We believe we have no pop-ular fruit or vegetable but is capable of great improvement; and no doubt those who go into the search industrioualy will who go into the search industrioualy will as those professors of matere supposed to know all find something which will well reward their.

Cows Going DRY .- Many persons comt recollection the internal just when butter brings the best price, and just when butter brings the best price. sumed about ten million the real blame is with the owners themselves time. Many old smokers In the fall, when frosts come and pastures : b is consumed in that way mornings and a comfortable place at night, so wever out of the way, numerings and a comfortable place at night, so wever out of the way, numerings and a comfortable place at night, so wever out of the way, numerings and a comfortable place at night, so wever out of the way, numerings and a comfortable place at night, so wever out of the way, numerings and a comfortable place at night, so wever out of the way, numerings and a comfortable place at night, so wever out of the way, numerings and a comfortable place at night, so we were statement may be, they are allowed to shift for themselves, a falling off in pulk is the result, and the verere are in this country 12,-ers of cigars, and they cin-so she is furloughed. Now, this is the fault... of the owner and the result of negligence. of the owner and the result of negligence. of the owner and the result of negligence. to the owner and the result of negligence. Cows are like humans, the creatures of hab-it, and follow a course onco adopted, espect-it, and follow a course onco adopted, espect-it, and going dry is one of them. We have and going dry is one of them. We have whenever a can-made of any test, to give it rently, at the Polytechnic right time, and milking should be kept up. ently, at the Polytechnic right time, and milking should be kept up one of the professors in until that time, be the quantity great or habits of the one hundred small. The milk will undergo no change its there, and then made a before the last month and it is safe to milk een their devotions to study ap to that time. Gentle treatment, warm He found that one hundred slops and feed in the morning, and a com-tokers, and fifty-eight never fortable place to lie down in will make never used, the nozious them continue to give milk.

found that in each grade of udents who did not smoke MANURE FOR ORCHARDS - Wood sakes who did smoke, and that are doubtless excellent for orchards, but inwho did smoke, and that of the smokers steadily de-stead of being put around the trees they should be spread over the whole land. But eral trustworthy reports of the Minister of public in-region? We have little or no wood, and de-course little or no ashes. In our limited ex-perience we have learned one thing in re-gard to orchards as well as fruit trees of development. But n witter are the ashes to come from in this perience we have learned one thing in re-gard to orchards as well as fruit trees of levelopment. But a writer every kind that we have cultivated, and we development. But a writer every kind-that we have contracted, and we ical journal complains that believe the principle can be applied pretty believe the principle can be applied pretty much to everything that grows upon the carth, which is, that the application of ma-nurs benefits them all. Ground occupied

with fruit trees should be manured as are of Comprehension. f Thoreau that he could take umber of lead pencils with-A celebrated trapper chece he could tell how many balls ble and to become worn out prematurely. With fruit trees should be manufed as are other portions of the land used for the rais-ing of wheat and corn. It is the neglect to do so, in connection with the general neg-ligence with which orchards are treated in many sections, that makes them unprofita-ble and to become worn out prematurely. het pouch by placing his And as to the kind of manure with which without stopping to count d: "I can tell the number ntly, without stopping, as word without spelling it." A liberal application of this only every third year, with careful pruning and scrup-ing of the trees, and ferreling out the borustomed to take in the subin turning the leaves over agician, trained himself to ers, will make a prodigious change in an erception, when a boy, by hop window at full speed, to tell what was in it. We glancing down the pages.
