Late From California.

Great Excitement—Seven Miles of Golden Sea-Beach.

The Legislature assemblhd on the 6th of December, and immediately organized, and appointed its officers. The message of Gov. Burnett was transmitted the succeedng day. A few days subsequent to the meeting of the Legislature, Governor Burnett tendered to that body his resignation, and Lieut Gov. McDougal was inaugurated as Governor the subsequent day. On an election for President of the Senate, in place of the Lieut. Governor, Hon. D. C. Broderick, of San Francisco, was chosen a the first ballot. A day for the assemof a Senator has not been named, but the rote will probably be taken about the midde of February.

Business throughout the cities of California, is extremely dull. Goods have been sold at uncommonly low rates, in some instances lower than the first cost in New York. The want of rain in the mountains. has been a serious drawback upon the labors of the miners. Still, considerable amounts of dust are daily purchased by the bankers, though not so much as would have been thrown into market but for the dryness of the season.

Gold Bluff-The discovery and Excitement-Immense · Reports.

All California is excited with the rumor yet heard of. The Alta California has the following account : -

It is well known that the steamer Chesareake, with about thirty adventurers, left this port on the 21st ult., for the Klamath, and in yesterdays paper we gave some account of her progress. Scarcely was our paper issued when the Chesapeake came into port, bringing back five or six of the prospectors," General John Wilson and John A. Collins, Esq., among the number. I meeting of the stockholders was called to hear the result of the expedition, which meeting we attended; and if we can bring our ideas down to anything like reason, after hearing these wonderful details, we will let the public into the secret.

Twenty-seven miles beyond the Trinity, there is a beach several miles in extent and bounded by a high bluff. The sands of this beach are mixed with gold to an extent almost beyond belief. The sand is of two kinds—a fine black sand and a grey sand. The grey sand can be separated very easily from the black sand, and this seems to be a desirable object. The gold is mixed with the black sand in proportion of from ten cents to ten dollars the pound. At times when the surf is high, the gold is not easily discovered, but in the spring of the year, after a succession of calms, the entire beach is covered with bright and yellow gold. Mr. Collins, the Secretary of the Pacific Mining Company measured a patch of gold and sand, and estimates it will vield to each member of the Company the snug little sum of \$43,000,000—and rich as observation warrants them in sup-

disposed to take it. Beside, such is the this claim until Spring, and then take a ship load of the gold and travel to some country where the metal was not so abundant. Mr. Collins saw a man who had accumulated fifty thousand pounds, or fifty housand tuns, he did not recollect whichof the richest kind of black sand.

Gen. Wilson says that thousands of men cannot exhaust this gold in thousands of ments the liberty of going and ascertaining these facts for themselves.

The company will send up 100 additional laborers as speedily as they can be embarked. They also design purchasing a steamer and running her up to the Gold Bluffs .-Sixty men are now at the scene of operaions. We wait with anxiety further reports. Numerous specimens of the sand. and gold were exhibited to the stockholders at the meeting last evening.

The Pacific News says, in relation to ais discovery:

That on the line of coast from 25 miles north of Trinidad to 8 miles south of the Mamath River, there is a very rich deposit of gold in scales intermixed with black sand, is beyond dispute. The gold bearing range of the interior here strikes the ocean, and running down to a line of bluffs from 100 to 600 feet high, more or less precipilous skirts the coast for nearly ten miles. These are the celebrated Gold Bluffs. Old Father Neptune here carries on a goldwashing operation on his own account, precisely on the principle of the miner's goldwashing; but on a colossal scale. As the waves ebb and flow they wash out the Bluff. carrying back into the sea, all the lighter sand, gravel, &c., and leaving behind on the beach the heavy black sand, containing the gold.

Occasionally, after a storm, the black sand is buried under a sort of top dressing of grey sand thrown up by the sea: on removing which, to a slight depth, the black, gold bearing sand is thrown as before.

The very richest portion of this deposit more, the sand is all more or less abounding in gold. We have been shown one sample, which we are assured has yielded upon analysis at the rate of six dollars to the pound; which we presume of course, to be a very favorable specimen. The between Buffalo and Chicago.

more sanguine members of the Pacific Mining Company are confident that the poorest sand will yield from 85 cents to though the Company is giving the best evidence of its faith in them by its expenditures in the enterprize—the purchase of the steamer Chesapeake, &c.

That the gold exists all along the coast at the foot of the Bluffs, and in great abundance, seems to be indisputable.

The San Francisco Herald says: That very large quantities of the precious metal fact that no landing for passengers or goods ling of the joint convention for the choice can be obtained within 27 miles of the scene of operations, the immediate road being of the most rugged and impassible nature, very serious doubts arise as to whether it will be at present an available discovery.

Washington National Monument. Another Block of Marble.

