We have received a copy of a document which in more respects than one reminds us of the famous Division Handbills that so interested and amused the citizens of the county last winter. It is a poorly printed broadside, as they were; it talks about "the must of the most of their spring goods." It would seem that all clerks in the seve-ral government departments drawing sala-ries ranging from \$1,200 to \$3,500 per an-num should be able to get along without us of the famous Division Haudbills that philological rules and shackles that they did, and-to speak politely-it betrays the same capacity for hyperbole that they did. It is true that its rhetoric is not so glow.

ing and unrestrained as the earlier numbers of the Handbill series; but this subdued tone is doubtless due to the fact that the sheet is put forth mainly for the edification and enlightenment of a body of men who might not faily appreciate the loftier flights struck him that a position worth \$1,200 per of the Handbill literature. We confess to some little regret on this point, for if our ready writer had only "let himself out" with his wonted looseness, "the assembled wisdom of the State" might at least have been somewhat more amused by his production.

But if he isn't quite so free as usual with his mother-tongue, he shows no little courown notions. To be sure he doesn't now say that Liberty is sixty miles from Wellsboro, when it is only twenty-three; but he is evidently indulging in a reminiscence of that astonishing statement when he asserts that "there are large territories thickly settled, from which it requires two full days, at least, to go to and return from the county at least, to go to and return from the county scat." Perhaps this isn't intended to apply to Tioga county; but if it is, it is one of the indications are that the California crop of least of the writer's extravagances. Here 1873 will be about 30,000,000 bushels, or least of the writer's extravagances. Here is one which the people of the county will appreciate much more thoroughly than could the members of the Constitutional Convention, to whom it was specially ad-dressed: Speaking of Mr. Niles, the writer He is a men of about 50,000,000 busnels, or equal to last year's crop. California papers talk very complacently of supplying the whole world with bread. John Tyler, Jr., son of ex-President Tyler, has been in Washington since before the inauguration. What his business is here no one can tell, except it is to get an office. says, "In his own county, containing over eleven hundred square miles, and about 37,-000 ibbabilights, a majority of the citizens 000 inhabitants, a majority of the citizens whose social habits are anything but praise desire to divide the county and remove the county seat, where he resides, from its pres-ent locality upon the western skirt of the in tis statistics of church membership of 6,528, instance, it assigns a membership of 6,528, other the statistics of the statistics a more accessible and central point." And the very men who were circulating this statement were at the same time by the records of the denominations them publicly insinuating that Mr. Niles had selves. The Methodist population of the moved his amendment in the Convention ["lobby members" generally, amounts to with a view to securing his election to the Legislature by the people of the county, a population. The membership of the Cath-olic Church is put down at less than 2,000. majority of whom are claimed to be in favor 000, or less than one-twentieth of the whole of divisiont These are both very pretty stories when told abroad, but they would probably sound better if they were rehearsed a little farther apart. This self-contradiction is significant-it shows how little faith the Handbill men put in their own claims. Of course they know that a majority of the citizens of the county do not desire to divide it. The whole county has been very thoroughly canvassed on that question since the great inancial house of Jay Cooke & Co., expresses surprise at the late collapse of the bull movement in gold. The sudden subsiand the result is well known to everybody dence of the movement and the ease which followed indicate that there was in the late in this region. Enjoying every advantage of time and organization, and putting forth the most strenuous efforts to carry thein point, the friends of division finally went to Harrieburg claiming to have 4 000 names on in this region. Enjoying every advantage Harrisburg claiming to have 4,000 names on their petition. And of these original petitioners at least 1,500 afterward signed a vig- article of merchandise to tumble. tioners at least 1,500 atterward signed a vig-orous remonstrance against division, alleg-ing that, they had subscribed the petition unit, looking to the ultimate adoption of an orous remonstrance against division, allegunder a misapprehension of facts. This international system of coinage. Our silver left the division men 2,500 names in favor coins are to be of nine tenths fineness, thus of their scheme, even accepting their highest claims at Harrisburg last winter as correct. On the other hand, the opponents of The object of this change is to make our silver coins more popular in Oriental countries, with which it is a matter of special 7,500 men. The preponderance in opposi- importance to extend our commercial relation to county division was so great that the Representative of the county did not fcel warranted in introducing a bill to submit the question to a vote, and the promoters of the question to a vote, and the promoters of the question to a vote, and the promoters of the question to a vote, and the promoters of the question to a vote, and the promoters of the question to a vote, and the promoters of the question to a vote, and the promoters of the question to a vote, and the promoters of the question to a vote, and the promoters of the promoters of the question to a vote, and the promoters of the the question to a vote, and the promoters of the job retreated from the Capital in dismay and disgust. Of course this is all perfectly understood by everybody interested in the thirds per cent. in 1872, the exports of soil affairs of the county; but the Handbill wri-ter probably thought his whopper might im-pose upon some members of the Convention, just as the Court House story deceived many decline is cotton and its manufactures, people in the county for a little while last winter. But no doubt he will find this latest 1870. Animals and animal products arose falsehood quite as vain as the first one. It from 46 to 78 millions in 1872; breadstuffs is certainly easily enough exposed. The Handbill author further asserts: "It is said that he and his colleague, Mr. Elliott, have boasted that they would effectually prevent the division of their own county." It is hardly worth while to waste words on worked up at home, thus saving the cost of a charge which even the Handbill man transportation and giving home employshrinks from making directly; but it may be remarked that if either Mr. Niles or Mr. the bud an attempt to foist watches of Eu-Elliott has made any such remark as is here ropean manufacture upon the country un-insinuated, it was not so much of a "boast" der the name of American watches. By an after all, when it is considered that more than two thirds of the people of the county are opposed to any division. As to the proposed new constitutional ar-ticle relating to the division of counties, al-branches of manufacture will be brought to ready adopted by the Convention in com-mittee of the whole, we have very little at this time to say. It may be remarked in this time to say. It may be remarked in passing that, so far from its being framed for special lecal application, it is almost an exact copy of a portion of the Constitution of another and a newer State, recently adopted by an overwhelming popular ma-jority. We have already published its projority. We have already published its pro- have nearly reversed the proportions of our visions and indicated our approval of them, iron consumption. It is a general complaint among landlords, grocers, and drygoods men that too great a portion of the clerks are poor pay, and with many business men it is quite sufficient reason for refusing an applicant credit, to know that he or she is a government clerk. On one occasion, a young man with a family, a government clerk, who had settled in the northern part of the city near a hardware store on Sev-enth street, needed a pound of nails, and had no money to buy them.
