pains may be had with the sawdust. We have experienced in almost every conceivable way with this packing for the past eight or ten years, and found the result to be nearly the same in every instance.

We were informed, years ago, by a breeder of large experience, that the fumes arising from sawdust were, in nine cases out of the conceivance of the conce ien, almost sure to kill the vitality of the gg; and after repeated experiments we have found this theory prove true. Bran for acking eggs is much better than sawdust, and far less liable to destroy the vitality of the egg: though in long voyages this is even liable to absorb moisture, and hence, injure the incubating qualities of the egg. Dry rowen is the best thing that can be used in packing eggs. If this cannot readily be obtained, take good dry hay, and cut is with the cutting box about an inch in length, and use it instead; no deleterious of the rill crise from its use. Its packing or other soft paper, and place it in a boxafter covering the bottom thereof an inch

of the country is, almost without exception, against the Cincinnati nominations. or more with rowen or cut hay—with the large end downwards, in this way fill out the first layer; after which place an inch or more of the filling over them, and then proceed as before until the box is full; topping off with, at least, an inch thickness of the filling before placing on the cover. Be sure and fill in rowen or cut hay around the sides and between the eggs, so that they will not touch tween the eggs, so that they will not touch each other, or the sides of the box. When the box is full, place the cover on, and fasten it down with a few small-screws instead of nails, as the jar in driving the nails may damage the eggs. We have known eggs transported from England packed in this manner and more than eighty per cent, of There is no necessity for dealers, or others, to be at the expense of procuring the so-called premium boxes for the transporta-

The Toledo Blade says: "Horace Greeley turns in horror from the corrupt Leet and the more corrupt Stocking, to find sweet comfort in the arms of the Blairs. Gentle tion of eggs, if they will follow the above directions, as we believe they will find that eggs so packed will hatch successfully, if they are "all right," and fresh when put up. This is a matter of great importance to those purchasing eggs as well as those selling; therefore we should be glad to have the experiences of others that we may print them for the benefit of all concerned.—Am. Rural

A cheap Cellar Bottom.

In sections of the country where there is an abundance of cobble-stones, collect a few Dads of those about four or five inches in diameter, grade the bottom of the cellar, lay the cobbles in rows, and ram them down one-third their thickness into the ground, so that they will not be sunk below the line of the rows by any heavy superincumbent pres-sure, such as the weight of a hogshead of molasses or tierce of vinegar. The bottom of the cellar should be graded so that the outside will be at least two inches lower they have made him their chief—this same Greekey.
General Butler, in a speech at Faneuil-Hall, Boston, said, in reference to the indorsement of Greeley at Baltimore: "so far as I have any understanding of political action, the only fear I have under heaven is that he will not be nominated at Baltimore."

The New York Times, after carefully conversing the publical probabilities, pub. than the middle. A mistake sometimes occurs by grading the cellar bottom in such a manner that the centre will be two or three inches lower than the outside. When this is the case, should water enter from the outside, it will flow directly towards the middle - A straight-edged board should be placed frequently on each row of stones as they are being rammed, so that the upper tides may be in line with each other. Af-ter the stones are bud and well rammed down, place a few boar is on the pavement been officially withdrawn from the Presito walk on; then make a grouting of clean dential candidacy, and consequently many sand and water lime, or Rosendale cement, and pour it on the stones until all the interstices are filled As soon as the grouting has set, spread a layer of good cement mort; rone inch thick over the top of the pavement, and trowel the surface off smoothly. In order to spread the mortar true and even on the surface, lay an inch board one foot nent, stand on the board, and fill the space with mortar even with the top of the board; after which, move the board one foot, fill the space with mortar, and trowel it off smoothly. Such a floor will cost less than a board floor, and will endure as long as the A theor made in the basement of a barn, a p ggery, or a stable, would be rat proof, id would be found cheaper and more ser

What is High Farming?

viceable than a plank floor. The work should be done in the former part of the

rowing season, so that the cement may ive sufficient time to become dry and hard

before cold weather. - Industrial Monthly.

