USEFUL AND SUGGESTIVE.

Packing and Transporting Eggs.

We have been asked the question, times without number, as to the feasibility of the transportation of eggs for hatching purposes, and their tendency to incubation. We have not a doubt that if eggs are properly packed and shipped, a large percentage of them will hatch. We do not believe, however, in packing eggs in sawdust, having had more than one case to practically demonstrated that eggs so packed will not hatch over 20 to 30 per cent., we care not how dry or how much palns may be had with the sawdust. We have experienced in almost every conceivable way with this packing for the past eight or ten years, and found the result to be nearly the same in every instance.

We were informed, years ago, by a breeder of large experience, that the fumes arising from sawdust were, in nine cases out of ten, almost sure to kill the vitality of the egg; and after repeated experiments we have found this theory prove true. Bran for packing eggs is much better than sawdust, and far less liable to destroy the vitality of the egg; though in long voyages this is even liable to absorb moisture, and hence, injure the incubating qualities of the egg.

Dry rowen is the best thing that can be used in packing eggs. If this cannot readily be obtained, take good dry hay, and cut it with the cutting box about an inch in length, and use it instead; no deleterious effects will arise from its use. In packing, wrap each egg separately in a piece of tea, or other soft paper, and place it in a box—after covering the bottom thereof an inch or more with rowen or cut hay—with the *large* end downwards, in this way fill out the first layer; after which place an inch or more of the filling over them, and then proceed as before until the box is full; topping off with, at least, an inch thickness of the filling before placing on the cover. Be sure and fill in rowen or cut hay around the sides and between the eggs, so that they will not touch each other, or the sides of the box. When the box is full, place the cover on, and fasten it down with a few small screws instead of nails, as the jar in driving the nails may damage the eggs. We have known eggs transported from England packed in this manner and more than eighty per cent. of them hatch.

There is no necessity for dealers, or others, to be at the expense of procuring the so-called premium boxes for the transportation of eggs, if they will follow the above directions, as we believe they will find that eggs so packed will hatch successfully, if they are "all right," and fresh when put up. This is a matter of great importance to those purchasing eggs as well as those selling; therefore we should be glad to have the experiences of others that we may print them for the benefit of all concerned.—*Am. Rural Home.*

A cheap Cellar Bottom.

In sections of the country where there is an abundance of cobble-stones, collect a few loads of those about four or five inches in diameter, grade the bottom of the cellar, lay the cobbles in rows, and ram them down one-third their thickness into the ground, so that they will not be sunk below the line of the rows by any heavy superincumbent pressure, such as the weight of a hogshead of molasses or tierce of vinegar. The bottom of the cellar should be graded so that the outside will be at least two inches lower than the middle. A mistake sometimes occurs by *grading the cellar bottom in such a* manner that the centre will be two or three inches lower than the outside. When this is the case, should water enter from the outside, it will flow directly towards the middle. A straight-edged board should be placed frequently on each row of stones as they are being rammed, so that the upper sides may be in line with each other. After the stones are laid and well rammed down, place a few boards on the pavement to walk on; then make a grouting of clean sand and water lime, or Rosendale cement, and pour it on the stones until all the interstices are filled. As soon as the grouting has set, spread a layer of good cement mortar one inch thick over the top of the pavement, and trowel the surface off smoothly. In order to spread the mortar true and even on the surface, lay an inch board one foot from the wall, on the surface of the pavement, stand on the board, and fill the space with mortar on with the top of the board; after which, move the board one foot, fill the space with mortar, and trowel it off smoothly. Such a floor will cost less than a board floor, and will endure as long as the superstructure is kept in repair.

A floor made in the foregoing manner on the ground in the basement of a barn, a piggery, or a stable, would be rat proof, and would be found cheaper and more serviceable than a plank floor. The work should be done in the former part of the growing season, so that the cement may have sufficient time to become dry and hard before cold weather.—*Industrial Monthly.*

What is High Farming?

It is a system of tillage and farm management that is self-sustaining; a system that takes nothing but the bare land, the domestic animals, the farm implements and machinery, and cultivates the soil, sustains the family and the animals, pays the annual taxes, defrays the expenses incident to the improvements that must be made on the farm, cancels the annual interest on the money invested in the land, eventually pays for the land, all from the product of the soil cultivated; and after one, two and three decades of years, leaves every acre in a far better state of fertility than the soil was at the beginning. This is high farming. There are untold numbers of quiet, unobtrusive tillers of the soil in many of our States who have commenced precisely as we have indicated, without one dollar of cash capital; who have no revenue whatever besides the natural resources of their cultivated fields, and who by hard work and judicious management sustained their families, paid for their land, erected all their buildings, paid for all their valuable improvements, and at the same time have brought their land up to that state of productiveness, by their judicious management, that every acre now yields from two to three tons of hay where only one was originally gathered, and they harvest nearly two bushels—in many instances more than two—of cereal grain, where the product was but one bushel. That is high farming.—Yet such a system of husbandry is usually sneered at simply because the proprietor knew how to save his money to defray the expenses of improvements, rather than spend three times more than he made.—*A. Y. Observer*

