection of which with the plot one sees. The farmer's daughter hath frank blue eyes; (Butter and ergs and a pound of cheese) the hears the rocks caw in the windy skies, As she afte at her lattice and shells her peas.

The tarmer's daughter hath red ripe lips;
Butter and eggs and a pound of cheese;
If you try to approach her, away she skips
Over tables and chans with apparent case.

The farmer's daughter hath soft brown hali; (Buiter and exgs and a pound of cheese)
And I met with a ballad. I can't say whore;
Which wholly consisted of lines like these. PART II. PART II.

She sat with her hands 'neath her duopled cheeks.
(Butter and eggs and a pound of cheese)
And spake not a word. While a lady speaks
There is hope, but she didn't even sneeze.

She sat, with her hands neath her crimson checks (Butter and eggs and a pound of cheese)
She gave up mending her father's breeks,
And let the cat roll in her best chemise.

She sat, with her hands 'neath her burning checks.
(Butter and eggs and a pound of cheese)
And gazed at the piper for thirteen weeks;
Then she followed hind out the misty leas. Her sheep followed her, as their tails did them. (Butter and eggs and a pound at cheese)
And this song is considered a perfect gent
And as to the meaning, it's what you please.

POLITICAL NOTES.

We are for the man that whaled, against he man that bailed, Jefferson Davis. There is said to be not a single Greeley Democratin Vermilion county, Indiana.

Both the Maryland Senators say if Greeley is nominated at Baltimore, Maryland will go for Grant.

As an "organ" the Tribune is not much of a success. It plays only one tune, and that s always pitched on G flat. "Admiral" Raphael Semmes supports Breeley. It will be pretty safe for patriots to vote against the man he wishes elected. Mr. John H. (lilmer, a leading Democrat of Virginia, declares that if Greeley should be nominated at Baltimore, he will vote for Grant and Wilson.

hatched, if the system be impregnated by sulphur, they all die—the cattle being, if proper care be taken of them, benefitted by the remedy and by no means injured. In this I am backet by Gunther, Simonds, G. Beauregard, Bragg, Hood, D. H. Hill, Gordon, and Mahone, all of rebel notoriety, come forward to announce that the Greeley ticket is satisfactory to them. The Poughkeepsie Eagle says that the

Palmer supports Greeley is false, 'as most of the Tribune's political intelligence is." The Kentucky Statesman says: Mr. Clay says Greeley has done wonders for the Re-publican cause. But of what value is a cow that gives a pail of milk, and then kicks it over?

The Greeley Democrats of the Fifth District of Maine have nominated for Congress an editor, whose office was knocked-into pi by the indignant citizens of Bangor, during the rebellion, for his incessant distoyal utterances.

Judge Stallo says that "in my judgement the work of reform in this country, to be successful, must have a reasonable beginning. I do not believe it will come of fraud and duplicity." This is why he will not support Greeley as a reform candidate. A North Carolina Greelevite, presiding and the "moral dignity" of the Southern

The following is from the Watkins Evoress: "O. S. Winans-Winans, we all remember him—having been dismissed from the employ of the Eric Road by Gen. Dix. has naturally enough declared for Greeley and Brown. But why don't the Tribune publish his adhesion?"

The St. Paul Press says, Horace Gree-ley's first efforts as a Free Trader, were emgates at Philadelphia: "If Mr. Greeley had had his way, the Southern states would have been suffered to go out of the Union and we should still have been in slavery." Could

fewer words express the average estimate of Mr. Greeley's untrustworthiness? The Terre Haute (Ind.) Express says that painful, but well authenticated, report reaches it that the candidate for Vice Presi-

dent on the Greeley ticket has once more abandoned his total abstinence, and is in imminent danger of again indulging in but tered watermelon as soon as the season fair-

The Toledo Blude says: It will not surprise any one, but we may as well mention it, that one Sanders, the man who organized a

