The Little Girl's Good Morning. BY MARY IRVING. "Oh! I am so happy !" the little girl said, As she sprang like a lark from the low trundle

bed: "Tis morning, bright morning! Good morn, papa!

Oh, give me one kiss for good morning, mamma Only look at my pretty canary, Chirping his sweet good morning to Mary! The sunshine is peeping straight into my eyes-Good morning to you, Mr. Sun, for you rise Early to wake up my birdie and me,

And make us as happy as happy can be." "Happy you may be, my dear little girl," And the mother stroked softly a clustering curl-"Happy as happy can be-but thick of the One | gardens in the State are still a disgrace to Who wakened, this morning, both you and the

sun." The little one turned her bright eyes with a nod-"Mamma, may I say good morning to God?" "Yes. little darling one, surely you may-Kneel as you kneel every morning to pray."

Mary knelt solemnly down, with her eyes. Looking up earnestly into the skies; And two little hands that were folded together, Softly she laid on the lap of her mother; "Good morning, dear Father in Heaven," she

said:

"I thank thee for watching my snug little bed For taking good care of me all the dark night, And waking me up with the beautiful light; Oh, keep me from haughtiness all the long day, Blest Jesus, who taught little children to pray."

An angel looked down in the sunshine, and smiled; But she saw not the angel—that beautiful child.

ENGLISH AND GERMAN PRINTER. Pp. 224. HISTORY OF THE PATRIABOUS, FOR THE YOUNG, English and German. Pp. 384. Published by the American Tract Society, 150 Nassau Street, New York; and for sale at the Tract House, No. 929 Chestnut Street, Philadelphia; and by Wm. S. Rentoul, St. Clair Sfreet, Pittsburgh. These little books are intended for the use of families and schools, in which both the English and German languages are used. Religious instruction is the principal aim, but such as read German only, will find them valuable helps in learning to read English; and those who read English only, will receive from them much aid in learning to read German. Many young Germans who can easily learn to speak the English language, are deterred from attempting to be able to read, from the long and tedious course of spelling that seems to rise up before them. But, according to the system adopted here, the process is greatly shortened, and the result desired, much more easily attained. American Christians can do a good service to their German neighbors. and helps, by putting these books into their hands. They will, at the same time, acquire a knowledge of our language, and also many of the great truths of our holy religion.

And its position, both present and prospective, is such as must give it great importance in the commercial world, and also in the eyes of statesmen. But, notwithstanding the immense number of letters and editorial leaders that have been written, this is the first general and at the same time particular, history of the country that has appeared. As Vice Consul of the United States, Mr. Stout had unusual facilities for acquiring a knowledge of the productions of the country, the character of its people, and the political affairs of this and the adjoining years in Ohio. He was for many years a Ruling Elder in Concord congregation, Presbytery of St. Clairsville a man States. Agricultural.

The Garden of the Farm.

With all the improvements, and they have been many, three fourths, of the farm our husbandry. The most easily raised vegetables are not to be found in them as a rule; and the small fruits, with the exception of currents, are the rare exceptions. Not half the farmers in the State have ever tasted an early York cabbage.

A good variety of vegetables is within the reach of every farmer the year round. They are not only an important means of supporting the family, paying at least onehalf of the table expenses, but they are conducive to health. They relieve the terrible monotony of salt junk, and in the warm season prevent the fevers and bowel complaints so often induced by too much animal

Thorough Tillage.

At one of the Irish agricultural meetings, one of the speakers remarked—and the truth may well be applied in this country:-"What brought out the immense agricultural wealth in Scotland? and what enabled. the small farmer in Belgium, who, on seven or eight acres of light, sandy land, was able to do better for himself and his family than we can do on twenty or thirty acres of land in this country? It was not by allowing threefourths of a light tillage farm to remain in poor herbage, and making the other quarter pay the rent. It was because the farmers in those countries be alluded to, made agriculture a study, a duty, and a pleasure, and because the farmers till their land to the best advantage, and because no man there would keep one acre of land more in his possession, than his capital and his means would enable him to cultivate."