KEEPING CREAM.—Next in importance to having milk perfectly pure and sweet, and free from all animal odors, comes the matter of keeping the cream after it is taken off the milk. In the first place, the less milk there is with the cream at the time it is set in the cream jar, the better. A great deal of carelessness is shown in this matter, for be it known that milk makes cheese, while the cream *only* makes *butter*, and the more milk there is in the cream at churning time, the more cheesy-flavored will be the butter, and therefore the more likely to spoil afterwards unless excessively salted. Really pure, good butter requires very little salt, while butter as ordinarily made will soon spoil unless well salted, or kept covered in brine.

Secondly, the cream jar must be of the very best quality of stone ware; thick glass would be still better; and it must have a cover that will exclude all insects.

Thirdly, the cream jar should be kept in a place where no noxious odors or gases can be absorbed when the jar is opened to add more cream, and also where the temperature can be kept cool and equable, say at 60 degrees; and lastly, the cream is to be made into butter as soon as it just begins to sour, and when the jar is emptied it is to be thoroughly cleaned and scalded in boiling water before being again used.—*Journal of Chemistry.*

They have a new way of treating the broken legs of horses, which ought to be generally known. A valuable horse in Hartford, Conn., had its leg broken a short time since. The leg was carefully set by an experienced surgeon, and was covered thickly with plaster. When the plaster "set," or hardened, it kept the limb as immovable as if it had been made of iron. Thus treated, a broken leg will knit together in a brief time and become as good as ever.

"We Have Turned Our Backs Upon the Past."

"We have this day substantially turned our backs upon the past; we now stand in the present and look forward to the great future. The past is gone."—*Thomas A. Hendricks, at the Democratic State Convention of Indiana.*

Yes; turn your backs upon the past,
Filled with the record of your shame;
And, if you can, blot from your minds
Your long-dishonored party's name.

Turn quick away from slavery's crime,
A thing you loved as well and long—
A monster that you fed and nursed
Till its devouring jaws were strong.

Turn from the coward's part you played
When traitors struck at sumter's nag,
And sought the Stars and Stripes of old
In slavery's mire and filth to drag.

Yes, turn your backs on all you did
While patriots struggled for the right,
And redeem'd set on every side
In freedom's glorious fight.

Thank God! the noble men who fought
To save their heritage of fame,
Can face the record they have made
Without a single blush of shame.

—*Crawfordsville Journal.*

POLITICAL NOTES.

Soldiers! Whom do the Rebels want for President? Then don't vote for him!

Forney, in the *Press* of the 5th of June, says: "General Hartranft was a brave soldier, and, we believe, is an honest man."

A significant fact—that the religious press of the country is, almost without exception, against the Cincinnati nominations.

One of the mottoes of the campaign will be the statement of Horace Greeley, that "Gen. Grant has never been beaten, and he never will be."

"When we come to die next November," said an honest delegate in the Wisconsin Democratic Convention, "we shall wish we had not abandoned the path of virtue."

Wendell Phillips says: "I would prefer Grant to either Greeley or Adams. Greeley is not a bit better than Andrew Johnson. He is of about the same stripe; and his administration would not be a bit better."

Very many of the bold gentlemen who announced at Cincinnati that they had "burned the bridges behind them" are inquiring anxiously for materials for pontoons. We await their return with a shudder.

The Toledo *Blade* says: "Horace Greeley turns in horror from the corrupt Leet and the more corrupt Stocking, to find sweet comfort in the arms of the Blairs. Gentle Horace! Guileless Greeley!"

Let all laboring men make a note of these words of President Grant: "The true prosperity and greatness of a nation is to be found in the elevation and education of its laborers."

Tea is down fifteen cents a pound, and coffee is lower than before. This is the consequence of the action of a Republican Congress, which removed the duties from both articles.

Andrew Johnson proposes to be a candidate for the Governorship of Tennessee on the Greeley platform. 'Tis well. He will come just about as near to an election as Greeley.

For cursing all Democrats freely,
No mortal could ever beat Greeley,
So to stop his abuse,
And make him of use,
They have made him their chief—this same Greeley.