It is a system of tillage and farm manage ment that is self-sustaining; a system that takes nothing but the hare land, the domestic animals, the farm implements and ma-chinery, and cultivates the soil, sustains the family and the animals, pays the annual taxc., defrays the expenses incident to the improvements that must be made on the farm, cancels the annual interest on the money invested in the land, eventually pays for the land, all from the product of the soil cultivated; and after one, two and three decades of years, leaves every acre in a far better s are of fertility than the soil was at the beinning. This is high farming. There are unteld numbers of quiet, unobtrusive tillers of the soil in many of our States who have commenced precisely as we have indicated, without one dollar of cash capital; who have movement whatever besides the natural reces of their cultivated fields, and who by hard work and judicious management sustained their families, paid for their land, er red all their buildings, paid for all their valuable improvements, and at the same time have brought their land up to that state of productiveness, by their judicious management, that every acre now yields from two to three tons of hay where only one was originally gathered, and they harvest nearly two bushels-in many instances more than two-of cereal grain, where the product was but one bushel. That is high farming.— Yet such a system of husbandry is usually succeed at simply because the proprietor knew how to save his money to defray the expenses of improvements, rather than spend three times more than he made $-\Lambda$. Y. Ob-

having milk perfectly pure and sweet, and free from all animal odors, comes the matter of keeping the cream after it is taken off the milk. In the first place, the less milk there is with the cream at the time it is set in the cream jar, the botter. A great deal of careis with the cream at the time it is set in the cream jar, the better. A great deal of carellessness is shown in this matter, for be it the duty of all good and honest citizens to known that milk makes cheese, while the see that she gets no further. milk there is in the cream at churning time, the more cheesy-flavored will be the butter and therefore the more likely to spoil after-wards unless excessively salted. Really pure, good butter requires very little salt, while butter as ordinarily made will soon spoil un-less well salted, or kept covered in brine. Secondly, the cream jar must be of the very best quality of slone ware; thick glass would be still better; and it must have a cover that will exclude all insects. Thirdly, the cream jar should be kept in a place where no noxion-odors or gases can be absorbed when the jar is opened to add more cream, and also where the temperature can be kept cool and equable, say at 60 de-trees; and lastly, the cream is to be made into butter as soon as it just begins to sour, and when the jar is emptied it is to be thoroughly cleaned and scalded in boiling water before being again used.—Journal of Chem-

South. For the bribe of the Presidency he They have a new way of treating the broken legs of horses, which ought to be generally known. A valuable horse in Hartford, Conn., had its leg broken a short time since. The leg was carefully set by an experienced surgeon, and was covered thickly with plaster. When the plaster "set," or hardened, it kept the limb as immovable as if it had been made of iron. Thus treated, a broken leg will knit together in a brief time and become as good as ever.

Consents to betray the cause of freedom and justice into the hands of its bitterest foes. Let no man be deceived. A man's chosen associates prove his character beyond all dispute. The ex-rebels associate with Greekly with the plaster "set," or hardened, it kept the limb as immovable as if it had been made of iron. When he shall ha basely consented to serve.

"We Have Turned Our Backs Upon the JOR, ANDERSON)

"We have this day substantially turned our backs upon the paet; we now stand in the present and look forward to the great future. The past is gone."—
Thomas 4. Hendricks, at the Democratic State Convention of Indiana. Yes; turn your backs upon the past,
Filed with the record of your shame;
And, if you can, blot from your minds
tour long dlahonored party's name.

Turn quick away from slavery's crime,
A thing you lovelised well and hursed
Till its devouring jaws were strong. Turn from the coward's part you played When traitors struck at Sumter's mag, And sought the Stars and Stripes of old In slavery's mire and filth to diag. Yes, turn your backs on all you did While patriots struggled for the right, And freemen [e4] on every side In freedom's glorious fight.

President? Then don't vote for him!

A full line of all classes of Good appertaining to our business kept in stock.

This Cut illustrates the manner of Using ountain Nasal Injector, DOUCHE.

