These statistics may be thought dry and uninteresting, especially by your lady readers. But, I hope, averse as the sex is, generally, to mathematics, and the contemplation of fgures, they will not turn aside from these without a thought. I am persuaded, if the female members of our churches would interest themselves more in these matters. that far more money would find its way into the treasury of the Lord. The contest respecting the Presidency of Knox College continues, and the public are likely to be made thoroughly acquainted with all the facts. Dr. E. Beecher has been at Chicago, lecturing upon the subject. Of course he sustains Dr. Blanchard and the Congregational interest. Rev. G. W. Gale, the founder of Galesburg, and long Professor in the College, is charged as the cause of all the evil. He is a New School Presbyterian, and received the Doctorate from Union College, Schenectady, at the recent commencement. He has just returned from the East, and is out in a letter in the Chicago Press, a secular paper, in opposition to the allegations of Dr. Beecher. He says: "If the statements made by Dr. B. are correctly the study of the Scriptures gives good asreported, as I have no doubt they are, from the character of the gentleman who took notes, the most important of them are wholly incorrect, and others are so onesided and partial as to amount to clear misrepresentation. I am sorry, for the Doctor's sake, and for religion's sake, as well as from a regard to the peace of the community, that he has felt it his duty to take this course to benefit the College. It can only the ornamental; but each had that attenwork evil, without good to any body, unless tion which their importance demands. kindly overruled by a merciful Providence, which I trust it will be."

It is painful to record these family contests, but as they have become so public we may notice them, as affording evidence of the impracticability of the lauded co-operation of these sister churches. We only hope that the cause of souls may not suffer in the unseemly contests.

A wealthy lady, by the name of Garrett, made a donation by will, some time since, of a large amount of property, in Chicago, to our brethren of the Methodist Episcopal Church, to found a Theological Seminary, in or near that city. The property has risen in value, until it is estimated to be worth three hundred thousand dollars, and the foundation of a flourishing school has been laid at Evanston, under charge of Dr. Dempster and others, eminent for worth and talent in that Church. I perceive, however, that the will of Mrs. Garrett is about to be contested by heirs in the East, who, among other pleas, urge that undue religious influence was used to induce her to make the bequest. We sincerely hope the selfishness of, perhaps, ungodly men, will not be allowed being of cholera infantum. to divert to other and secular uses, these In Philadelphia, during the week, there were

> There are several things which we will mention that left a very favorable impression upon our minds:

First. The perfect order and lady-like deportment of all the pupils, evidencing the good discipline by which they have been daily controlled. Again, there was good evidence to show that the examination was not simply on set recitations prepared for the occasion; but on so much of the subjects studied by the pupils, as the time for examination would allow.

his new decision. Again, it was evident that the pupils were not simply taught to memorize the words of a book, but to study and master the subjects assigned them; and that the aim of the instructors was as much to discipline the mind, as to store the memory with knowledge. Again, the prominence that was given to surance for the moral and religious influence of the school over its pupils. Cultivation of the heart is of equal, if not of more importance than the cultivation of the intelect; to reach the highest perfection both must be cultivated.

Another thing which left a very happy impression was that the solid branches of an education were not sacrified to make way for

A case of pure and unmistakeable Asiatic cholera occurred in Newark, New Jersey, on Saturday, and the cause assigned is the filthy condition of the outhouses in the neighborhood where the case appeared. Two deaths from cholera also took place last week in New York city, where out of five hundred and fifty-one deaths, no less than two hundred and sixty were from bowel diseases, one hundred and fifteen

Iron City Commercial College. One of the most flourishing and attractive schools of learning is the Iron City College. It numbers among its students young gentlemen from various States of the Union, and even from the largest cities, where there are similar instintions-but this one has emphatically overshadowed them all. We boldly assert that there is no city in the Union which has a commercial school, where the branches of a business educa-

ion are so thoroughly taught, as in the Iron City College of Pittsburgh. On entering the beautiful and commodious college hall, we were surprised to witness the great number of students in attendance. Every desk in that large room appeared occupied, and the close attention of the students, and the delightful order, were in fine harmony with the

place. The energy and consummate skill with which this institution has been managed, despite the op-position it has encountered from its predeceseors and contemporaries, reflect the highest honors upon its gentlemanly Principal, F. W. Jen-kins, Esq. It has acquired the position, (which it can now maintain with ease,) of being the very foremost and most efficient Commercial College, not only in this city, but in the United States .-Pittsburgh Union.