II. THE LAST DAYS OF JESUS; or, The Appearances of our Lord during the Forty Days between the Resurrettion and the Ascension. By Rev. T. Y. Moore, D.D.; Richmond, Virginia. 12mo, pp. 300. Price 55 cents; postage 18 cts.
This book describes, in aivery pleasing manner, the ten successive manifestations of the Saviour in his bodily presence, after his resurrection; and, indeed, tells all that is known about him during the days that intervened between that event and his ascension. The author draws many beautiful and important lessons from the Scripture narratives which he explains, and in his hands they prove to he rich in instruction to a very remarkable, degree. Although this book has been published but a few weeks, a second edition is already called for.

DRS. FITCH & SYKES would state that their treatment of Consumption is based upon the fact that their treatment of Consumption is based upon the fact that the disease exists in the blood and system at large, both before and during its development in the lungs, and they therefore employ Mechanical, Hygienic and Medicinal remedies to purify the blood and strengthen the system. With these they use Medicinal Inhalations, which they value highly, but only a palliatives, (having no curative effect when used alone,) and Invalids are earnestly cautioned against wasting the precious time of curability on any treatment based upon the plausible, but false idea; that the "seat of the disease can be reached in a direct manner by Inhalation," for as before stated, the seat of the disease is in the blood and its effects only in the lungs.

inc. tf. CURE FOR CONSUMPTION DR. CHURCHILL'S DISCOVERY!

Winchester's Genuine Preparation of Dr. J. Churchill's Compound of the HYPOPHOSPHITES OF LIME, SODA, AND POTASH. Y A SPECIFIC REMEDY FOR THE TREATMENT

CONSUMPTION. The great Chemico-Medical Discovery of the celebrate.
Dr. J. F. Churchill, of Paris, first made known by him to the French Academy of Medicine about two years ago marks a new and important Era in the annals of Medicine Science. Science.

Now, for the first time Is the history of the world, has a REMENY been found that surely strikes at the very foundation of Pulmonary Disease; and by restoring the deficient chemical elements of the blood, increases the principle which constitutes nervous or vital force, invigorates the nutritive functions, and thus not only durks, but also prevents the development of this hitherto most fatal Scourge of the human race.

vanue, the development of this hitherto most fatal Scourge of the human race.

CAUTION TO THE PUBLIC.

Various preparations are already in the market, purporting to be based on Dr. Churchill's discovery against which we solemnly caution both the profession and the public.

"To remove all doubts in regard to the chemical purity of my preparation of Hypephosphites, I beg the attention of the public and the profession to the fellowing.

TRETHONY OF DE. CHURTON:

"I have carefully analyzed samples of the Hypophosphites of Lime, Sods, and Potsah; from which Mr. J. Winchester manufactures Dr. Churchill's Compound Solution of, the Hypophosphites, and find them to be properly made and chemically pure. Having had, many opportunities of testing the uniform purity of the articles which he uses in compounding this new remedy for consumption, and having a personal knowledge of his honesty and integrity, I feel that I can assyre the Profession and the Public that this Preparation of the Hypophosphites can be relied on:

"James R. Chillon, M.D., Chemist."

"New York, February 3, 1859."

And now, to forther caution the public against impure

"New York, February 8, 1859."

And now, to further caution the public against imprior and unreliable preparations claiming to be founded on Dr. Churchill's discovery, I quote an extract from a letter published by him, dated the 24th of April, 1858:

"Termony or Dr. Grucchill."

"To be used with effect, the Hypophosphites must be perfectly pure; otherwise they may, in some cases, appear altogether ineft, or even injurious. In five cases onto fix, the Saits usually sold as pure in Paris, under the name of Hypophosphites, are totally unfit for Medical use. *

"I use no other treatment of any kind unless required by the existence of complications; such as intercurrent infammation of the lungs, diarrhes, cardiac disease, &c."

