BY"-The following expressions of opinion as to the value of this work, for which Miss Cady is now canvassing, will be found of interest at this time:

that it is a pleasure to recommend. The author has never turned his extensive knowledge of Natural History to better account. While there is much in the volume that is of real service, even to a theological scholar, there is a vast amount of information for the ordinary reader, throwing light on many obscure passages of Holy Scripture and investing some of its noglected parts with lively interest. With the graphic engraved illustration- the pages are made fascinating to children In a Christian family the whole might be gone through in a few Sanday evenings with advantage and delight. F. D. HUNTINGTON,

Bishop of Central New York.

I am well acquainted with Rev. J. G Wood as a cultivator of science, and am familiar with his works. His "Scripture Natural History," like his other works, is perfeetly trustworthy in statement and remarkably thorough. Yet the subjects are treated mastrictly popular way. There is not a particle of "humbug" about this book, and I would be glad to encourage its extensive circulation, both among Bible students and all others at all interested in Natural Histo-A. WINCHELL, Chancellor of the University of Syracuse.

WELLSBORO, PAG June 21st, 1878. Rev. J. G. Wood's "Scripture Natural History" is a work which I can confidently recommend. But with the recommendations such eminent men and scholars as Prof. Winchell, Bishop Huntington and others there is scarcely need of my adding many words. Any who purchase the work can not fail to be both interested and profited by its W. M. HENRY, Pastor M. E. Church.

> A Correction.-It seems we were led into a slight error in our recent statement

To the Editor of the Agitator, SIR:—I find in your issue of the 17th inboro is rapid and steady.

Hon. John I. Mitchell, of this village, delivers an address to the Literary Societies at Mansfield this evening.

DIR:—I and in your issue of the 17th instant a statement respecting the death of Programment of the track. The statement is made that the cause of the accident was the cure striking a stick of timber. was the cars striking a stick of timber. "In summer when the days grow long"

that's now. But they ain't a-going for to grow any longer this year.

The boys of the Soldiers' Orphan School are to furnish the music for the celebration at Covington on "the Glorious Fourth."

Was the cars striking a stick of timber. Allow me to correct the error by stating that I was called upon a few minutes after the accident, and went to the scene of the disaster, and immediately empanneled a jury to investigate the cause of his death. After a thorough and exhaustive examination of the cars, track, ground, and everything that would throw the least light on the matter as to the cause of the cars running off the track.

The jury, after flicking all the necessary inquiries, could find fit cause (str far as human investigation, is confidenced) for the cars getting off the track. No timber or lumber of any kind was found on or near the track where the cars went off. The Morris Run Coal Company have adopted every precautionary measure to keep all obstructions off the track, so that no blame can attach to the company for any negligence on their part. The engineer, fireman, and brakemen were examined under oath, and could assign no cause for the accident.

By inserting the above you will greatly oblige the undersigned. Yours truly.

These straps must have become twisted tighty during the night, as in the morning both lorses were found dead. The team was valued at \$450.

committed at Lock Haven the other night. The Republican says that a merchant drumner from Philadelphia went out to attend German ball, and when returning was ecosted by two men, one of whom claimed that he had been robbed of a watch, and the other assumed to be a policeman. They accused the "drummer" with the robbery, and he in conscious innocence submitted to an arrest. They examined his pockets and took therefrom his watch, money and other valuables, and left him. Another gentleman came up at that moment and consoled hive on his misfortune, assuring him that it would be all right when he came before the ringistrate. This gave the "policeman" and his friend time to get away, and they have not since been heard from.
