

Rotation of the Earth Rendered Visible.

For some time we have had reports of a machine or fixture having been made in Paris, and exhibited to a few Savans, by the rotations of the earth was rendered visible.

The experiment now being exhibited in Paris, by which the diurnal rotation of the earth is rendered palpable to the senses, is certainly one of the most remarkable modern verifications of the theory.

The apparatus is put in vibration after the manner of a pendulum. Under, and concentric with it, is placed a circular table, some twenty feet in diameter, the circumference of which is divided into degrees, minutes, &c., and the divisions numbered.

Now it can be shown by the most elementary principles of mechanics that, supposing the earth to have the diurnal motion upon its axis which is implied in it, and which explains the phenomena of day and night, &c., the plane in which this pendulum vibrates will not be affected by this diurnal motion, but will maintain strictly the same direction during 24 hours.

In this interval, however, the table over which the pendulum is suspended will continually change its position in virtue of the diurnal motion, so as to make a complete revolution round its centre.

Since, then, the table thus revolves, and the pendulum which vibrates over it does not revolve, the consequence is, that a line traced upon the table by a point projecting from the bottom of the ball will change its direction relatively to the table from minute to minute, and from hour to hour, so that if such point were a pencil and that paper were spread upon the table, the course formed by this pencil during 24 hours would form a system of lines radiating from the centre of the table, and the two lines formed after the interval of one hour would always form an angle with each other of 15 degrees, being the 24th part of the circumference.

Now, this is rendered actually visible to the crowds which daily flock to the Pantheon to witness this remarkable experiment. The practised eye of a correct observer, especially if aided by a proper optical instrument, may actually see the motion which the table has in common with the earth under the pendulum between two successive vibrations.

It is, in fact, apparent that the ball does not return to precisely the same point of the circumference of the table, after two successive vibrations. Thus is rendered visible the motion which the table has in common with the earth. It is true that, correctly speaking, the table does not turn round its own centre, but turns round the axis of the earth; nevertheless, the effect of the motion relatively to the pendulum suspended over the centre of the table, is precisely the same as it would be if the table moved once in 24 hours round its own centre, for although the table be turned in common with the surface of the earth round the earth's axis, the point of suspension of the pendulum is turned also in the same time round the same axis, being continually maintained vertical above the centre of the table.

The plane in which the pendulum vibrates does not, however, partake of this motion, and consequently has the appearance of revolving once in 24 hours over the table, while in reality, it is the table which revolves once in 24 hours under it.

THE EXPERIMENT SUCCESSFUL AT CAMBRIDGE, MASSACHUSETTS. Mr. W. C. Bond, of the Cambridge Observatory, addresses the following to the Boston Traveller.

I have succeeded satisfactorily in repeating Foucault's experiment respecting the rotation of the earth. The new tower of the western wing of the Observatory, I found to be perfectly adapted to the purpose. My arrangements are in this way: Across the top of the central pier, which is a hollow cone, thirty feet high, there is firmly fixed a wooden beam, having the centre perforated to admit the passage of a wire and the fixing of a Torsion circle, such as is used with the Strauss Magnetometers.

To the centre of this circle is attached one end of a silver wire, thirty feet long, of the size commonly known as fine No. 6, and to the other end of this wire is fastened a metallic cylinder, weighing about four pounds, and terminating below in a conical point: on a platform directly below the weight and about thirty feet below the point of suspension, is inscribed a circle of six and a half feet diameter, with the requisite subdivisions and radii.

After giving the pendulum an unbiased arc of vibration, a few minutes' observation will suffice to show with certainty the motion of the earth on its axis, as the terminating point of the weight will be seen at each successive vibration to arrive at the northern boundary of the circle a little more easterly than it did at the preceding one.

beautiful experiment is so simple, that it may be readily repeated in most of our dwellings.

Improving the Habits of Bees.

The cool audacity of Yankees, in their interpretation of the Divine injunction to subdue the earth, must be appalling to the mind of a mere routineer. The joke of making an offer to Government to conquer Mexico and put an end to the late war by contract, was one that none but a Yankee could ever have conceived.

