Now, the three parties all profess a desire that the roads shall be open equally to the commerce of all nations; but, in whese possession, or under all got out. On Monday it comminced raining and has continued up till the present writing. This will give us whose guardianship shall they be? This is, applent; of water to keep our rivers at a gool stage, and secure parently, the vital question. The President claims for the United States. Eogland and France will not accede. They put in their claims. Each party has a naval force on the coast, to help prices. At Cincinnati it is quoted at 65c; Louisville, 6.c; Chicago, 45@55c; and St. Louis, 75@85c. diplomacy. Neither would like to be the aggreszor, in commencing actual hostilities; but an acoident, or a misunderstanding on the part of Sta Captains, might induce the blow.

An exceedingly dangerous feature of affairs. just at present, is the escape of an American vessel, from Mobile, with some two bundred fillibusters. If these should elude our cruisers, and effect a landing in Nicaragua, the English and French will be asked to land men from their vessels, to capture and expel them. This will be granted, as our Government at Washington, has been already informed. The result will be a complication not easy to disentangle, and may in2 augurate a series of events the most direful.

The danger of a conflict with France is far greater than with England. Our means of an-noying England are immense—our access to the Canadas, the destruction we could bring upon their shipping interests, the cutting off of the supply of cotton, and the stoppage of our exten-sive trade with them, are evils which they would incur only under the direst nccessity. But with France things are different. She has no territory which we could reach. Her trade with us, though large, is not by a great deal so important as that of England. Her mercantile marine is much smaller than that of England, and is far less exposed to attacks by our privateers. And her navy is very powerful, and it wants employment. navy is very powerful, and it wants employment.

We shall hope and pray for peace. CONGRESS is still rather preparing for business than transacting it. The House has been principally engaged with an application for the impeachment of Judge Watrous, of Texas. In the Com-

mittee of Ways and Means, Mr. Phelps, of Mo., has been placed in the Chair. The character of Total expenditures for the year ending June 30, 1858, \$12,721,686 Total revenue for same time, . . . \$18,792 the Committee indicates favor toward an increase of the tariff, but not much in the way of "speoifio " duties.

In the Senate the matter of most exciting in terest is the removal of Judge Douglas, from the chair of the Committee on Territories, a position which he had long occupied, and the giving of that important position to Mr. Green.

DECEMBER 10.-The bill for repealinga portion of the Eaglish Kausas bill, provides that that territory shall not be admitted as a State until her population shall number 98,000. The same principle is also to be applied to other territories seeking admittance. DECEMBER 12 .- The Presidentis much exercised

at the conduct of the British officers in Nicaragua t this season. and a strong naval force will soon be ordered t that quarter and the Gulf.

DECEMBER 18 .- The President has been engaged to day with the Secretary of the Navy, ar-ranging the squadron intended for the Gulf and making out the programme which the commanders are to follow in the delicate and important duty which will be assigned them.

DECEMBER 14 .- A large number of appointments made during the recess of Congress, also the Chinese, Japanese, and other treaties were, in the Executive Session of the Senate, to-day, referred for examination. The substance of Commodore McIntosh's dispatch to the Navy Depart ment, concerning the visit of the British officers to the steamer Washington, is, that said officers asserted their right to make such visit by reason of the British protectorate of San Juan Del Norte, established at the request of Nicaragua.

The Pittsburgh Gazette.

This journal, just entered upon its seventy-scoond year, is, we believe, the oldest newspaper in Pittsburgh, and in all the West. It was ties, scarfs, shawls, &c., &c., at close rates for established by Mr. Scull, in the year 1786, and cash, by Carnaghan, Federal Street, Allegheny has hence been connected with literature, politics, -trade, and improvements, for seventy-two years, aiding all that time in planting and building up this mighty population West of the Alleghenies. As political parties were divided in an early day, the Gazette was Federal. With the remnants of that party it became an integral portion of the Whig system. When the Whigs ceased to be known as a distinct portion of the political family, it became Republican ; and now ranks among the most able, dignified, and gentlemanly organs and advocates of the party.

With mere partyism, however, we have nought to do. The Gazette, under its present proprietors, and its able editorial corps, we look upon as being, for facts, a reliable paper. We find it daily stored with the earliest news, and not defiled with narratives corrupting to good morals, nor offensive to true delicacy.

The Slave Trade Attempted.

We see it stated that the yacht schooner Wan derer has landed a cargo of slaves, about three hundred and fifty, from Africa, on the coast of Georgia, near Brunswick, and some of the negroes were sent up Satilla River on board of a steamer. The District Attorney has arrested three persons supposed to have been engaged in the transaction. The proceeding is a very bold one, if the report is true.

Young Men's Library Association.

The young men of Pittsburgh, associated for literary improvement, show a commendable zeal in the carrying out of their purpose. Their Library is extensive and valuable. They also endeavor, and with much success, to obtain lecturers of a high order. Their listures commonced last week, and will be frequent during the Winter.

Health of Pittsburgh.

The city is remarkably healtby at present. During the week ending November 28th, there were but nine interments reported, viz : three of males, and six females. Of these five were adults, and four children. Two died of consumption, two of scarlet fever, one of apoplexy, one of pneumonia, one of inflammation of the stomach, and one of convulsions.

I took two teaspoonfuls at one dose. It soon began to operate, when it made thorough work. (I had a regular worm factory within me.) I should judge it brought away from me some two quarts of worms; they had the appearance of having bursted. I took the remainder of the bottle at two doses. The effect was, it brought away about one quart more, all chopped to pieces. I now feel like a different