The Board of Managers for the Wash ington National Monument, have signified to E. C. Delavan, of New York, their willingness to receive from him a block of Marble with the Temperance Declaration, already signed by Eight Presidents of the United States, and "to assign to it, in the great National Edifice a becoming and appropriate position." It will be placed in the structure, so as to enable all succeeding of a new discovery, far surpassing anything | Presidents to add their signatures should they desire to do so. The declaration was signed by Presidents Madison, Jackson and Adams, on its being presented to them by Mr. Delavan. Succeeding Presidents have added their signature to it as they have come into office, with the exception of President Harrison, who died before an opportunity was offered to present it to him.

The Declaration as 'it now stands, is as follows: It was prepared before the total abstinence pledge was adopted.

"Being satisfied, from observation and experience, as well as from medical testimony, that Ardent Spirits as a drink is not only needless, but hurtful, and that the entire disuse of it, would tend to promote the
ever return at any time after the wife has
bealth the witten and the harpiness of the start leaves and the harpiness of the start leaves the community, we hereby express our conviction that, should the citizens of the United continue entirely the use of it they would but the good of our country and the world. JAMES MADISON, JOHN TYLER, ANDREW JACKSON, JAMES K. POLK, JOHN Q. ADAMS, ZACHARY TAYLOR,

Uncertain Politicians.

MILLARD FILLMORE

M. VAN BUREN,

We admire an open foe-not a covert and insidious enemy, not an assassin who carries concealed weapons to strike in the dark. Compared to the latter, the bold brigand is a gentleman. There is a class of timid, time-serving politicians, who sometimes, more by accident than intention, take strong ground in support of the cardinal doctrines of a party. But unsteady, uncertain in this estimate is formed upon a calculation their movements, seeking only the current column. that the sand holds out to be one-tenth as that may bear them to harbor, their course is full of shifting and timidity. When once committed, alarmed at their own position, The Pacific Mining Company found they shrink back with fear and trembling, some nineteen men at these diggings. The as the barking but cowardly dog to his kenmen had no disposition to dig, for the gold nel. The truth is, party and patriotism years old, with white feet, and star on the forewas already for them whenever they felt with them, is all a matter of plain calcula-shead. The owner is requested to come forward, tion; they fight for themselves, and when their fortunes are secured, their country is their fortunes are secured, their country is character of the roads that they could not their fortunes are secured, their country is ake away more than 75 or 100 pounds safe. They are pugnacious, quarrelsome spece—an amount too trifling for their and cavilling; willing to fire any mine, so consideration. They had erected a com that they, like the incendiary, may gather briable log cabin and designed watching spoils amid the general destruction. Such men never can command influence, or be vicinity, that he is still to be found in his rooms credited by the people with an honest expression of opinion. When they attempt pared to take Likenesses in a superior manner and any important political enterprise, they are way ward and inconstant, challenging the contempt of their opponents, and wanting the reliance of their friends. One day, they support this man and advocate this measure, and the next they show the white years, and he gives all who doubt his state- feather or the assassin's dagger. But in the intelligence and sterling integrity of the masses, all such find an early and premature grave; and if, for a moment, there be a resurrection, as from the dead, it is like the spectre that soon seeks the shade again. State Journal.

Population of Cities.

The principal cities of the United States have the following population under the recent census, compared with the census of 1840:-

· REMALE VOTERS IN CANADA. - It may be interesting to the advocates of "Wo-men's Rights" to know that in Upper Canada they have admitted women to some of the franchises, the withholding of which confined to a strip of coast nearly two ter (Mass.) Convention. The other day at was greatly complained of at the Worcesmiles long; although for about seven miles the election of School Trustees, several women voted, their right to do so having been legalized at the last session of the Provincial Parliament.

STEAMBOATS have commenced running

Reform and Biennial Sessions. One of the greatest evils of which the

people of Pennsylvania have to complain, \$1,25 a pound. For all which estimates is over-legislation. For years past we have we wish to be in no way responsible, al- a surfeit of it, and our statute books have been crowded with uncalled for and useless enactments. This state of things is all wrong; and in justice to the people who have to " foot the bills," ought not to exist any longer. Our Legislators, instead of promptly attending to the legitimate business for which they are elected, and passing such laws as the interests of the State and the people really demand, consume a great are to be found on "Gold Bluff" can, we portion of the time of the session in legislathink, scarcely be doubted—but from the tion of a purely private, and very often unimportant and useless character, which ought properly to come within the jurisdiction of our Courts. Six weeks of the present session have now elapsed, and among the numerous bills already passed, there is not one of any great public interest. The important business of the session—the work which the people send their representatives here to perform—is staved off from month to month, until it is time to adjourn, and then it is only half done. All the legislation that is necessary now-all that the public interests demand—could be done in one moth; and yet there is every probability that the session will be protracted until April. A radical reform in this particular is desirable; and we hope that before the Legislature adjourns, a movement will be made in favor of Biennial sessions, which we regard as the only remedy for the evils now complained of. Such a movement would be decidedly popular with the tax-paying masses, and its advocates would receive the hearty thanks of the people of the whole Commonwealth. Who, then, will be the first to unfurl the banner of "REFORM AND BIENNIAL SESSIONS" in the Legislature ?- State Journal.