General Butler, in a speech at Faneuil Hall, Boston, said, in reference to the indorsement of Greeley at Baltimore: "so far as I have any understanding of political action, the only fear I have under heaven is that he will not be nominated at Baltimore."

The New York *Times*, after carefully canvassing the political probabilities, publishes tables to show that two hundred and thirty-nine electoral votes will probably be cast for Grant and Wilson, sixty-nine for the opposition, and fifty-eight doubtful.

An exchange says: Andrew Jackson has been officially withdrawn from the Presidential candidacy, and consequently many Democratic voters in Berks and Bucks counties have announced their intention of taking no part in the coming campaign.

Dr. Greeley once remarked, "if there was not a newspaper nor common school in the country, the Democratic party would be far stronger than it is." How the venerable ruralist must now regret the friendly efforts he has made in the interests of education.

A Democrat who was present at the Baltimore Convention, tells us that he heard no National airs played during the sitting of the Convention. It was "*Maryland, my Maryland*," or "*Dixie*." Nothing more, nothing less. He came home a Grant man.—*Doylestown Intelligencer.*

At the Virginia Democratic State Convention, ex-Gov. Extra Billy Smith gave the most pithy statement of the Democratic platform yet. Said he: "Give no Jew or Gentile, dog or devil, I care not which, so we beat Grant." This *sort of thing must* make Dr. Greeley happy.

We have reason to believe that in Greene county not more than fifty Republicans will vote for Greeley, while four times that number of Democrats cannot be drugooned into swallowing the pill, though it be disguised in "a power o' sass."—*Catskill Recorder.*

One of the funniest pretenses about this Greeley movement is that it is one of the people, and not of the politicians. This in the face of the fact that the men who conceived it, run it, and are now inflating it with wind, are Gratz Brown, McClure, Cochrane, Fenton and that sort of trading, huckstering place-seekers.

Speaking of the proposition that the Democracy should swallow Greeley, the New York *World* said, "The *World* will contribute no slime to give the animal a slippery passage down the throat of the devourer." Well, the whale has swallowed Jonah, and we shall soon see which will get the worst of it.

When the news of Greeley's nomination was received in New York a salute of 100 guns was fired by the Democratic leaders, and a banner hoisted, bearing the words—"*Tammany responds to the nomination of the Baltimore Convention.*" Here lie the weakness and the danger of the whole thing.—Tammany has adopted Greeley, and will take charge of the campaign in his behalf.

A good many of our Bucks county Democrats have lost their interest in politics.—With two Republicans in the field for President, and with no Democratic candidate to vote for, they don't care which whips. In fact, if there is to be a Republican President anyhow, they rather prefer a certainty with Grant to an uncertainty with Greeley.—*Intelligencer.*

In case of his election Tammany will demand and attain a controlling voice in the Government. Within the last year the country has seen enough of the effects of Tammany rule in New York, under the leadership of Tweed, Hall and Barnard.—Tammany herself now proclaims that she "responds" to Greeley's nomination; it is the duty of all good and honest citizens to see that she gets no further.

The Buffalo *Express* says: "The surprising feats executed this summer by Prof. H. Greeley and his small but select troupe of political acrobats are not surpassed even by that accomplished anaconda mentioned in the old song, who could

"Swallow himself, crawl through himself,
Come out with great facility;
Tie himself in a bow-knot, snap his tail,
And wink with great agility."

The Cleveland *Leader* says: "John Morrissey, the gambler and prize-fighter, has come out strongly in favor of Greeley's candidature. Straws show which way the wind blows. It will be remembered that during the "Young Democracy" fight in New York, Greeley intrigued with Morrissey for the nomination for Governor. It is sometimes charged that President Grant's friends are not all that could be desired.—What would 'President' Greeley's be?"

Everybody knows that while the struggle for national life was going on Judge Thonipson was not regarded as a very ardent supporter of the Government and its measures. On the other hand, Judge Mercur, whose name is on the Republican ticket, was an unflinching and effective friend of the Union, and there was never a doubt as to what his opinions might be. If devotion to the country and its preservation are to be counted in making a comparison between the two candidates for the supreme Bench of the State, the record of Judge Mercur is certainly much to be *preferred*.

The Toledo *Blade* says: "A man is known by the company he keeps. Horace Greeley is now the associate and tool of the Tweeds and Halls of the Tammany Ring, and of the Gilmores and Yergers of the South. For the bribe of the Presidency he consents to betray the cause of freedom and justice into the hands of its bitterest foes. Let a man be deceived. A man's chosen associates prove his character beyond all dispute. The ex-rebels associate with Greeley only that they may use him to break down the party and the cause which have so ably repelled their murderous assaults on the Federal Union. When he shall have served their use they will cast him aside as contemptuously as ever a betrayer was flung from the embrace of miscreants he had basely consented to serve.