John Bull opened his eyes very wide, and was too much astonished to laugh at such a tremendous piece of pleasantry. If war, therefore, should ever break out between the United States and an European government, we have no doubt that some enterprising downeaster will propose to make a job of it, and take all the trouble of warring it up on contract.

There is something highly poetical in the audacious practical view which Yankees take of every subject. The national peculiarity was never more strongly exhibited than in a little pamphlet which fell into our hands the other day on an improved method of manufacturing honey.

The bee, from the times of Solomon and Virgil down to our own era, has been regarded as a type of intelligence, thrift, and industry. If nature has created any thing incapable of improvements it is certainly the honey bee who has, from time immemorial, been famous for gathering honey every hour from every opening flower, and making the most of time.

An enterprising citizen of Maine, however, thinks that the habits of the bee may be improved, and more honey be got out of its labors than by the old process of collecting that luscious gift of all-bountiful nature. The name of this enterprising gentleman, who proposes to take all the poetry, if not the sting, out of the busy bee, is Arza Gilmore; and he says "his object is the better and more successful employment of the industrious habits" of that animal.

"This is effected," says Mr. Gilmore, "as in all other industrious bodies, by multiplying the hands, giving them a supply of raw materials, and arranging the fixtures in such a manner that the whole force of the operatives may be directed and applied in the most economical manner, as it regards time and labor. It is evident to many that a saving of time is as important to the bee as to man."

The "time spent on the road," suggests Mr. Gilmore, should be employed in productive labor; instead of flying off in pursuit of flowers, how much better it would be to remain at home and make honey. The pleasure of the travel is one of the most sweets of honey-making that Mr. Gilmore does not take into account.

We do not imagine that he intended to convey a great lesson in political economy by his remarks on bee-labor; but put one of the strongest arguments in favor of home production in its clearest light, in illustrating the benefit to the bee in saving the cost of travel and transportation in the manufacture of his great staples of wax and honey. What is the use, in other words, of sending cotton three thousand miles across the Atlantic to be manufactured into cloth for our own use, when it can be done equally as well at home?

The time lost on the road is as clear a loss in cloth-making as in honey-making. But, as we said before, the pleasure of the travel is left out of the calculation by Mr. Gilmore, and the revel among flowers, and the air, we imagine are indispensable to the bee; especially in the navigation of the stormy Atlantic, especially in the winter season is neither profitable nor pleasant to the carrier of cotton and calicoes. To save labor to the bee, and make the most of his time, Mr. Gilmore collects together an immense number of hives, the contents of which may at any time be extracted without the least disturbance or annoyance to the manufacturers of the honey, puts them in a covered room, and sets out ranges of troughs filled with "raw materials," where the bees feed like swine or sheep; they are obliged to fly off in search of flowers, now and then, to procure pollen, or bee-food, for the little ones at home. But, except the necessary "time spent on the road for this purpose, there is no need, for travel; and the process of filling up the wax in cells goes on as regularly as the operations in a cotton factory.

An enterprising gentleman has constructed an immense apiary in Brooklyn, opposite New York, on Mr. Gilmore's plan, and has now some millions of "Singing Masons building roofs of Gold," all hard at work for him. As the apiary, which covers nearly one hundred feet of ground, is situated in the neighborhood of a good many gardens which are just now filled with peach blossoms, honey-suckles, and roses, the temptations to the bees to go abroad must be very great; but the industrious little creatures appear to be strongly taken with the idea of saving the time spent on the road, that the contentedly feed out of the wooden troughs which are filled with the raw materials and let the flowers bloom and blush unseen.

New Counterfeits.

The Lancaster Bank.—2's relief, re-issue. The general appearance of these counterfeits is good, and well calculated to deceive the unwary. The medallions on the ends, which in most other counterfeits are poorly executed, are in these excellent imitations of the genuine. A close examination will, however, certainly detect the spurious bills. On the true note, around the lower margin, the word "two" is repeated twenty times, and between each is a small block of white. On the counterfeit, "two" appears twenty-one times. On the upper margin of the genuine, on either side of the "two," is a number of blocks of white, resembling those in the lower. On the counterfeit, the blocks on the upper right end and the lower left end are wanting, differing in this respect from the good notes. The words "on demand," in the genuine, begin within a sixteenth of an inch

from the marginal line on the left part of the bill, while in the counterfeit the space is more than double.—Bicknell.

