Tioga Co. Institute of Instruction.

MANSFIELD, March 5, 1867.

Ma Editor: I was much gratified to see in your issue of the 27th nit. a call for a meeting of these favoring the promulgation of practical Science. This, it seems to me is a more in the right direction. Herodore, the direction and other countries the Stitch have been confined to to mide. Now me, thought a tember of many rears, and containing withing myself the experience of stead years of boarding from the teaching of hundrods of "lices how to shoot," I am modest enough to say that I still think there are a fewthing of board motion with the shoot, and it is sometimes a society to be called the "Tioga County Institute of Instruction." I like the name. It embraces with in it is broad folds every class and condition of men and women, consequently every phase of human society.

And now Mr. Editor, it was a we to get the people interested in this matter. Practical Science. That's a broad subject. Who does not Maxeriain, Morch 5, 1867.

in fact, every thinking man and woman should be

present.

Let me suggest, Mr. Editor, that the hour of meeting be 11 o'clock A. M. of Thursday, and that it continue through the remainder of the day and breating, and if the therest 15 millions, continue the session through Friday. But, by the way, Friday is an unlucky day, as said.— Wonder how that is? Suppose some one prepares a paper on that subject, showing that it is, or is not an unlucky day, and why it was, and is now so considered.

considered.

Can the good people of Wellsboro be induced to hang out their "Inteb-strings" at that time that entertainment may be had for the savans of the county? Hotel keepers. It think will reduce their usual prices. At least I think friend Holiday, will. And why not? It will be bringing two Holidays together, and a good time will be the result.

Dodication at Troy.

The Baptist Society at Troy, have shelp been remodeling their house of worship. Their lot is a very eligible one, but for a long time it has been their disadvantage to have a meeting house needing repairs. By earnest, and self-denying effort they have succeeded in securing an edifice at once beautiful and commodious. As completed, the hullding consists of a main frame, fifty feet by forty with a centre tower twelve feet sename at forty, with a centre tower twelve feet square it the base—terminating in a pire. This addition forms a fine entrance to a vositionle opening late the audience room by two doors. Within, the room is divided by three aisles, while an elevation between the doors and in front of the gallery affords room for the choir. The exterior color is light stone, the interior is finished with Freecoed paper. The cost has been about \$2,000. The building was re-dediented on Wednesday informing, Feb. 27th. Prof. Lemuel. Moss, of University at Lewisburg, preaching the sermon and forty, with a centre tower twelve feet square at the base—terminating in a spire. This addition we take pleasure in commending the entertainment to a generous public patronage.

We this week publish another commanication touching the meeting to organize the

A large quantity of Clover and Timothy Seed the cot. That's broad subject. Who does not know something of these matters? I apprehend that those who issued this call had in mind the idea of collecting and discussing the observations, experiences, and experiments of the people generally. Rery thinking, reflecting man has some unexplained, or singular phenomena that at sometime has awakened his interest, and perhaps for want of a little light the subject is still in obscurity.

Let us come together then,—not in small numbers, but in scores, find there is not room to contain us. Every teacher in the county should be present, because for him there will be opened a founting of things new and strange.