GLASS, ALL SIZES, SINGLE AND DOUBLE THICK, PAINTS ALL KINDS AND COLORS, VARNISHES AND VARNISH BRUSHES, A FULL STOCK.

Transfer Ornaments, Striping Pencils and Brushes for Carriage and Cutter Ornamenting.

A full line of all classes of Good appertaining to our business kept in stock.

Jan. 1, 1872. JOHN R. PIERCE.

This Cut illustrates the manner of Using

DR. PIERCE'S Fountain Nasal Injector, OR

DOUCHE.

This Instrument is especially designed for the perfect application of

DR. SAGE'S CATARRH REMEDY.

It is the only form of instrument yet invented with which fluid medicine can be carried *high up* and *perfectly applied* to all parts of the affected nasal passages, and the chambers or cavities communicating therewith, in which mucous and ulcers frequently exist, and from which the catarrhal discharge generally proceeds. The want of success in treating catarrh heretofore has arisen largely from the impossibility of applying remedies to these cavities and chambers by any of the ordinary methods. This obstacle in the way of effecting cures is entirely overcome by the invention of the Douche. In using this instrument, the Fluid is carried by its own weight (no snuffing, forcing or straining required) up one nostril in a full gently flowing stream to the highest portion of the nasal passages, passes into and thoroughly cleanses all the tubes and chambers connected therewith, and flows out of the opposite nostril. Its use is pleasant and so simple that a child could understand it. Full and explicit directions accompany each instrument. When used with this instrument, Dr. Sage's Catarrh Remedy cures recent attacks of "Cold in the Head" by a few applications.

Symptoms of Catarrh. Frequent head ache, discharge falling into throa sometimes profuse, watery, thick mucous, purulent, offensive, &c. In others a dryness, dry, watery, weak or inflamed eyes, stopping up or obstruction of nasal passages, ringing in ears, deafness, hawking and coughing to clear throat, ulcerations, scabs from ulcers, voice altered, nasal twang, offensive breath, impaired or total de privation of sense of smell and taste, dizziness, mental depression, loss of appetite, indigestion, enlarged tonsils, tickling cough &c. Only a few of these symptoms are likely to be present in any case at one time.

Dr. Sage's Catarrh Remedy, when used with Dr. Pierce's Nasal Douche, and accompanied with the constitutional treatment which is recommended in the pamphlet that wraps each bottle of the Remedy, is a perfect specific for this loathsome disease, and the proprietor offers, in good faith, $500 reward for a case he cannot cure. The Remedy is mild and pleasant to use, containing no strong or caustic drugs or poisons. The Catarrh Remedy is sold at 50 cents. Douche at 50 cents, by all Druggists, or either will be mailed by proprietor on receipt of 50 cents.

A Mare Estrayed.

ON the 28th of June last, a mare belonging to the subscriber jumped out of the pasture on Babb's Creek and strayed away. She was a large mare, weighing about 1,150 lbs., sorrel, with both hind feet white, a small strip in her face, one side of her mane cut off, and about 7 years old. Whoever may find her is requested to take care of her, and send me word, and I will remove her and pay all charges. Address

HENRY GREEN,
July 10, '72-3w* Cedar Run, Lycoming Co., Pa.

VINEGAR BITTERS

VEGETABLE FREE FROM ALCOHOL

PURELY CALIFORNIA

D. WALKER'S EUREKA

VINEGAR BITTERS

Vinegar Bitters are not a vile Fancy Drink, made of Poor Rum, Whiskey, Proof Spirits and Refuse Liquors, doctored, spiced, and sweetened to please the taste, called "Tonics," "Appetizers," "Restorers," &c., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the native roots and herbs of California, free from all Alcoholic Stimulants. They are the Great Blood Purifier and a Life-giving Principle, a Perfect Renovator and Invigorator of the System, carrying off all poisonous matter and restoring the blood to a healthy condition, enriching it, refreshing and invigorating both mind and body. They are easy of administration, prompt in their action, certain in their results, safe and reliable in all forms of disease.

No Person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair.

Dyspepsia or Indigestion. Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys, and a hundred other painful symptoms, are the offsprings of Dyspepsia. In these complaints it has no equal, and one bottle will prove a better guarantee of its merits than a lengthy advertisement.

For Female Complaints, in young or old, married or single, at the dawn of womanhood, or the turn of life, these Tonic Bitters display so decided an influence that a marked improvement is soon perceptible.