This instrument is especially designed for the persect application of feet application of DR. SACE'S CATARRH REMEDY. It is the only form of instrument yet invented with which finid indied mediume can be carried help up and porfeelly applied to all parts of the affected mand passages, and the chambers or cavities communicating therowith, in which screen and died hard generally proceeds. The want of success in treating catarrh heretofore has arison largely from the impossibility of applying a emedies to these cavities and chambers by any of the oldinary methods. This obstacle in the way of effecting cares is entirely overcome by the invention of the Donche. In using this instrument, the fluid is carried by its own weight (no souffing, forcing or pumping being required,) up one nostril in a full gently flowing stream to the highest portion of the masal passages, passes into and theroughly cleaness all the tubes and chambers connected therewith, and flows out of the opposite nostri. Its use is pleasant and so simple that a child could understand it. Full and explicit directions accompany each instrument. When used with this instrument, Dr. Sage's Catarrh Romedy oures recent attacks of "Cold in the Iteady" by a few applications. Symptoms of Catarrh. Froquent head ache, discharge falling into throat connectines protuse, watery, thick muons, purulent offensive, &c. In others a dryness, dry, watery, weak or inflamed eyes, stopping up or obstinction of missil passages, ringing in ears, deatness, hawking and coughing to clear throat ulcerations, easily from ulcers, voice aftered, masal twang, offensive briefit, impacted or total depivation of sense of smell and taste, distinct, marged tonsils, ticking cough. Ac. Only a few of these symptoms are likely to be present in any case at one time.

Dr. Parge's Catarrh itemedy, when used with Dr. Parge's Paisant Douche, and accompanied with the constitutional treatment which is a commenced in the pamphlet that waps can bottle of the Remedy is sold at 50 cents. Douche, at 50 cents, by all Druggists, or either will be mailed by propietor on receipt o DR. SACE'S CATARRH REMEDY

A Mare Estrayed. On the 28th of June last, a mare belonging to the subscriber jumped out of the pasture on Babb's Creek and strayed away. She was a large mare, weighing about 1.150 lbs., sorrel, with both hind feet white, a small strip in her face, one side of her mane cut off, and about 7 years old: Wheever may find her is requested to take cate of her, and send me word, and I will remove her and pay all charges. Address HENRY GREEN,
July 10, '72-Sw* Cedar Run, Lycoming Co., Pa.

Vinegar Bitters are not a vile Fancy Drink, made of Poor Rum, Whiskey, Proof Spirits and Refuse Liquots, doctored, spiced, and sweetened to please the taste, called "Tonics," "Appetizers," "Restorers," &c., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the inative roots and heibs of California, free from all Alcoholic Stimulants. They are the Great Blood Purifier and a Life-giving Principle, a Perfect Renovator and Invigorator of the System, carrying off all poisonous matter and restoring the blood to a healthy condition, enriching it, refreshing and invigorating both mind and body. They are easy of administration, prompt in their action, certain in their results, safe and reliable in all forms of disease.

No Person can take these Hitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair.

Dyspopsia or Indigestion. Headache, Pain in the Shoulders, Coughs, Tightness of the Chesti Dizziness, Sour Eructations of the Stomach, Bad I faste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the regions of the Kidneys, and a hundred other painful symptoms, are the offsprings of Dyspepsia. In these complaints it has no equal, and one bottle will prove a better guarantee of its merits than a lengthy advertisement.

For Female Complaints, in young or old, married or single, at the dawn of womanlood, or the turn of life, these Tonic Bitters display so decided an influence that a marked improvement is soon perceptible.

For Inflammatory and Chronic Rheumatism and Gout, Dyspepsia or Indigestion, Bilious, Remittent and Intermittent Fevers, Diseases of the

For Inflammatory and Chronic Rheumatism and Gout, Dyapepsia or Indigestion, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have been most successful. Such Diseases are caused by Vitiated Blood, which is generally produced by derangement of the Digestive Organs.

They are a Gentle Purgative as well as a Tonic, possessing also the peculiar ment of acting as a powerful agent in relieving Congestion or Inflammation of the Liver and Visceral Organs, and in Bilious Diseases.

For Skin Diseases, Eruptions, Tetter, Salt-Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carhuncles, Ring-worms, Scald-Head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin, of whatever name or nature, are literally dug up and carried out of the system in a and Diseases of the Skin, of whatever name or nature, are literally due up and carried out of the system in a short time by the use of these Bitters. One bottle in such cases will convince the most incredulous of their curative effects.

