> THE LATE MR. PETER GAYLOR .- Our readers may remember that a few weeks ago we published an item to the effect that Mr. Peter Gaylor was recently found frozen to death on the plank road a few miles beyond English Center. The account, which we condensed from our exchanges, stated that a jury summoned by Squire Wood, of White Pine, rendered a verdict that "the deceased, Peter Gaylor, came to his death from the results of intoxication and exposure to the inclement weather," and that his death was solely due to the causes mentioned.

> We knew nothing of the case further than connected with Mr. Gaylor, we print the communication as follows:

So, consequently, his death could not have been caused by intoxication, but by exhaustion and exposure to the inclement weather. But let that be as it may, there is one thing that we want the state of the conclusion that his horses were believed. O DEAR, WHAT CAN THE MATTER BE?-The Tioga News of last week published a letter from a correspondent who signs himself "A. L." It is decidedly spicy, and we quote a portion of it: I saw in a late issue of the News a state-

ment which sounds vastly different from the talk around town about the arrangement between the new paper committee and your-self; and I feel that you have not been fairly dealt with. Your many friends understood from the first that, in the "new order of things," you were to be provided for by purchasing your stock, and giving you a sit-uation in the office, if you desired one, and did not know the truth of the matter until the statement, referred to came out in your the statement, referred to, came out in your paper. Tioga is noted for having, among other things, several good talkers, who manage other person's affairs much better than they do their own. I think it is due to the management of these persons that the people have not understood the matter, better, and I feel that the gentlemen who were influential in having you start the paper will see that you do not lose by it,—at least they

ought to. It seems that some of the committee on arrangements are better at talking than buy-ing presses. "Curses, like chickens, often come home to roost." Some of their mis-fortunes may be attributed to their lack of charity toward the News. I am afraid some of their waiting articles will get stale, but, as their principal contributors are gentlemen of leisure, they can easily revise them.

RIOT AT DRIFTWOOD.—The Cameron Her-ald says that the boro of Driftwood on Mon-day, the 10th instant, was the scene of a most disgraceful and bloody fight amounting to a disgraceful and bloody light amounting to a fearful riot. It appears that a lot of Swedes, about thirty-five in number, had quit the employ of the P. & E. railroad, and were about to leave the county for Chicago. They came to Driftwood expressing their intention of "cleaning out the town." They soon succeeded in getting up a general fight with this, but supposed the jury were probably the citizens, lumbermen and others, both lives in finding the regular condend A Irish and natives. Our informant, Dr. J. S. day, being already well known to the traveling public. He used to keep a good hotel justified in finding the verdict rendered. EGYPTIAN CORN!

THE subscribe roffers to the farmers through the county the Egyptian Corn, which upon trial was tound to ripen fi planted even the last of July. It is estimated, from its very prolific qualities, to yield 150 byahels per acre, and weighs, by measure, 65 pounds to the bushel. This corn was produced from some procured direct from Mr. Jones, our Consular Agent, directly on his return from Egypt. It needs no different culture from that of other varieties, and in the South two crops can be raised on the same ground in one year. It grows in the form of a tree, and 84 ears have grown upon one stalk—average from 6 to 15 ears. For domestic use it is unparalleled. When ground and properly bolied, it is equal in color and ineness to wheaten flour. As a forage drop, by sowing in drills or broadcast (for early feed,) there is no kind of corn so well adapted to mitch cows, and none that will yield half the value in stalk or corn.

It can be successfully grown in any State.

Terms:—In order that all may receive seed, we have reduced the price to; one dollar a package. Any person who will get up a club of five, will receive a nackage gratis—15 packages for \$20; 100 for \$30. One package will contain enough to plant the following season from 20 to 30 acres; also, directions for planting it. Address,