For Inflammatory and Chronic Rheumatism and Gout, Dyspepsia or Indigestion, Bilious, Remitent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have been most successful. Such Diseases are caused by Vitiated Blood, which is generally produced by derangement of the Digestive Organs.

They are a Gentle Purgative as well as a Tonic, possessing also the peculiar merit of acting as a powerful agent in relieving Congestion or Inflammation of the Liver and Visceral Organs, and in Bilious Diseases.

For Skin Diseases, Eruptions, Tetter, Salt-Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-worms, Scald-Head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin, of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters. One bottle in such cases will convince the most incredulous of their curative effects.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.

Grateful thousands proclaim VINEGAR BITTERS the most wonderful Invigorant that ever sustained the sinking system.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. Says a distinguished physiologist: There is scarcely an individual upon the face of the earth whose body is exempt from the presence of worms. It is not upon the healthy elements of the body that worms exist, but upon the diseased humors and slimy deposits that breed these living monsters of disease. No system of Medicine, no vermifuges, no anthelmintics, will free the system from worms like these Bitters.

Mechanical Diseases. Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, will be subject to paralysis of the Bowels. To guard against this take a dose of WALKER'S VINEGAR BITTERS once or twice a week, as a Preventive.

Bilious, Remittent, and Intermittent Fevers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. These are always more or less obstructions of the liver, a weakness and irritable state of the stomach, and great torpor of the bowels, being clogged up with vitiated accumulations. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is a cathartic for the purpose equal to DR. J. WALKER'S VINEGAR BITTERS, as they will speedily remove the dark-colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Scrofula, or King's Evil, White Swellings, Ulcers, Erysipelas, Swelled Neck, Goiter, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc., etc. In these, as in all other constitutional Diseases, WALKER'S VINEGAR BITTERS have shown their great curative powers in the most obstinate and intractable cases.

Dr. Walker's California Vinegar Bitters act on all these cases in a similar manner. By purifying the Blood they remove the cause, and by resolving away the effects of the inflammation (the tubercular deposits) the affected parts receive health, and a permanent cure is effected.

The properties of DR. WALKER'S VINEGAR BITTERS are Aperient, Diaphoretic and Carminative, Nutritious, Laxative, Diuretic, Sedative, Counter-Irritant, Sudorific, Alterative, and Anti-Bilious.

The Aperient and mild Laxative properties of DR. WALKER'S VINEGAR BITTERS are the best safeguard in all cases of eruptions and malignant fevers, their balsamic, healing, and soothing properties protect the humors of the fauces. Their Sedative properties allay pain in the nervous system, stomach, and bowels, either from inflammation, wind, colic, cramps, etc. Their Counter-Irritant influence extends throughout the system. Their Diuretic properties act on the Kidneys, correcting and regulating the flow of urine. Their Anti-Bilious properties stimulate the liver, in the secretion of bile, and its discharges through the biliary ducts, and are superior to all remedial agents, for the cure of Bilious Fever, Fever and Ague, etc.

Fortify the body against disease by purifying all its fluids with VINEGAR BITTERS. No epidemic can take hold of a system thus forearmed. The liver, the stomach, the bowels, the kidneys, and the nerves are rendered disease-proof by this great invigorant.

Directions.—Take of the Bitters on going to bed at night from a half to one and one-half wine-glassful. Eat good nourishing food, such as beef steak, mutton chop, venison, roast beef, and vegetables, and take out-door exercise. They are composed of purely vegetable ingredients, and contain no spirit.

J. WALKER, Prop'r. R. H. McDONALD & CO., Druggists and Gen. Agts., San Francisco, Cal., and cor. of Washington and Charlton Sts., New York.

SOLD BY ALL DRUGGISTS AND DEALERS.

Also the Domestic Sewing Machine. Call in and see me. E. F. DOWD.

Wellsboro, April 24, 1872.-tf

HALLS VEGETABLE SICILIAN HAIR RENEWER.

Every year increases the popularity of this valuable Hair Preparation; which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfected preparation for restoring GRAY OR FADED HAIR to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most economical HAIR DRESSING ever used, as it requires fewer applications, and gives the hair a splendid, glossy appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST PREPARATION for its intended purposes."

Sold by all Druggists, and Dealers in Medicines.

Price One Dollar.

Buckingham's Dye FOR THE WHISKERS.

As our Renewer in many cases requires too long a time, and too much care, to restore gray or faded Whiskers, we have prepared this dye, in *one preparation*; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty Cents.

Manufactured by R. P. HALL & CO., NASHUA, N.H.

Jan. 1, 1872.

For Sale in Knoxville.

ONE new two story frame house. Good terms offered. Call at my office.