Cleanse the Vitlated Blood whenever you call to improve the viting the property of the convergence Cleanse the Vitlated Blood whenever you find its impurities bursting through the skin in Pimples; Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.

Grateful thousands proclaim Vinegar Bitters the most wonderful Invigorant that ever sustained the sinking system.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. Says a distinguished physiologist: There is scarcely an individual upon the face of the earth whose body is exempt from the presence of worms. It is not upon the healthy elements of the body that worms exist, but upon the diseased humors and slimy deposits that breed these living monsters of disease. No system of Medicine, no vernifuges, no anthelminities, will free the system from worms like these Bitters.

No system of Medicine, no vermifuges, no anthelminities, will free the system from worms like these Bitters.

Mechanical Disorses. Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, will be subject to paralysis of the Bowels. To guard against this take a dose of WALKER'S VINEGAR BITTERS, once or twice a week, as a Preventive.

Bittons, Remittent, and Intermittent Povers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savanual, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. There are always more or less obstructions of the liver, a weakness and irritable state of the stomach, and great torpor of the bowels, being clogged up with vitiated accumulations. In their treatment, a purgative, exerting a powerful influence upon these various-organs, is essentially necessary. There is no callartic for the purpose equal to Dr. J. WALKER'S VINEGAR BITTERS, as they will speedily remove the dark-colored viscid matter with which the bowels are loaded at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the liver, and generally restoring the healthy functions of the liver, and generally restoring the healthy functions of the liver, and generally restoring the healthy functions of the liver, and generally restoring the healthy functions of the liver, and generally restoring the realthy functions of the liver, and generally restoring the realthy functions of the liver, and generally restoring the healthy functions of the liver, and generally restoring the healthy functions

great curative powers in the most obstinate and intractable cases.

Dr. Walker's California Vinegar Bitters act on all these cases in a similar manner. By purifying the Blood they remove the cause, and by resolving away the effects of the inflammation (the tubercular deposits) the affected parts receive health, and a permanent cure is effected.

The properties of Dr. Walker's Vinegar Rittings are Apprient Diaphoretic and Carminative. The properties of Dr. Walker's Vinegar Bitters are Aperient, Diaphoretic and Carminative, Nutritious, Laxative, Diuretic, Sedative, Counter-Irritant, Sudorific, Alterative, and Anti-Bilious.

The Apprent and minimal Laxative properties of Dr. Walker's Vinegar Bitters are the best safeguard in all cases of cruptions and malignant fevers, their balsamic, healing, and soothing properties protect the humors of the fauces. Their Sedative properties allay pain in the nervous system, stomach, and bowels, either from inflammation, wind, colic, cramps, etc. Their Counter-Irritant influence extends throughout the system. Their Diaretic properties act on the Kidneys, correcting and regulating the flow of urine. Their Anti-Bilious properties stimulate the liver, in the secretion of bile, and its discharges through the biliary ducts, and are superior to all remedial agents, for the cure of Bilious Fever, Fever and Ague, etc.

Fortify the body against disease by purifying all its fluids with Vinegar Bitters. No epidemic can take hold of a system thus forcarmed. The liver, the stomach, the bowels, the kidneys, and the nerves are rendered disease-proof by this great invignerves are rendered disease-proof by this great invignerves are rendered disease-proof by this great invigorant.

Directions.—Take of the Bitters on going to hed at night from a half to one and one-half wine-glassfull. Eat good nourishing food, such as beef steak, mutton chop, venison, roast beef, and vegetables, and take out-door exercise. They are composed of purely vegetable ingredients, and contain no spirit.

of this valuable Hair Preparation;

which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfected preparation for restoring GRAY OR FADED HAIR to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most economical Hair Dressing ever used, s it requires fewer applications, and gives the hair a splendid, glossy appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST, PREPARATION for its intended purposes." Fold by all Druggists, and Dealers in Medicines. Price One Dollar.

Buckingham's Dye

FOR THE WHISKERS. As our Renewer in many cases requires too long a time, and too much care, to restore gray or faded Whiskers, we have prepared this dye, in one preparation; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty Cents.

Manufactured by R. P. HALL & CO., NASHUA, N.H.

For Sale in Knoxville. ONE new two story frame house. Good terms of fered. Call at my office.