Appropriate Prayer.

The South Carolina Convention, which adjourned a few days ago, was opened each day of its session with prayer, by clergymen who volunteered their services. On the 8th of May, the Rev. Dr. Gilman officiated, and his prayer embraced the following appropriate petitions and exhortations:

"And yet, oh God! with fond and lingering hopes we presume to implore thy blessing on the great Confederacy of which we still form a part. May the letter and the spirit of that renowned Constitution which we have received from our fathers, and which was cemented and sealed by their blood and toils be faithfully revered and fulfilled by every party concerned in it. May the kind advances and concessions which are made by one portion of our fellow-citizens, be generously interpreted and accepted by the others: Dispel, by thine Almighty and benignant providence, the cloud which now seems to impend over our destinies. May a spirit of mutual harmony and justice pervade every section of our country. May we all be enabled to see as with one eye, to feel with one heart, and to be impelled in one direction towards the common good. While maintaining and defending what each party may believe to be the right, grant that all parties may be preserved from rash counsels, from precipitate action, from magnifying imaginations, from exaggerated fears, and from self-destructive purposes."

WILD MAN OF THE WOODS.—A gigantic man of the woods has been discovered in Green county, Arkansas, and a party has been organized to endeavor to catch him. When last seen he was pursuing a herd of cattle, who were flying in a state of great alarm, as if pursued by a dreaded enemy. On seeing the party who discovered him he looked at them deliberately for a short time, turned, and ran away with great speed, leaping from twelve to fourteen feet at a time. His footprints measured thirteen inches each. He was of gigantic structure, the body being covered with hair, and the head with long locks that fairly enveloped his neck and shoulders.

ANOTHER SCIENTIFIC WONDER!—Pepsin, an Artificial Digestive Fluid, or Gastric Juice! A great Dyspepsia Curer, prepared from Rennet, or the fourth Stomach of the Ox, after directions of Baron Leibig, the great Physiological Chemist, by J. S. Houghton, M. D., No. 11, North Eighth Street, Philadelphia, Pa. This is a truly wonderful remedy for Indigestion, Dyspepsia, Jaundice, Liver Complaint, Constipation and Debility, curing after Nature's own method, by Nature's own agent, the Gastric Juice. See advertisement in another column.

MARRIAGES. At Derow's Hotel in this borough, on the 1st instant, by A. J. Saffell, Esq., Mr. S. B. DIXON and Miss AGNES B. BOND, all of Delmar. In Covington, on the 24th ult, by Rev. J. W. Stone, Mr. STEPHEN RICKY, of Horseheads, N. Y., and Miss ELLEN L. WYLLIE, of Tioga.

MORE NEW GOODS! IN TIOGA VILLAGE! R. H. MARRIOTT having just received a large assortment of Goods, consisting of Dry Goods, Groceries, Hats and Caps, Boots and Shoes, &c., which he offers to the public at a small advance from New York prices. Also, a large assortment of READY-MADE CLOTHING.

Consisting, in part, of: Black Frock and Dress Coats, from \$8.00 to \$20.00; Fancy colored Sacks and Frock, from 5.00 to 12.00; All wool Tweed Coats, from 4.50 to 8.00; All styles of Business Coats, from 2.50 to 10.00; Also, a large assortment of PANTS, from cotton to fine blacks; a good assortment of VESTS, from \$0.75 to \$5.00; and a fine lot of SHIRTS, COLLARS, GLOVES, SUSPENDERS, OVER-AILS, &c., &c.