The use of the Hypophospites shows these preparations to have a two fold and specific action. On the one hand, they increase the principle, whatever that may be, which constitutes nerveus force; and, on the other, they are the most powerful blood generating agents, far superior to any high. powerful blood generating agents, far superior to any hith-erto known

The physiological effects of their use are shown by an in-crease of nervous power, sometimes even from the first day of their administration, together with an unusual feeting of comfort and strength. The appetite increases, often in an extraordinary manner. The evacuations become more regular and more abundant, the perspirations, if any have existed, cease, sleep becomes calm and profound. All the general symptoms disappear with a rapidity which is really marvelous marvelous

R. CHURCHILL'S SPECIFICS FOR CONSUMPTION. SYRUP OF THE HYPOPHOSPHITES.

SYRUP OF THE HYPOPHOSPHITES,
Composed of the Hypophosphites of Lime,
Soda, Potassa, and Iron.

These remedies were brought to notice by Dr. John
Francis Churchill, an eminent physician of Dublin, and
have attracted much attention from the medical profession.
To give a general idea of their action, we make the following extracts from Dr. Churchill's Parer "On the Proximate
Cause and Specific Remedy of Tuberculesia," read before
the Academy of Medicine, Paris, July, 1857. Says Dr. C.:—
"The total number of cases of Phthisis treated by me
amounts to thiety-five. All were either in the second or
third stages of the complaint; that is, they had either
softened tubercles or cavities in the lungs: of the disease disappearing altogether in eight out of that number; eleven
improved considerably, and fourteen died. The results
will be found to justify the following conclusions:
"The proximate cause, or at all events an essential condition of the tubercular disthesis. Is the decrease in the
system of the phosphorus which it contains in an oxygenisable state.

"The specific remedy of the disease consists in the use of
a preparation of phosphorus, uniting the two conditions,
being in such a state that it may be directly assimilated,
and at the same time at the lowest possible degree of oxydation.

"The effects of these salts upon the tubercular disthesis

dation.
"The effects of these salts upon the tuberoular disthesis dation.

"The effects of those saits upon the tubercular diathesis is immediate; all the general symptoms of the d-cease diappearing with a rapidity which is really marvelous. If the path-vogical deposit produced by the dycracy is of recent formation, if softening has only just set in, and does not proceed too rapidly, the tubercles are re-absorbed and disappear. When the softening has attained a certain degre, it sometimes continues in spite of the treatment; and the issue of the disease then depends upon an anatomical condition of the local lesion, on its extent, and upon the existence or non-existence of complications. I have made numerous attempts to modify the local condition of the local lesion of the local condition of the long by the inhalation of different substances, but have never obtained any satisfactory result independent of what was to be attributed to the specific treatment. The Hypophosphites are certain prophylactics against tubercular disease.

"The physiological effects show these preparations to have a two-fold action; on the one hand they increase the principle, whatever that may be, which constitutes nervous force, and on the other, they elevate the tone of the reversal functions concerned in alimentation and nutrition. They seem to possess, in the highest degree, all the therapeutical properties formerly attributed by different boservers to phosphorus itself, without any of the danger which attends the use of that aubstance. The different preparations of Hypophosphorus Acid will undoubtedly occupy one of the most important places in the Materia Medica."

occupy one of the most important places in the Materia Medica."

The success of this treatment being so much in advance of anything before attained in the management of this heretofore almost incurable disease, calls for a thorough testing of these remedies. With this view, the combination here offered in the form of Syrup has been made.

The beneficial effects of these Salts are not limited to Consumption alone; they are appropriate remedies in a large class, of affections resulting from loss of nervous, force, Dyspepsia, Scrofula, debilitated conditions of Females, lack of vital action in Children, and where the osseous system is defective. Understanding the chemical nature of these Salts, physicians will be enabled to use them in a large class of diseases where they seem to be indicated.

We have every advantage in manufacturing, these articles. The Dry Salts we have been engaged in manufacturing, largely since they were first brought to notice, and we know them to be strictly reliable. The Syrup is a combination of the Salts, containing a little over five grains to the teaspoonnil, and is the most pleasant form for taking them.

them.

The large demand for this article has induced us to fix it as low as a reasonable profit will permit. We pack it with care, so that, it, will go safely, and, all orders will receive prompt straintion. Price for four ounce bottles, 61 cents; eight, ounce bottles, \$1:00; pint tottles, \$1.50, or four for five dollars. A liberal discount made to the trade.