The Tribune can see no higher reason for party loyalty than office holding. If the Republican editors have not all got offices, it is sure their friends have. This reasoning is consistent in the Tribune, which has all along claimed that its only cause for bolting was that Fenton and Greeley could not control the New York patronage. Three of the most venomous opposers of

Grant, are Charles A. Dans, of the New York Sun, G. A. Townsend, the "Gath" correspondent of the Chicago Tribune, and Donn Piatt, of the Washington Capital.— They all were applicants for office, and all were refused. And of such material are President Grant's traducers composed. ·S. Pettebone, of Niagara Falls, is one of he Republicans who the Tribune has claimed by name as indorsing Greeley. To him the Ningara Falls Gazette thus alludes: "We have the best authority for saying that Mr. Pettebone will not desert his party, but will

support Grant and Wilson. It is mere des-peration for the Greeley men to thus use the names of honored Republicans." The Grant and Wilson Club at Green Bay, Wis., is called to order by a gavel manufactured from a piece of wood taken from the war ship Kenrsarge, which sent the "Liberal" Democratic vessel Alabama to the bottom of the sea in such an unconstitutional memory and the statement of the sea in such an unconstitutional memory was the statement of the sea. stitutional manner just at the close of the war. R. Semmes, President of the Mobile (Ala.) "Liberal Club," will probably remem-

per something about the affair. The Chicago Times takes a cheerful view The Chicago Times takes a cheerful view of the Greeley movement in Chicago, and illustrates in this way: "We inquired yesterday of the only Greeley Republican whom we have met in Chicago, (and he is a very moderate one,) 'Why don't you call a Greeley ratification meeting in this chief Western metropolis?' 'Well,' he answered, the fact is we done not we would have to 'the fact is we dare not: we would have to rely upon the Democrats to compose it, and it's doubtful how they would raily."

The Tribune says, "The platform of the Philadelphia convention recommends nearly everything that Gen. Grant has left undone."
Very true! that is just what we think they should have recommended—the things left undone. Those which are done need no recommending. In all this the Philadelphia convention did much more wisely than the Cincinnation of the latter made the blander. Cincinnati; for the latter made the blunder of recommending only what is already accomplished, the only exception being its "one term principle," and all the recommendations in the world can't help that.

The Richmond (Va.) Enquirer, while lendthen add a little dilute muriatic acid, stir well and cover the vessel for twenty minutes. After this, take the flannel out, rinse in plenty of soft water and dry in the sun. The flannel will be purely white.

(**Cleaning Tinware.**—An experienced housekeeper says the best thing for cleaning.**

The Richmond (Va.) Enquirer, while lending a reluctant support to Greeley, perceives the handwriting on the wall. Tearfully it says: "We honestly believe, with all the lights before us, that the nomination of Mr. Greeley at Baltimore will secure the election of Grant. With that conviction, could be in add a little dilute muriatic acid, stir ing a reluctant support to Greeley, perceives the handwriting on the wall. Tearfully it says: "We honestly believe, with all the lights before us, that the nomination of Mr. Greeley at Baltimore will secure the election of Grant. With that conviction, could be in the handwriting on the wall. Tearfully it says: "We honestly believe, with all the lights before us the handwriting on the wall. Tearfully it says: "We honestly believe, with all the lights before us the handwriting on the wall. Or Sugar-Conted, Concentrated, Root and Herbal Juice, Anti-Billous Granules. THE "LITTLE GIANT" CATHABTIC, or Multum in Parvo Physic.

The novelty of modern Medical, Chemical and Pharmaceutical Science. No use of any longer taking the large, repulsive and hauseous pills, composed of chemical ecinice, and bulky ingredients, when we can by a careful application of chemical science, extract all the cathartic and other medicinal properties from the inest valuable roots and herbs, and concentrate them into a minute Granule, scarcedly larger than a mustard beset, that can be readily swallowed by those of the most sensitive etomechs and factidious tastss. Each little Purgasive Pellet represents, in a most concentrated form, as much cathartic power as is embodied in any of the large pills found for sale in the drug shope. From their wonderbit cathartic power, in proportion to their size, people who have not tried them are apt to supplie that they are harsh or drustic in effect, but such is not at all the case, the different active medicinal principles of which they me composed being so harmonized and modified, one by the others, as to produce a most scarching and thorough, yet gonily and kindly operating cathartic.