The subscriber knowing of a good deal of dissatisfaction with the city work, has engaged in the manufacturing business himself, and will manufacture principally all the clothing he offers for sale. Having procured a first-rate cutter he is now prepared to get up whole or parts of suits of clothing, and execute all orders in the line of cutting or making on the shortest notice, and in the latest and most approved style. Gentlemen wishing to get a free and easy setting garment would do well to give him a call. He has on hand a good assortment of BLACK AND FANCY CLOTHS, Plain and Fancy Cassimers, Tweeds, Linens and Jeans; also, a first-rate assortment of VESTINGS—affording his customers the greatest choice in the selection of materials. All garments, when materials are furnished, are warranted to fit, or no sale.

Boots and Shoes. The subscriber would say that all his Boots and Shoes are manufactured at home, so that he will be able to warrant them to be of first-rate stock and the work to be well done. All orders will be promptly executed. Having on hand a choice stock of LEATHER, and having in his employ the most experienced and finished workmen, he feels confident that he can suit the public in style, workmanship and durability. N. B. PORK AND FLOUR always on hand. June 4, 1851. R. H. MARRIOTT.

PLANK ROAD.

THE STOCKHOLDERS of the Wellsborough and Tioga Plank Road Company are hereby notified, that an installment of FOUR DOLLARS, on each share, is required to be paid on Monday, the 7th day of July next, at the Treasurer's office, in Wellsborough. GEO. MCLEOD, Treasurer. By the act of Assembly all installments not paid within thirty days after the specified must be charged with interest at the rate of one per cent. per month, and when the interest amounts to the sum already paid the stock may be forfeited to the company.

Plank Road Bridge.

PROPOSALS will be received until the 1st of July, for building a Barr Bridge over the dead waters of Crooked Creek. For information of plan and specifications enquire of the subscriber. B. C. WICKHAM, Pres't Wells & Tioga Plank Road Co. The Directors will be on the ground at 10 o'clock, A. M. June 5, 1851.

Wheat.

BUCKWHEAT, Corn, Oats, and a few kinds of Butter, for sale at the BINGHAM OFFICE: Feb. 20, 1850.

ERWY respectfully informs the citizens of Wellsborough and vicinity, that he is now carrying on the TAILORING BUSINESS, in all its branches, at his shop on Main street, near the Wellsborough Hotel, where he is prepared to execute all work entrusted to his care, with neatness and despatch, on the most reasonable terms.

THE LATEST FASHIONS are regularly received from New York and Philadelphia; and the facility of rendering satisfaction to all who desire their work done in a neat, fashionable and durable manner.

CUTTING done to order on the shortest notice, for "pay down." All kinds of country produce (delivered) received in payment for work, at the market prices. —Wellsborough, Feb. 13, 1851.

To the Physicians of Tioga County.

JUST RECEIVED! the largest and most complete and carefully selected STOCK OF MEDICINES in the county, will now be found at R. ROY'S Drug Store, in Wellsborough. Call and see for yourself.

N. B. Orders for Medicine, by letter, will be as promptly and carefully put up as when the purchaser is present. April 17, 1851.

CRACKERS!—Plenty of 'em! Who said we were out? HOYT & HALL, March 13.

LIST OF PERSONS

ASSESSED with licenses for the sale of Goods, Wares, Merchandise, Commodities, and Profits, for the license year commencing May 1, 1851.

