Hand Power Loom!-Patented 1865

A LL persons interested in the production of practical machinery into our country, are requested to estigate the merits of HENDERSON'S HAND POWER LOOM.

This loom will do all kinds of hand weaving.
It will weave jeans, blankets, plain cloth, satinst, karsay, flannel, seamless sack, double width blankets, or any kind of cotton, wool, or flax cloth. It treads the treadles, throws the shuttle, lets off the web, and takes up the cloth. It makes the upper shed as the batten comes forward, and beats up the filling after the cross is made, making better cloth and better selvage than can be made in any other way.

It is the only hand loom that is switchle.

It is the only hand loom that is suitable for wearing wool. Jor wearing wood, as no loom that makes all the shed as the batten goes back, will weave wool satisfactorily. It has no atrings to stretch and get out of order; has treadles at both sides of the loom, making the shed complete at both sides. This loom is made to weave the different kinds of cloth, by simply changing the pins that make the upper shed.

per such.

Township rights for sale. Call at Mainsburg, Tioga County, Pa., and see a full sized loom in operation. Orders for looms solicited.