\$600 Beward is heachy offered by the proprietor of these Pellets, to any chemist who, upon and all and will find in them any Caloncel or other forms

dysis, will find in them shy calomel or other forms of mercury or any other mineral poison.

Being entirely vegetable, no particular care is required while using them. They operate without disturbance to the constitution, diet, or occupation. A Mare Estrayed. On the 28th of June last, a mare belonging to the subscriber jumped out of the pasture on Eably's Creek and strayed away. She was a large mare, weighing about 1,150 lbs., sorrel, with both hind feet white, a small strip in her face, one side of her mane cut off, and about 7 years old. Whoever may find her is requested to take care of her, and send me word, and I will remove her and pay all charges. Address HENRY GREEN, July 10. '72-5w* Cedar Run, Lycoming Co., Pa.

Vinegas Bitters are not a vile Fancy Drink, made of Poor Ruin, Whiskey, Proof Spirits and Refuso Liquors, doctored, spiced, and sweetened to please the taste, called "Tonics," "Appetizers," "Restorers," &c., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the native roots and herbs of California, free from all Alcoholic Stimulants. They are the Great Blood Purifier and a Life-giving Principle, a Perfect Renovator and Invigorator of the System, carrying off all poisonous matter and restoring the blood to a healthy condition, enriching it, refreshing and invigorating both mind and body. They are easy of administration, prompt in their action, certain in their results, safe and reliable in all forms of disease.

No Person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair. of repair.

Dyspepsia or Indigestion. Headache, Pain in the Shoulders, Coughs, Tightness of the Chrst, Dizziness, Sour Eductations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the regions of the Kidneys, and a hundred other painful symptoms, are the offsprings of Dyspepsia. In these complaints it has no equal, and one bottle will prove a better guarantee of its merits than a lengthy advertisement.

For Femalo Complaints in young or old, married or single, at the dawn of womanhood, or the turn of life, these Tonic Bitters display so decided an influence that a marked improvement is soon perceptible.

For Inflammatory and Chronic Rheumatism and Gout, Dyspepsia or Indigestion, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have been most successful. Such Diseases are caused by Vitiated Blood, which is generally produced by derangement of the Digestive Organs.

They are a Gentle Purgative as well as a Tonic, possessing also the peculiar merit of acting as a powerful agent in relieving Congestion or Inflammation of the Liver and Visceral Organs, and in Bilious Diseases.

For Skin Diseases, Eruptions, Tetter, Salt-Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-worms, Scald-Head, Sore Eyes, Erysipelas, Itch, Scuris, Discolorations of the Skin, Humors and Diseases of the Skin, of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters. One bottle in such cases will convince the most incredulous of their curative effects.

Cleanse the Vitiated Blood whenever yout find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and clustical in the circular contents. of repair.

Dyspepsia or Indigention. Headache, Pain

Coughe Tightness of the Chest, Diz-

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.

Grateful thousands proclaim Vinecar Birrress the most wonderful Invigorant that ever sustained the sinking system.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. Says a distinguished physiologist: There is scarcely an individual upon the face of the earth whose body is exempt from the presence of worms. It is not upon the healthy elements of the body that worms exist, but upon the diseased humors and slimy deposits that breed these living monsters of disease. No system of Medicine, no vermitings, no anthelminities, will free the system from worms hke these Bitters.

Michanical Diseases. Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, will be subject to paralysis of the Bowels. To guard against this take a dose of Walkun's Vinhagar Bitters onco or twice a week, as a Preventive.