THE NEW YORK LAW OF MARRIAGE, Judge Daily, in a recent divorce case, has decided that, if a husband absented himself from his wife and is gone for the space of five years, without his wife knowing or hearing as to where he is, she is at liberty health, the virtue, and the happiness of the thus been married again, he has a right to of this community. He is prepared to manufacappeal to the proper Court and demand and receive her again as his wife; but until States, and especially the Young Men, dissuch demand and a decree has been made to that effect by the Court the second marnot only promote their personal benefits, riage is valid, and the children, if any under it, legitimate. If after the decree and their children, henceforth, if they have any, will not be legitimate.

ANOTHER SCIENTIFIC WONDER !- Pepsin, an Artificial Digestive Fluid, or Gastric Juice! A great Dyspepsia Curer, prepared from Rennet, or the fourth Stomach of the Ox, after directions of Baron Leibeg, the great Physiological Chemist, by J. S. Houghton, M. D., No. 11, North Eighth Street, Philadelphia, Pa. This is a truly wonderful remedy for Indigestion, Dyspepsia, Jaundice, Liver Complaint, Constipation and Debility, curing after Nature's own method, by Nature's own agent, the Gastric Juice. See advertisement in another

Purify the Blood.

The best Family Medicine now before the public. It has been computed that during the last twenty years, three millions of persons have annually been benefited by the use of these Medicines; a fact which speaks volumes in favor of their curative properties—a single trial will place them beyond the reach of ampetition in the estimation of every patient. By their use the blood is restored to a pure and healthy state, freed from all impurities. The system is not reduced during their operation, but invigorated, and they require no restraint from business or pleas. The afflicted have in Moffat's Life Life and Phomix Bitters, a remedy that will do for them all that medicine can possibly effect.

The genuine of these medicines are now put up with a fine steel engraved wrapper and labels, and converted to the public life of the steel engraved wrapper and labels.

Horses, Carriages, Buggies, single and double Sleigh & &c. Extras will at all times be in readiness to con- ease with which it works. Call and examine, cy passengers to any place they may wish to go.

Another Scientific Wonder. DEPSIN! AN ARTIFICIAL DIGESTIVE

L of Tioga county, will be exposed to public sale on FRIDAY, the 28th day of February instant, at 1 o'clock, P. M., at the Court House, in Wellsborough, the following described real estate, late the property of Geo. Meek, deceased, to wit:

The undivided one-fourth part of a lot of land in Marie terms of the Original Chemist, by J. S. Houghton, M. D., No. 11, North Eighth street, Philadelphia. This is a truly wonderful remedy for INDI-GESTION, DYSPEPSIA, JAUNDICE, LIVER. COMPLAINT, CONSTIPATION and DEBILI-TY, curing after nature's own method, by Nature's

own agent, the Gastric Juice.

Half a teaspoonful of this Fluid, infused in water, will digest or dissolve, five pounds of Roast Beef in about two hours, out of the stomach.

DIGESTION. Digestion is chiefly performed in the stomach by the act of a fluid which ficely exudes from the inner coat of that organ, when in a state of health called the Gastric Juice. The Fluid is the great solvent of the food, the purifying, preserving, and stimulating agent of the stomach and intestines.

Without it there will be no digestion—no convertus. A weak, half dead, or injured stomach pro-duces no good Gastric Juice, and hence the disease.

distress and debility which ensue. PEPSIN AND RENNET. Pepsin is the chief element, or great digesting principle of the Gastrie Juice. It is found in great abandance in the solid parts of the human sto after death, and sometimes causes the stomach to digest itself or cat itself up. It is also found in of land in Delmar township, beginning at a post, the stomach of animals, as the ox, calf, &c. It is the southwest corner of No. 4208, thence north the material used by farmers in making cheese, three hundred and fifty-one perches to a post, the southwest corner of No. 4208, thence east one southwest corner of No. 4208, thence east one hundred and ten and one-half perches to a beech, the first process of digestion. Rennet possesses thence south one hundred and fifty-eight perches astonishing power. The stomach of a calf will curdle nearly one thousand times its own weight enty-four perches to a post, thence by E. Grosjean of milk. Baron Leibeg states that, "One part of Pepsin dissolved in sixty thousand parts of water, will digest meat and other food." Diseased stomacha produce no good Gastric Juice, Rennet or Pepsin.

the Medical College of the University of New York, in his "Text Book of Chemistry," page 386, says, "it has been a question whether artifi-cial digestion could be performed—but it is now universally admitted that it may be."

Professor Dunglison, of Philadelphia, in his great work on Human Physiology, devotes more than fifty pages to an examination of this subject. A RE now receiving a rich and beautiful assort.
