"Prof. Killen has shown himself an original investigator. The history, doctrine, worship, and constitution of the early Church, are traced with great candor and fidelity and there is a completeness in the discussion of each, which in dicates not only the research of the scholar, but the accuracy and system of a profound thinker. The evidence upon which Dr Killen bases his confusions as to the spuriousness of the Ignatian Epistles, seems, to us convincing and even overwhelming * * Tit is evidently shaped by a mind accustomed to clear, strong reasoning, and definite logical expression.—N. Y. Evangelist.

"A work of great leaving from a distinguished minister. "A work of great learning from a distinguished minister of the Presbyterian Onurch in Ireland, giving the results of patient and long-continued research. The facts presented, some of which have been overlooked by preceding historians, will aid those who would become acquainted with the morits of long disputed questions in the ecclesiastical world."—Christian Observer,

"In truth it is so accordant with the spirit of Christ ity, so scholar-like, so patient and discriminating in research, so lucid and logical in arrangement and argum so pervaded by common sense, and so generally true in its judgments—that we like it exceedingly, and cordially recommend it as one of the best condensed histories of the early Church "—Phila. Presbyterian. "His general division of the subject is good, the topics arrangement clear, and the style is always dignified an lucid. In its presentation of the positive theology of the early Christians, and of the historical argument agains prelacy, this work has great merit."—N. Y. Independent. The discussion of the question of the Ignatian Epistes is thorough; abundant evidence is brought forward to prove that they are utterly (spurious; and have no right to a place among the genuine remains of ancient Church literature."—Press

"It is pleasant to bear testimony to great parts and distinguished performances. Dr. Killen is a remerkable man. We think he is in the right place, and at the right sert of work. He is an investigator, ardent palane labing, persevering, and conscientious, and he is scuolar eacugh to open the seal of almost every language of the learned. We hall this volume as one of the most accurate, profound, critical and perspicuous treatises on the ancient Church."—Philo.
