Early last Spring she was visited by her pastor, and gave him great satisfaction as to her views of the nature and importance of revived religion; of her personal interest in it, and her willingness to pray for others, and encourage them to attend to the duties of religion, as recommended by the Pastoral Letter of the late Convention of ministers and elders held in Pittsburgh. Soon after this visit, a series of union meetings were held in the First Presbyterian, the Episcopal, and Methodist churches of Kittanning, and Mrs. Quigley attended in all the churches, and took a deep interest in the exercises. This interesting fact is now mentioned in order to. show her increased desire for progress in experimental religion in her own soul, and also in the Souls of other persons, and to show she had union and followship with all he lead that Tana and followship with all the lead to the same and followship with all the lead to the same and followship with all the lead to the same and followship with all the lead to the same and and fellowship with all who loved the Lord Jesus Christ, and called upon his name. MECHANICS, INVENTORS. MANUFACTURERS AND FARMERS.

THE SCHENITIO AMERICAN has now reached its Fourteenth Year, and will enter upon a New Yolume on the 11th of September. It is the only weekly publication of the kind now issued in this country, and it has a very extensive circulation in all the States of, the Union. It is not, as some might suppose from its title, a dry, abstrace work on technical science; on the contrary, it so deals with the great events going on in the scientific, mechanical; and industrial worlds, as to please and instruct every one. If the Mechanic or Artisan wishes to know the best machine in use, or how to make any substance employed in his business—if the Housewife wishes to get a recipe for making a good color, &c.—if the Iventor wishes to know what is going on in the way of improvements—if the Manufacturer wishes to keep posted with the times, and to employ the best facilities in his business—if the Man of Leisure and Study wishes to keep himself familiar with the progress made in the chemical laboratory, or in the construction of telegraphs, steamships, railroads, respers, mowers, and at thousand other machines and appliances, both of peace and war—all these desiderata can be found in the Scientific American, and not elsewhere. They are here presented in a reliable and interesting form, adapted to the comprehension of minds unlearned in the higher branches of science and art.