Bittons, Romittent, and Informittent Billous, Remittent, and Intermittent
Povers, which are so prevalent in the valleys of our
great rivers throughout the United States, especially
those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos,
Rio Grande, Pearl, Alabama, Mobile, Savannah, Rogncke, James, and many others, with their vast tributaries, throughout our entire country during the Summer
and Autumn, and remarkably so during seasons of
unusual heat and dryness, are invariably accompanied
by extensive derangements of the stomach and liver, and
other abdominal viscera. There are always more or less
obstructions of the liver, a weakness and irritable state
of the stomach, and great torpor of the bowels, being
clogged up with vitiated accumulations. In their treatment, a purgative, exerting a powerful influence upon
these various organs, is essentially necessary. There is
no cathartic for the purpose equal to Dr. J. WALKER'S
VINEGAR BITTENS, as they will speedily remove the
dark colored viscid matter with which the bowels are
loaded, at the same time stimulating the secretions of
the liver, and generally restoring the healthy functions
of the digestive organs.
Secrofula, or King's Evil, White Swellings,
Ulcers, Erysipelas, Swelled Neck, Goiter, Scrofulous
Inflammations, Indoent Inflammations, Mercarial Af-Ulcers, Erysipelas, Swelled Neck, Goiter, Scrothlous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc., etc. In these, as in all other constitutional Discases, Walker's Vinegar Bitters have shown their great curative powers in the most obstinate and intractable cases. Dr. Walker's California Vinegar Bitters

act on all these cases in a similar manner. By purifying the Blood they remove the cause, and by resolving away the effects of the inflammation (the tubercular deposits); the affected parts receive health, and a permanent cure the affected parts receive health, and a permanent cure is effected.

The properties of Dr. Walker's Vinegar Bitters are Aperient, Diaphoretic and Carminative, Nutritious, Laxative, Diuretic, Sedative, Counter-Irnatiant, Sudorific, Alterative, and Anti-Bilious.

The Aperient and mild Laxative properties of Dr. Walker's Vinegar Bitters are the best safequard in all cases of cruptions and malignant fevers, their balsamic, healing, and soothing properties protect the humors of the fauces. Their Sedative properties allay pain in the nervous system stomach, and howels the humors of the fauces. Their Sedative properties allay pain in the nervous system, stomach, and bowels, either from infammation, wind, colic, cramps, etc. Their Counter-Irritant influence extends throughout the system. Their Diuretic properties act on the Kidneys, correcting and regulating the flow of urine. Their Anti-Bilious properties stimulate the liver, in the secretion of bile, and its discharges through the biliary ducts, and are superior to all remedial agents, for the cure of Bilious Fever, Fever and Ague, etc.

Fortify the body against disease by purifying all its fluids with Vinecar Bitters. No epidemic can take hold of a system thus forearmed. The liver, the stomach, the bowels, the kidneys, and the nerves are rendered disease-proof by this great invigorant. orant.

Directions.—Take of the Bitters on going to bed at night from a half to ong and one-half wine-glassfull. Eat good nourishing food, such as beef steak, mutton chop, venison, roast beef, and vegetables, and take out-door exercise. They are composed of purely regetable ingredients, and contain no spirit.

HALES PALYS OF THE VEGETABLE SICILIAN HAIR

Wellsboro, April 24, 1872.-tf

RENEWER. Every/year increases the popularity of this valuable Hair Preparation;

which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfected preparation for restoring Gray on Fader Hair to its youthful color, making it soft, lustrous, and silken.

The scalp, by its use becomes white and door. by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most economical HAIR DRESSING ever used, as it requires fewer applications, and gives the hair a splendid glossy appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST PREPARATION for its intended purposes." Sold by all Druggists, and Dealers in Medicines.

Price One Dollar Buckingham's Dye FOR THE WHISKERS.

As our Renewer in many cases requires too long a time, and too much care, to restore gray or faded Whiskers, we have prepared this dye, in one preparation; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty

Manufactured by R. P. HALL & CO., NABHUA, N.H. Jan. 1, 1872.

For Sale in Knoxville.