Table with columns: Name, Residence, Class, Amount. Includes W. M. Mallory, J. J. Hurlbut, A. H. Gaylard, C. F. Taylor, Putnam & Packard, Edwin Dyer, D. Caldwell, J. C. Bennett, Wm. Spaulding, Oliver Elliott, John Adams, H. S. Holcomb, O. S. Gregory & Co., Wm. McNeil, Billings & McNeil, Thomas Clark, Joseph Palmer, Jr., Q. Warriner, Wm. A. Faulkner, J. P. Slicer, A. Harris, J. & J. Parkhurst, G. W. Phelps, Smith & Seely, C. H. Baxter, A. Looney, D. J. Shaw, J. Stoddard, Coats & Kimball, Crandall & Coats, Culver & Slosson, C. Horsely, J. L. Miller, B. Barts, C. Summers, C. A. Stanton, H. T. Ryan & Co., C. H. W. Tubbs, J. W. Ford, M. Seely, J. Slosson, Trough & Hurd, Newcomb & Allen, C. Benn, Wm. Herrick, Thos. Mitchell, M. Reddington, E. Churchill, Morris, Wm. W. Babb, James Duffy, Hoard & Beach, B. M. Bailey, H. Stowell & Son, John Fox, J. H. Strong, R. Shears, T. L. Baldwin & Co., J. S. Steele & Co., Hunt & Gregory, J. Hallack, A. Jackson & Co., P. S. Tuttle, Lewis Dagget, R. H. Marriot, A. Humphrey, P. S. Chapman & Co., W. K. Mitchell, L. Biglow, Traverser, B. Roberts, A. J. Daskam, Krusen & Simmons, Westfield, J. Goodspeed & Bro., G. & C. Close, J. S. Adams, Isaac Pritchard, Isaac Beach, C. P. Douglass, Sam'l Swimler, Sam'l Niver, C. Schooner, O. B. Wells, D. N. Hunt, J. B. & P. Drake, R. Rose, P. Baker, Ulman & Co., Henry Howard, James Merrill, D. Brown, W. A. Cunniff, Henry Keagle, Wm. E. Lyon, Robert Cox, John Goodspeed, A. Beers, A. & J. Deerman, L. B. Reynolds, O. Beach, S. & Scott, V. Case, F. Halliday, C. & J. L. Robinson, Wellsborough, C. D. Smith & Co., Beach & Ross, Bean & Esworth, J. L. Nichols, M. Post, Hoyt & Hall, G. M. Lamb, Cook & Bailey, Robert Roy, Morgan Sherwood, M. M. Converse, J. B. Babcock.

TAILORING!

M. M. CONVERSE would respectfully inform his friends and the public generally, that he may be found at his old stand, one door east of Nichols' Store, where he is at all times prepared to execute all orders in his line at the shortest notice, and on the most reasonable terms.

NEW MILLINERY, IN COVINGTON, PA.

MISS M. SHAW would respectfully inform the Ladies and the public generally, that she has opened a Millinery establishment in the village of Covington, where she has just received a new and beautiful assortment of MILLINERY GOODS.

She will be ready, at all times, to furnish those who may favor her with a call, with Bonnets of every variety, of the best material, and the latest style, on a reasonable terms. She always keeps on hand a general assortment of Millinery Goods, Bonnets, Silks, Ribbons, FEATHERS, FRENCH & DOMESTIC ARTIFICIALS, and Trimmings of every description. Covington, May 8, 1851-4.

JUST RECEIVED! A NEW SUPPLY OF SPRING AND SUMMER GOODS.

NOW IS THE TIME TO PURCHASE GOODS CHEAP FOR CASH! Dry Goods, Groceries, AND EVERYTHING IN THE STORE LINE! JUST received, direct from New York City, and now open at the store of the subscriber, in Wellsborough, where all desirable of purchasing DRY GOODS, GROCERIES, BOOTS, SHOES, &c., at cash prices, will find it to their interest to call. April 30, 1851. L. I. NICHOLS.

T. L. BALDWIN & CO., AT TIOGA VILLAGE.

ARE NOW ON HAND with another large and well selected assortment of NEW GOODS, to which they would invite the particular attention of their old customers and the public generally.

BEAR IN MIND! That they will not be undersold by any one in Northern Pennsylvania! T. L. BALDWIN, J. A. MATHEWS. Tioga, May 15, 1851.

WELLSBOROUGH BOOT AND SHOE STORE.

On Main Street, two doors below Nichols' Store. MORGAN SHERWOOD would respectfully inform his friends and the public generally, that he has just returned from New York City with a large and elegant assortment of MEN'S AND BOY'S COARSE AND FINE BOOTS, AND LADIES' AND MISSES' SHOES of every description, and the latest styles. Also, a general assortment of SHOE FINDINGS, all kinds of LEATHER, BLACKING, &c., kept constantly on hand.

His stock consisting in part as follows: Gentlemen's Wear. GENTLEMEN'S Fine Calf, Coarse and Kip Boots and Shoes. BOYS' AND YOUTH'S Fine, Coarse and Kip Boots and Shoes. GENTS' Enamelled and Morocco Pumps.
